Craft Of Decision Modelling:

The Craft of Decision Modelling Patrick Rivett, **The Craft of Decision Modelling** Patrick Rivett, 1994-04-26 This volume offers a varied discussion of the two main areas of decision modelling theory and practical application It deals with the construction of models for decision making and the scientific analysis or consequence of these decisions Case studies are used to illustrate the text *Evaluation and Decision Models with Multiple Criteria* Denis Bouyssou, Thierry Marchant, Marc Pirlot, Alexis Tsoukias, Philippe Vincke, 2006-06-07 Formal decision and evaluation models are sets of explicit and well defined rules to collect assess and process information in order to be able to make recommendations in decision and or evaluation processes They are so widespread that almost no one can pretend not to have used or suffered the consequences of one of them Our earlier companion volume *Evaluation and Decision Models* heavily criticised formal models but also argued that they could be useful On the other hand *Evaluation and Decision Models with Multiple Criteria* is a guide aimed at helping the analyst to choose a model and use it consistently We propose a sound analysis of techniques and our presentation can be extended to most decision and evaluation models as a decision aiding methodology This volume is intended for the enlightened practitioner for anyone who uses decision or evaluation models for research or for applications and is willing to question his practice to have a deeper understanding of what he does Encyclopedia of Operations Research and Management Science Saul I.
