a lo largo de cientos de millones de años En este libro analizaremos ambos lados de la cuestión de la manera más justa posible La conclusión es tuya pero solo una opción es correcta *Una revisión de las teorías sobre el origen y la evolución del Universo. Física, metafísica, ciencia ficción y (a)teología en la cosmología antigua y moderna* John Auping Birch, 2009 **El Hombre ¿Azar o Diseño?** José Francisco Martínez García, José Francisco Martínez García, 2012-05 El hombre azar o diseño En esta obra se hace una exposición sucinta de fenómenos y elementos materiales que conforman el universo y por tanto también al ser humano como un ser que tiene cuerpo y vida y por ello sometido a leyes físicas y biológicas pero que se desempeña trascendiendo esta clase de leyes El hombre no puede tener su origen sólo en la materia bruta Los acontecimientos del cosmos que le preceden tampoco justifican suficientemente su existencia y su naturaleza que desborda y trasciende la materia Siendo el hombre un ser inteligente su existencia demanda una causa inteligente superior a la causa que no se encuentra ni en el azar ni en la materia En este entramado se conjugan la filosofía la ciencia el arte la historia y la religión **Ni Creación Ni Evolución** JUAN DE DIOS CABRAL, 2013-08-29 La obra titulada ni creación ni evolución es un tratado sobre la decodificación del origen del hombre en la tierra Más que un simple libro es una tesis o teoría basada en un análisis lógico minuciosamente elaborado con el fin de demostrar el origen del hombre de las razas y del tiempo Se trata de una teoría seria y responsable fundamentada en conceptos y postulados que podrán esclarecer verdades que la humanidad desconoce y ha desconocido por miles de años las cuales se han mantenido bajo un velo de misterio Tratamos además sobre el reordenamiento del tiempo como elemento básico en la definición del origen del hombre y de la historia Es un tratado en el que el ser humano ha de descubrir su verdadera identidad como ser universal descendiente de extra inteligencias desde antes de su aparición en la tierra sin que haya pasado por ningún tipo de transformación experiencia o etapa evolutiva Esta obra busca dar respuestas claras y precisas a confusiones e interrogantes que la humanidad ha arrastrado durante toda la historia Los temas a tratar son 1ro La decodificación del origen del hombre en la Biblia 2do El origen según las ciencias 3ro Origen de las razas 4to Codificación del tiempo 5to Decodificación del origen después de los dinosaurios 6to Codificación del futuro **Creationism in Europe** Stefaan Blancke, Hans Henrik Hjermslev, Peter C Kjærgaard, 2014-12-15 A history of Creationism in Europe from its reception to its rise and the response that has followed For decades the creationist movement was primarily situated in the United States Then in the 1970s American creationists found their ideas welcomed abroad first in Australia and New Zealand then Korea India South Africa Brazil and elsewhere including Europe where creationism plays an expanding role in public debates about science policy and school curricula In this the first comprehensive history of creationism in Europe leading historians philosophers and scientists narrate the rise of and response to scientific creationism creation science intelligent design and organized antievolutionism in countries and religions throughout Europe Providing a map of creationism in Europe the authors chart the history of creationist activities and strategies Over the past forty years creationism has spread swiftly among European Catholics Protestants Jews Hindus and Muslims even as anti creationists

sought to halt it Anti evolution messages gained such widespread approval in fact that in 2007 the Parliamentary Assembly of the Council of Europe passed a resolution advising member states to defend and promote scientific knowledge and firmly oppose the teaching of creationism as a scientific discipline on an equal footing with the theory of evolution Creationism in Europe offers an introduction to the cultural history of modern Europe the variety of worldviews in Europe and the interplay of science and religion in a global context It will be of interest to students and scholars in the history and philosophy of science religious studies and evolutionary theory as well as policy makers and educators concerned about the spread of creationism in our time

fundamentalista contra la teoría de Darwin sobre evolución de las especies por selección natural y contra el pensamiento evolucionista en general. Al efecto, el libro repasa las aportaciones evolucionistas previas al darwinismo, aclara algunos conceptos clave sobre teoría evolucionista para facilitar la comprensión de la evolución biológica y del origen de la vida y del ser humano, y por último participa en el debate sobre el auténtico alcance científico de la concepción creacionista y del diseño inteligente. Por ello, su lectura podría resultar muy sugerente a quienes cuenten con formación científica en Biología o tengan interés en la discusión de ciertos aspectos polémicos implícitos en una cosmovisión evolucionista.

la Mentira: Evolución / Millones de años Ken Ham, 2017-11-02. En 1987 Ken Ham escribió lo que sería una advertencia profética de la Iglesia acerca de los efectos destructivos de compromiso con las ideas evolutivas y cómo este compromiso socava la autoridad de las Escrituras y erosiona la confianza cristiana en la infalibilidad de Dios y Palabra. Hoy en día tenemos los cristianos no sólo confundidos cuando se trata de Génesis y la edad de la tierra, pero incluso la realidad del infierno. Además como una persona real y Cristo y propias palabras acerca de la creación, el matrimonio y más se está debatiendo en los pulpitos de todo el mundo. En esta edición especial revisada y actualizada Ken Ham nuevamente toma la delantera en señalar el precipicio que se avecina a la Iglesia si se apresura hacia cómo la evolución y los millones de años está impulsando a la gente lejos de la fe y la solución bíblica que puede cambiarlo.

Pensamiento, 2011 De la física de la información al conocimiento y libertad de la persona Gianfranco Basti, 2019-02-11. En el 65 aniversario del profesor Gianfranco Basti y con el doble objetivo de reconocer sus notables aportaciones al pensamiento filosófico y a la vez facilitar su conocimiento a los lectores de lengua castellana, el presente volumen ofrece la traducción de una colección de artículos suyos. El hilo conductor de estos textos es una reflexión filosófica conforme a los desarrollos físicos y lógicos que han marcado el siglo XX y los inicios del XXI y que permiten integrar algunas intuiciones especulativas de santo Tomás de Aquino sin concordismos ni yuxtaposiciones. Predominan los temas de antropología filosófica y filosofía de la mente, aunque no de manera exclusiva, y tiene un peso notable la noción de información tal como ha entrado en física sin olvidar las aportaciones de la lógica posteriores a Gödel hasta la teoría de categorías. Los artículos son los siguientes: Relaciones ciencia-fe, novedades y problemas abiertos, 1998; Metafísica, metalógica y nuevas perspectivas para la reflexión filosófica, 1999; Mente-cuerpo, 2002; La teoría compleja de la cognitiva, en Cornelio Fabro, Del ser al pensamiento, 2012; Persona, intersubjetividad, realidad, los tres pilares de la relación de curación, 2013; Neurotica y antropología, 2014; La idea de ciencia en Maritain entre pasado y futuro, 2015; El trascendental posmoderno del lenguaje, ciencia y filosofía, 2017.
