## **Creating Fear News And The Construction Of Crisis:**

*Creating Fear* David L. Altheide, The creative use of fear by news media and social control organizations has produced a discourse of fear The awareness and expectation that danger and risk are lurking everywhere Case studies illustrates how certain organizations and social institutions benefit from the exploitation of such fear construction One social impact is a manipulated public empathy We now have more victims than at any time in our prior history Another more troubling result is the role we have ceded to law enforcement and punishment we turn ever more readily to the state and formal control to protect us from what we fear This book attempts through the marshalling of significant data to interrupt that vicious cycle of fear discourse David Altheide employs a method which he calls tracking discourse to map how the nature and the extent of the use of the word fear has changed since the 1980s how the topics associated with fear the topics of media discourse have also changed over the same period for example the emphasis moves over time across AIDS crime immigrants race sexuality schools and children and how certain news sources prevail over others thus protectively insulating themselves from criticism of the premises of their discourse frames

understanding and their sensitivity to provide coverage that helped bring understanding and a sense of calm to the chaos. Their performance did not end with reporting the immediate impact of the catastrophe. They continued to analyze what happened, the impact to property and human lives, the impact on government and foreign relations. Lessons from Ground Zero examines journalism's efforts to cover a crisis while analyzing journalism itself. Many lessons were evident to journalists as they sought to cope with the challenges of covering 9/11. The long-term question, however, is whether the answers they found served as catalysts for better journalism in the future or whether they have been forgotten, put into the closet of old memories with no noticeable long-term impact. This book analyzes journalists' response to 9/11 through scholarly research and interviews with many of the journalists who covered 9/11. Sometimes they do not agree, but all are thoughtful, and each adds to understanding. Public opinion polls show clearly that citizens appreciated and responded to media coverage. Given that this occurred in a time frame in which public approval of American journalism had declined, it is reasonable to ask what the media did that was different from their normal practices. This book provides some of the answers.

**The Oldest Trick in the Book** Ben M. Debney, 2020-07-03. This book investigates the normalisation of blame shifting within ideological discourse as a broad feature of history, working from Churchill's truism that history is written by the victors. To that end, it explores historical episodes of political persecution carried out under cover of moral panic, highlighting the process of Othering common to each and theorising a historical model of panic-driven scapegoating from the results. Building this model from case studies in witch panic, communist panic, and terrorist panic respectively, *The Oldest Trick in the Book* builds an argument that features common to each case study reflect broader historical patterning consistent with Churchill's maxim. On this basis, it argues that the periodic construction of bogeymen or folk demons is a useful device for enabling the kind of victim playing and victim blaming critical to protecting elite privilege during periods of crisis, and that in being a recurring theme, historically, panic-driven scapegoating retains great ongoing value to the privileged and powerful, and thus conspicuously remains an ongoing feature of world politics.

**Media and Its Role in Protecting the Rights of Children in Africa** Oyero, Olusola, 2019-10-18. Though the media have been charged with the responsibility of active involvement in protecting the interest of the child, it is important to examine how well they have fared in the performance of this duty and the challenges that occur in the process, as well as identify future pathways to ensure that the media succeeds in this assignment. *Media and Its Role in Protecting the Rights of Children in Africa* is an essential research publication that examines media roles, challenges, theories, and strategies to ensuring the realization of the rights of children.
