the lives of teachers and their pupils today in predominantly secular society RE should be taught from the perspective of knowledge and understanding of religions to foster tolerance and to dispel prejudice and misunderstanding without any attempt to influence children's personal beliefs. The philosophy which underpins this book is the belief that RE is best taught within an integrated approach to the humanities. The humanities are about what it is to be human in time and place and in terms of belief. Therefore RE is linked with history, geography and the creative arts within five themes: human survival, light and dark, leadership, the environment and time and motion. As well, there is accurate and detailed subject knowledge about the six major world faiths and plays scenes about them written and produced in schools by myself. The book is in alignment with the British National Curriculum which requires that RE is taught in schools and with the latest Ofsted Report 2010 which states that there is a need for guidance for teachers and more creative and innovative approaches to link RE with the wider curriculum.

Education That Is Christian Lois E. Lebar, 1998-08 Essential reading for anyone involved in Christian education. This classic bestseller outlines a strategic vision for education that is designed to produce Christ-like people.

Christian Education in the Small Membership Church Dr. Karen B. Tye, 2010-09-01 Christian Education is part of the vital ministry of all churches but especially of small membership churches. In a culture that places great value on numbers, small membership churches often mistakenly see themselves at a disadvantage. Small membership churches can create wonderful opportunities to form and disciple faithful followers of Jesus Christ. In offering viable Christian Education, the role of the pastor is critical. This book invites pastors to lead their small membership churches to develop an imaginative and holistic vision of Christian Education. Read the Introduction.

Teaching Religious Education Creatively Sally Elton-Chalcraft, 2014-11-20 Teaching Religious Education Creatively offers a brand new approach for the primary classroom and is crammed full of innovative ideas for bringing the teaching of RE to life. It helps teachers understand what constitutes a healthy curriculum that will encourage children to appreciate and understand different belief systems. Perhaps most importantly, it also challenges teachers to understand RE as a transformatory subject that offers children the tools to be discerning, to work out their own beliefs and answer puzzling questions. Underpinned by the latest research and theory and with contemporary cutting edge practice at the forefront, expert authors emphasise creative thinking strategies and teaching creatively. Key topics explored include: What is creative teaching and learning? Why is it important to teach creatively and teach for creativity? What is Religious Education? Why is it important for children to learn about and from religion? How can you teach non-biased RE creatively as a discrete subject and integrate it with other curriculum areas? Teaching Religious Education Creatively is for all teachers who want to learn more about innovative teaching and learning in RE in order to improve understanding and enjoyment and transform their own as well as their pupils' lives.

Principles and Practices of Christian Education Robert W. Pazmino, 2002-04-29 Principles and Practices of Christian Education shows teachers how they can use two important principles that stand behind all evangelical practices.

to make their education program stand out from all the others in its nurture of students First evangelical Christian education recognizes the need for conversion personal and corporate transformation that reconnects people to their Creator Second evangelical Christian education strives for connection making contact with people as unique individuals who live in a particular society and who need to know more about scripture In this book Christian education students learn that the work for which they prepare is a partnership with God to transform people Their central task is worship but through it and other activities they lead others to faith commitment and transformation of communities *Creative Teaching in Christian Education* Marian Armstrong,1948

Education and the Emerging Church Wendi Sargeant,2015-07-24 All signs point to Christian education having lost its theological location and prominence in the life of the Western Protestant church The Emerging Church movement as an intentionally postmodern approach to ministry in the contemporary context may however offer insights to reinterpret Christian education This significant movement in today s church gives Christian education a new interpretive framework that is theologically located at an intersection of doxology and doctrine In her examination of postmodern faith formation Wendi Sargeant explores the importance of the Christian worshipping community as the most appropriate setting for Christian education Practitioners and students will benefit from the ready to use teaching and learning matrix and all those with interest in the formation of faith in themselves and others will draw much from the way Sargeant situates worship as the basis for enhancing Christian formation and ethos **International Handbook of the Religious, Moral and Spiritual**

Dimensions in Education Marian de Souza,Gloria Durka,Kathleen Engebretson,Robert Jackson,Andrew McGrady,2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as

an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it is today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world
