Novel Competition Evan Brier, 2024-04-16 *Novel Competition* describes the literary and institutional struggle to make American novels matter between 1965 and 1999 As corporations took over the book business Hollywood movies popular music and other forms of mass produced culture competed with novels as never before for a form of prestige that had mostly been attached to novels in previous decades In the context of this competition developments like the emergence of Rolling Stone magazine regional publishers Black studies programs and New Hollywood became key events in the life of the American novel Novels by Truman Capote Ann Beattie Toni Cade Bambara Cynthia Ozick and Larry McMurtry among many others are recast as prescient reports on and formal responses to a world suddenly less hospitable to old claims about the novel's value This book brings to light the story of the

novel's perceived decline and the surprising ways American fiction transformed in its wake Editing and Special/Visual Effects Charlie Keil, Kristen Whissel, 2016-08-26 Most moviegoers think of editing and special effects as distinct components of the filmmaking process. We might even conceive of them as polar opposites since effective film editing is often subtle and almost invisible whereas special effects frequently call attention to themselves. Yet film editors and visual effects artists have worked hand in hand from the dawn of cinema to the present day. Editing and Special Visual Effects brings together a diverse range of film scholars who trace how the arts of editing and effects have evolved in tandem. Collectively the contributors demonstrate how these two crafts have been integral to cinematic history starting with the trick films of the early silent era which astounded audiences by splicing in or editing out key frames all the way up to cutting edge effects technologies and concealed edits used to create the illusions. Throughout readers learn about a variety of filmmaking techniques from classic Hollywood's rear projection and matte shots to the fast cuts and wall to wall CGI of the contemporary blockbuster. In addition to providing a rich historical overview Editing and Special Visual Effects supplies multiple perspectives on these twinned crafts introducing readers to the analog and digital tools used in each craft showing the impact of changes in the film industry and giving the reader a new appreciation for the processes of artistic collaboration they involve **Handbook of Statistical Data Editing and Imputation** Ton de Waal, Jeroen Pannekoek, Sander Scholtus, 2011-03-22 A practical one stop reference on the theory and applications of statistical data editing and imputation techniques. Handbook of Statistical Data Editing and Imputation equips readers with the essential statistical procedures for detecting and correcting inconsistencies and filling in missing values with estimates. The authors supply an easily accessible treatment of the existing methodology in this field featuring an overview of common errors encountered in practice and techniques for resolving these issues. The book begins with an overview of methods and strategies for statistical data editing and imputation. Subsequent chapters provide detailed treatment of the central theoretical methods and modern applications with topics of coverage including Localization of errors in continuous data with an outline of selective editing strategies automatic editing for systematic and random errors and other relevant state of the art methods. Extensions of automatic editing to categorical data and integer data. The basic framework for imputation with a breakdown of key methods and models and a comparison of imputation with the weighting approach to correct for missing values. More advanced imputation methods including imputation under edit restraints. Throughout the book the treatment of each topic is presented in a uniform fashion. Following an introduction each chapter presents the key theories and formulas underlying the topic and then illustrates common applications. The discussion concludes with a summary of the main concepts and a real world example that incorporates realistic data along with professional insight into

common challenges and best practices Handbook of Statistical Data Editing and Imputation is an essential reference for survey researchers working in the fields of business economics government and the social sciences who gather analyze and draw results from data It is also a suitable supplement for courses on survey methods at the upper undergraduate and graduate levels
