Bomber Crew At War 1939 1945:

Darlington & Teesdale at War 1939-45 Craig Armstrong, 2022-11-30 During the Second World War Darlington had a number of industries that were important to the war effort With its historic links to the railway industry the town possessed several engineering firms as well as a number of companies that produced iron and steel products and many of these companies switched some or all of their production over to wartime demands The town also had an extensive rural hinterland and the farmers of Teesdale were faced with a barrage of new demands and regulations governing their vital work Many residents of the area served as members of the armed forces and losses were grievous the number of Darlington men killed while serving with the RAF was particularly high with the impact of these losses spreading throughout the community Despite many setbacks Darlington was very efficient in bring its Air Raid Precautions and civil defence services up to full strength With Britain facing invasion in 1940 many older men in the area along with those younger men who were in reserved occupations volunteered to serve in the Local Defence Volunteers later the Home Guard and one man was still serving at the age of 89 Thankfully Darlington did not see the heavy bombing that many other communities in the North East of England suffered However there were still a large number of accidents in the area caused by the blackout resulting in a number of fatalities Locals also had to deal with rationing and not all were willing to pull together seeing the wartime conditions instead as an opportunity to make illegal profits

Cambridgeshire at War 1939-45 Glynis Cooper, 2020-03-20 Few could believe that within twenty years of the war to end all wars being won the world was once again at war Veterans of the Great War feared going through the same thing again and even worse many knew that this time their children would also be involved in the fighting What had all the sacrifice been about Cambridgeshire the city of Cambridge and the University of Cambridge were badly hit by the Great War with many lives lost families ripped apart and a way of life that had changed forever Building and economic recovery had been hindered by the Great Depression The county was not ready to face another war nor for the problems of warfare in the air Yet somehow the county the city and the university all found the strength to unite against the enemy once more and ensure that Germany would never win the war The book chronicles life on the Home Front during the Second World War which itself reached into every home and affected every citizen changing the life and the face of the county It is also a timely reminder of the difficulties hardships restrictions and morale faced by the city as the war dragged on and how the local community overcame the odds that were stacked against them

BRITISH WAR FILMS, 1939 - 45 S. P. Mackenzie, 2001-01-01 The cinema was the most popular form of entertainment during the Second World War Film was a critically important medium for influencing opinion Films such as In Which We Serve and One of Our Aircraft is Missing shaped the British people's perceptions of the conflict British War Films 1939 45 is an account of the feature films produced during the war rather than government documentaries and official propaganda making the book an important index of British morale and values at a time of desperate national crisis

Under a Bomber's Moon Stephen

Harris,2011-01-11 They were the best of enemies dedicated skilled and deadly In the night skies above wartime Germany an RAF navigator air bomber from New Zealand and a Luftwaffe pilot seek out their targets testing the gap between success and their own destruction as they cross each other s paths The odds are heavily against either of them making it through the war but as this sobering realisation displaces their initial exuberant sense of adventure both come to see in their youthful sacrifice the survival of all they hold dear UNDER A BOMBER S MOON reaches across the divide of years of geography of nationality to tell their story largely in their own words describing both the breathtaking clashes in the air and the camaraderie humour patriotism and personal tragedies that became their war Stephen Harris began his journey of discovery because he wanted to know the truth of his great uncle Colwyn Jones s fate With Col s vividly written letters and diary as a starting point he set out to discover what really happened on the night Col s extraordinary luck ran out Little did he know that his quest would lead him to a meeting with a former Luftwaffe pilot who was pitted against his great uncle in the skies over Germany Otto Heinrich Fries proved to be both engaging and articulate eventually allowing Harris to tell his story in this book The result is a unique and personal account of two highly successful airmen from opposing sides **The Tools of War, 1939/45** Reader's Digest Association (Canada),1969 **Shadow** Neil Hunter Raiford,2011-10-11 This is the poignant and exciting story of a statistical anomaly a B 24 bomber crew that completed 50 combat missions in World War II This crew was part of the famous 450th Bomb Group which was nicknamed the Cottontails because of their white rudders As part of the 15th Army Air Force they flew strategic bombing missions out of Manduria Italy in the heel of the boot and struck strategic targets which were out of the reach of the 8th Army Air Force bases in England The group lost 1 505 airmen in only a year and a half the equivalent of losing their effective flying strength three times over The book s title comes from the crew s bomber Shadow which in turn was named for the pilot s black cocker spaniel that flew with them on training missions Based on interviews with the surviving crewmembers and their families as well as extant archival source material the book details the childhood training and post war life of each of its 13 principal characters Chapter One is a discussion of each man s boyhood years and Chapter Two provides details of the training that each received In Chapter Three the original crew of ten Crew 4 N 33 was formed in Clovis New Mexico An assignment for training in Clovis and in B 24s meant that the crew had been designated for heavy bombardment Chapter Four includes a description of the four main objectives for the crew one of which was to participate in POINTBLANK the Combined Bomber Offensive which called for the destruction of German fighter aircraft plants ball bearing plants oil refineries rubber plants munitions factories sub pens and bases Details of the structural components of most missions are provided in Chapter Five The crew completes its first missions in Chapter Six In Chapter Seven Shadow completes its last after taking enemy fire and Chapter Eight introduces a new plane Sleepy Time Gal The book s Epilogue contains information about the post war lives of the crew **Images of Air War, 1939-45** Chaz Bowyer,1983 Rigt illustreret beskrivelse af RAF luftoperationer p flere fronter under 2 verdenskrig **Air Force Magazine** ,2004

The Aerial War: 1939-45 David Baker, 2020-06-01 The war is a war of machines it will be won on the assembly line Lord Beaverbrook Minister of Aircraft Production Just as vital as the battle on land or the struggle at sea the air war ultimately tipped the balance of power in World War II Many campaigns rode on the capabilities of their airforce as British Spitfires were pitted against Messerschmitt Bf 109s and Japanese Zeros Aerospace expert David Baker explores this battle in the skies detailing the technical leaps that were made and little known histories about the men and women involved from pilots to factory workers Featuring magnificent photographs and illustrations The Aerial War gives a brilliant insight into many key battles and highlights the integral role that aviation played in securing an Allied victory

Flak Edward B. Westermann, 2001 Air raid sirens wail searchlight beams flash across the sky and the night is aflame with tracer fire and aerial explosions as Allied bombers and German anti aircraft units duel in the thundering darkness Such cinematic scenes played out with increasing frequency as World War II ground to a close were more than mere stock material for movie melodramas As Edward Westermann reveals they point to a key but largely unappreciated aspect of the German war effort that has yet to get its full due Long the neglected stepchild in studies of World War II air campaigns German flak or anti aircraft units have been frequently dismissed by American British and German historians and by veterans of the European air war as ineffective weapons that wasted valuable materiel and personnel resources desperately needed elsewhere by the Third Reich Westermann emphatically disagrees with that view and makes a convincing case for the significant contributions made by the entire range of German anti aircraft defenses During the Allied air campaigns against the Third Reich well over a million tons of bombs were dropped upon the German homeland killing nearly 300 000 civilians wounding another 780 000 and destroying more than 3 500 000 industrial and residential structures Not surprisingly that aerial Armageddon has inspired countless studies of both the victorious Allied bombing offensive and the ultimately doomed Luftwaffe defense of its own skies By contrast flak units have virtually been ignored despite the fact that they employed more than a million men and women were responsible for more than half of all Allied aircraft losses forced Allied bombers to fly far above high accuracy altitudes and thus allowed Germany to hold out far longer than it might have otherwise Westermann's definitive study sheds new light on every facet of the development and organization of this vital defense arm includi

Naval Warfare 1919-45 Malcolm H. Murfett, 2008-11-04 Naval Warfare 1919 45 is a comprehensive history of the war at sea from the end of the Great War to the end of World War Two Showing the bewildering nature and complexity of the war facing those charged with fighting it around the world this book ranges far and wide sweeping across all naval theatres and those powers performing major as well as minor roles within them Armed with the latest material from an extensive set of sources Malcolm H Murfett has written an absorbing as well as a comprehensive

reference work He demonstrates that superior equipment and the best intelligence ominous power and systematic planning vast finance and suitable training are often simply not enough in themselves to guarantee the successful outcome of a particular encounter at sea Sometimes the narrow difference between victory and defeat hinges on those infinite variables the individual s performance under acute pressure and sheer luck Naval Warfare 1919 45 is an analytical and interpretive study which is an accessible and fascinating read both for students and for interested members of the general public The Insubordinate and the Noncompliant Howard Coombs,2008-03-28 The Unwilling and the Reluctant Theoretical Perspectives on Disobedience in the Military and The Apathetic and the Defiant Case Studies of Canadian Mutiny and Disobedience 1812 1919 are the first two volumes in a series devoted to disobedience issues in the Canadian military Now with The Insubordinate and the Noncompliant the trilogy is complete Military leadership has both formal and informal dimensions The formal leadership of any organization must ensure that it minimizes the divergence between institutional aims and the actions of informal leaders When this separation occurs the result is sometimes mutiny These incidents of insubordination and noncompliance represent a form of dialogue between military personnel and their leadership The Insubordinate and the Noncompliant offers a perspective on the Canadian experience with military mutiny in the twentieth century in an effort to provide relevant lessons for today The Air War Through German Eyes Jonathan Trigg,2024-02-15 This is an important book on one of the most controversial campaigns of the Second World War When we came out above ground there was rubble everywhere asphalt on the roads had melted in the heat My only thought was to get out of this hellhole Ivar Corneliussen Waffen SS trooper **Bombing Germany: The Final Phase** Tony Redding,2015-02-28 During 1942 and 1943 the striking power of RAF Bomber Command was transformed by the arrival of heavy bombers advanced navigation and blind bombing systems and new tactics to concentrate the bombers over the target and swamp the German defences By October 1944 most of Germany s cities were in ruins yet the bombing continued to intensify reaching unprecedented levels in the final seven months of the air campaign The value of further area raids was questioned during the opening months of 1945 yet the Allies destroyed the remaining cities in a bid to hasten the end of the war The handful of German cities still largely unscathed in early February 1945 included Dresden which was obliterated on 13 February Ten days later the South German city of Pforzheim was destined to suffer the same fate This book commemorates the efforts of the aircrew members who risked their lives consolidating a host of intriguing first hand accounts It also considers Pforzheim as a representative community under National Socialist rule The city s survivors remember the horror of the raid and its aftermath including eventual occupation by French Colonial troops and subsequently American forces Tony does an admirable job of presenting historical context when considering actions in times of extreme trauma and his narrative offers an intriguing engaging and poignant evocation of the closing months of Bomber Command s war Training to Fly - Military Flight Training 1907-1945 Cameron, Rebecca Hancock,2018-09-30 Air Force book is an institutional history of flight training by the predecessor

organizations of the United States Air Force The U S Army purchased its first airplane built and successfully flown by Orville and Wilbur Wright in 1909 and placed both lighter and heavier than air aeronautics in the Division of Military Aeronautics of the Signal Corps As pilots and observers in the Air Service of the American Expeditionary Forces Americans flew combat missions in France during the Great War In the first postwar decade airmen achieved a measure of recognition with the establishment of the Air Corps and during World War II the Army Air Forces attained equal status with the Army Ground Forces During this first era of military aviation as described by Rebecca Cameron in *Training to Fly* the groundwork was laid for the independent United States Air Force Those were The Story of Modern Weapons and Warfare Will

Fowler, 2011-08-15 Presents a history of weapons and examines how they have evolved into the weapons used today

Among the Dead Cities A. C. Grayling, 2014-04-24 Is it ever right to target civilians in a time of war Or do the ends sometimes justify the means The twentieth century the age of total war marked the first time that civilian populations came to be seen as legitimate military targets At this policy's most terrible extreme came the dropping of the atomic bomb on Hiroshima and Nagasaki but it is an issue that remains relevant today with the needs of the War on Terror used to justify the use of drone strikes In *Among the Dead Cities* A C Grayling explores these moral issues in all their complexity with a detailed examination of the Allied bombing of German cities during World War 2 Considering the cases for and against the area bombing and the experiences of the bombed and the bombers Grayling asks was the targeting of civilians in Germany a crime Now available in the Bloomsbury Revelations series the book includes a new afterword by the author considering the issues in light of later conflicts up to the present day *Flying against Fate* S. P. MacKenzie, 2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in *Flying against Fate* a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II Mining a wealth of documents as well as a trove of published and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers' superstitions assumed from jinxes to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how

varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers Flying against Fate expands our understanding of a major aspect of the psychology of war in the air and of World War II *The Right of the Line* John Terraine, 2010-04-06 Award winning historian and scriptwriter John Terraine's *The Right of the Line* reveals how the British Royal Air Force rose to prominence in World War II Traditionally the right of the line is the vanguard the place of honor and greatest danger in battle In this history of the Royal Air Force during the European War of 1939-45 John Terraine shows how the RAF which in 1939 was small and inadequate for the task it was called upon to perform had by the end of the war taken up its proper position In riveting prose Terraine describes the build up to war the early tests in France and at Dunkirk the Battle of Britain the Battle of the Atlantic the RAF in North Africa and the Mediterranean the strategic air offensive over Germany and eventual victory in Europe His best book yet The Times John Terraine is a fine historian but he also believes that history should be exciting and readable The Listener
