Bonn And The Bomb German Politics And The Nuclear Option:

Bonn & the Bomb Matthias Küntzel, 1995 print on demand Seeking the Bomb Vipin Narang, 2022-01-11 The first systematic look at the different strategies that states employ in their pursuit of nuclear weapons Much of the work on nuclear proliferation has focused on why states pursue nuclear weapons The question of how states pursue nuclear weapons has received little attention Seeking the Bomb is the first book to analyze this topic by examining which strategies of nuclear proliferation are available to aspirants why aspirants select one strategy over another and how this matters to international politics Looking at a wide range of nations from India and Japan to the Soviet Union and North Korea to Iraq and Iran Vipin Narang develops an original typology of proliferation strategies hedging sprinting sheltered pursuit and hiding Each strategy of proliferation provides different opportunities for the development of nuclear weapons while at the same time presenting distinct vulnerabilities that can be exploited to prevent states from doing so Narang delves into the crucial implications these strategies have for nuclear proliferation and international security Hiders for example are especially disruptive since either they successfully attain nuclear weapons irrevocably altering the global power structure or they are discovered potentially triggering serious crises or war as external powers try to halt or reverse a previously clandestine nuclear weapons program As the international community confronts the next generation of potential nuclear proliferators Seeking the Bomb explores how global conflict and stability are shaped by the ruthlessly pragmatic ways states choose strategies of proliferation

Nuclear Latency and The Participation Puzzle: Constructing of the International Non-Proliferation Regime Leonardo Bandarra, 2024-10-31 Scholars and practitioners usually regard the nuclear non proliferation regime as composed of two categories of countries those with and those without nuclear weapons The latter are regarded as the core designers of that regime while the former have their prominence in shaping non proliferation institutions eclipsed or ignored This book proposes to go beyond that duality by focusing on a usually neglected group of states latent nuclear countries Those are the countries that possess advanced nuclear capabilities but no weapons This book shows that latent nuclear countries not only participate actively in non proliferation institutions but also promote the creation of new frameworks highlighting concerns and perspectives different from their nuclear weapon and nuclear free counterparts The author makes this argument through an intricate combination of quantitative and qualitative methods with an in depth analysis of Brazil and Germany as sources for case studies He makes the case to understand the nuclear non proliferation regime as an inclusive and refined approach that takes into consideration countries nuclear capabilities identities role conceptions and domestic structures **The War That Must Never Be Fought** George P. Shultz, James E. Goodby, 2015-08-01 This book discusses the nuclear dilemma from various countries points of view from Japan Korea the Middle East and others The final chapter proposes a new solution for the nonproliferation treaty review *Nuclear Politics* Alexandre Debs, Nuno P. Monteiro, 2017 A comprehensive theory of the causes of nuclear proliferation alongside an in depth analysis of sixteen historical cases of nuclear development

Negotiating the Nuclear Non-Proliferation Treaty Roland Popp, Liviu Horovitz, Andreas Wenger, 2016-10-04 This volume offers a critical historical assessment of the negotiation of the Treaty on the Non Proliferation of Nuclear Weapons NPT and of the origins of the nonproliferation regime The NPT has been signed by 190 states and was indefinitely extended in 1995 rendering it the most successful arms control treaty in history Nevertheless little is known about the motivations and strategic calculi of the various middle and small powers in regard to their ultimate decision to join the treaty despite its discriminatory nature While the NPT continues to be central to current nonproliferation efforts its underlying mechanisms remain under researched Based on newly declassified archival sources and using previously inaccessible evidence the contributions in this volume examine the underlying rationales of the specific positions taken by various states during the NPT negotiations Starting from a critical appraisal of our current knowledge of the genesis of the nonproliferation regime contributors from diverse national and disciplinary backgrounds focus on both European and non European states in order to enrich our understanding of how the global nuclear order came into being This book will be of much interest to students of nuclear proliferation Cold War history security studies and IR

Charter of the North Atlantic Treaty Organization Ian Shapiro, Adam Tooze, 2018-05-22 The most powerful military alliance in history NATO shaped the geopolitical contours of the Cold War and continues to structure the contemporary international system The NATO agreement is reprinted here with speeches and essential historical documents concerning the alliance s founding and subsequent evolution Accompanying essays by major scholars discuss debates about NATO s evolving governance its role in nuclear politics and its appropriate mission during and since the Cold War

The Nuclear Club Jonathan R. Hunt, 2022-11-29 The Nuclear Club reveals how a coalition of powerful and developing states embraced global governance in hopes of a bright and peaceful tomorrow While fears of nuclear war were ever present it was the perceived threat to their preeminence that drove Washington Moscow and London to throw their weight behind the 1963 Limited Test Ban Treaty LTBT banishing nuclear testing underground the 1967 Treaty of Tlatelolco banning atomic armaments from Latin America and the 1968 Nuclear Non Proliferation Treaty NPT forbidding more countries from joining the most exclusive club on Earth International society the Cold War and the imperial U S presidency were reformed from 1945 to 1970 when a global nuclear order was inaugurated averting conflict in the industrial North and yielding what George Orwell styled a peace that is no peace everywhere else Today the nuclear order legitimizes foreign intervention worldwide empowering the nuclear club and above all the United States to push sanctions and even preventive war against atomic outlaws all in humanity s name

Power Versus Prudence T. V. Paul, Teleglobe Raoul-Dandurand Chair of Strategic and Diplomatic Studies, Université du Québec à Montréal. Centre d'études des politiques étrangères et de sécurité, 2000 With the end of the Cold War nuclear non proliferation has emerged as a central issue in international security relations While most existing works on nuclear proliferation deal with the question of nuclear acquisition T V Paul explains why some states over 185 at present have decided to forswear nuclear weapons even when they

have the technological capability or potential capability to develop them and why some states already in possession of nuclear arms choose to dismantle them In *Power versus Prudence* Paul develops a prudential realist model arguing that a nation's national nuclear choices depend on specific regional security contexts the non great power states most likely to forgo nuclear weapons are those in zones of low and moderate conflict while nations likely to acquire such capability tend to be in zones of high conflict and engaged in protracted conflicts and enduring rivalries He demonstrates that the choice to forbear acquiring nuclear weapons is also a function of the extent of security interdependence that states experience with other states both allies and adversaries He applies the comparative case study method to pairs of states with similar characteristics Germany Japan Canada Australia Sweden Switzerland Argentina Brazil in addition to analysing the nuclear choices of South Africa Ukraine South Korea India Pakistan and Israel Paul concludes by questioning some of the prevailing supply side approaches to non proliferation offering an explication of the security variable and its linking of nuclear proliferation with protracted conflicts and enduring rivalries *Power versus Prudence* will be of interest to students of international relations policy makers policy analysts and the informed public concerned with the questions of nuclear weapons non proliferation and disarmament T V Paul is an associate professor in the Department of Political Science McGill University He has published several books and numerous articles on international security and the politics of nuclear weapons including *Asymmetric Conflicts War Initiation by Weaker Powers* *The Absolute Weapon Revisited* *Nuclear Arms and the Emerging International Order* and *International Order and the Future of World Politics* **Origins of National**

Kawasaki, Takeshi Sakade, Hubert Zimmermann, 2024-12-03 Kawasaki Sakade Zimmermann and their contributors examine the historical development of burden sharing among the United States US and its allies after World War II looking at examples from Western Europe and East Asia Through a series of case studies the contributors to this volume identify the characteristics and historical transformations in the burden sharing relationships between the US and its allies In addition to

diplomatic and security concerns they also look at the economic and financial dimensions of burden sharing and how all these elements are intertwined They also address the different dynamics of burden sharing between the US and Western Europe notably Germany and the United Kingdom UK on the one hand and between the US and East Asia particularly Japan and Korea on the other In particular they argue that while Western European countries provided most of the economic and political support for American policies until the 1960s the economic support from East Asian countries became much more important from the 1970s onwards This book is a valuable contribution to the literature on burden sharing and strategic alliance for scholars of international relations and the diplomatic history of the Cold War **Transforming NATO in the**
