*Early State Economics* Henri Claessen,Pieter van de Velde,2017-09-08 The central theme of this volume is the political economy of early state societies the ways in which the income of the central government of such systems was collected and spent The work contains descriptive as well as narrative and commemorative essays Contributions present data on early states as diverse as the Interlacustrine states of East Africa the Sudanic states of West Africa prehistoric Cahokia in the Mississippi Valley Aztec Mexico the Classical Maya eighteenth century Nepal and Polynesian Tahitian and Mayan case studies At the theoretical end of the spectrum the book offers a general discussion of the concept of political economy modes of production in antiquity and the editors themselves offer an overview of early state organizational forms With the data of the contributions to this volume such theoretical viewpoints are evaluated The conclusion is that inherited approaches fall far short of explaining the political economies of early states The editors of this volume maintain that much thinking on this issue of the early state is off base because it is confined to the study of redistribution They hold that a prestige goods system is probably as important while in some cases the key factor to look at is tribute or taxation Likewise the system of gift giving often viewed as ancillary should be considered central to the performance of the ancient states In short political economy is rooted in the stages of social growth Nearly all contributors agree that simple evolutionary generalizations can no longer be applied to specific cases without considerable modification and in this undertaking formalist and Marxist canons alike need to be invoked for a deeper understanding of the actual operations of the state in earlier societies      **From Quarry to**

**Cornfield** Charles Cobb,2000 *From Quarry to Cornfield* provides an innovative model for examining the technology of hoe production and its contribution to the agriculture of Mississippian communities Lithic specialist Charles Cobb examines the political economy in Mississippian communities through a case study of raw material procurement and hoe production and usage at the Mill Creek site on Dillow Ridge in southwest Illinois Cobb outlines the day to day activities in a Mississippian chiefdom village that flourished from about A D 1250 to 1500 In so doing he provides a fascinating window into the specialized tasks of a variety of day laborers whose contribution to the community rested on their production of stone hoes necessary in the task of feeding the village Overlooked in most previous studies the skills and creativity of the makers of the hoes used in village farming provide a basis for broader analysis of the technology of hoe use in Mississippian times Although Cobb s work focuses on Mill Creek his findings at this site are representative of the agricultural practices of Mississippian communities throughout the eastern United States The theoretical underpinnings of Cobb s study make a clear case for a reexamination of the accepted definition of chiefdom the mobilization of surplus labor and issues of power history and agency in Mississippian times In a well crafted piece of writing Cobb distinguishes himself as one of the leaders in the study of lithic technology *From Quarry to Cornfield* will find a well deserved place in the ongoing discussions of power and production in
