100 Cases for Medical Data Interpretation David Howlett, Nicola Gainsborough, 2013-01-22 Data interpretation questions based on clinical cases are a popular means of testing medical students both during undergraduate studies and as an element of finals examinations Written by a small team of authors with extensive teaching experience 100 Cases in Medical Data Interpretation provides invaluable guidance from lecturers who understand f *100 Cases in Acute Medicine* Kerry Layne, Henry Fok, Adam Nabeebaccus, 2012-06-29 A 32 year old Caucasian lady was admitted to hospital following a collapse at the gym Her friends described the patient falling to the floor while exercising on the rowing machine followed by twitching of her arms and legs and a period of being unrousable You are the medic on duty 100 Cases in Acute Medicine presents 100 acute conditions commonly seen by medical students and junior doctors in the emergency department or on the ward or in the community setting A succinct summary of the patient s history examination and initial investigations including photographs where relevant is followed by questions on the diagnosis and management of each case The answer includes a detailed discussion of each topic with further illustration where appropriate providing an essential revision aid as well as a practical guide for students and junior doctors Making clinical decisions and choosing the best course of action is one of the most challenging and difficult parts of training to become a doctor These cases will teach students and junior doctors to recognize important clinical symptoms and signs and to develop their diagnostic and management skills **Advances In Geosciences (A 4-volume Set) - Volume 6: Hydrological Science (Hs)** Namsik Park, 2007-07-09 Advances in Geosciences is the result of a concerted effort in bringing the latest results and planning activities related to earth and space science in Asia and the international arena The volume editors are all leading scientists in their research fields covering six sections Hydrological Science HS Planetary Science PS Solar Terrestrial ST Solid Earth SE Ocean Science OS and Atmospheric Science AS The main purpose is to highlight the scientific issues essential to the study of earthquakes tsunamis atmospheric dust storms climate change drought flood typhoons monsoons space weather and planetary exploration

Atlas of PET-CT Stefano Fanti, Mohsen Farsad, Luigi Mansi, Paolo Castellucci, 2019-02-06 This new atlas the fourth of a successful series is a completely revised and updated edition of a previously published FDG PET CT atlas In the past few years considerable progress has been made in the field of PET CT imaging and this new edition takes full account of these recent developments Furthermore its educational mission has been broadened beyond serving as a straightforward guide to FDG PET CT imaging it now encompasses the integrative use of contrast enhanced CT and MRI The new edition also includes non oncological indications for FDG PET CT The atlas aims to help imaging practitioners to recognize physiological and benign pathological FDG uptake and illustrates in a case based practical manner the PET CT appearances of all the major tumors and infectious inflammatory and neurodegenerative disorders The main clinical applications are covered and learning points and pitfalls are clearly articulated The consistent user friendly format facilitates image interpretation and allows rapid

review of key information needed for FDG PET CT imaging

Participation in EU Rule-making Joana Mendes, 2011-04-07

The limited scope of participation in the making of EU law remains a continued source of controversy featuring prominently in recent institutional and political developments that have been shaping the EU's constitutional framework most intensely in the follow up of the Commission's White Paper on Governance. Yet little attention has been paid to participation rights as a means of ensuring the procedural protection of persons affected by EU regulation in its diverse forms. This is a dimension of the rule of law that has been largely ignored by EU legislative and judicial bodies. Not only the legislator but also the Court of Justice and the Court of First Instance tend to adhere to excessively formal conceptions of participation rights that are premised on the right to be heard in individual procedures as well as to a restrictive view regarding the relationships between the citizens and the administration. This book shows why in the face of new regulatory developments these conceptions are currently inadequate to ensure the legal protection of rights and interests affected by EU regulation. Combining a conceptual analysis with thorough empirical scrutiny, this book assesses the scope of participation rights in EU law against their rationales and underlying legal values. It makes a case for the extension of participation rights to new situations and new types of procedures, in particular those that would generally fall within the category of rulemaking. It brings distinct normative insights into a crucial theme of EU administrative law and makes a topical and timely contribution to the increasingly notable theme of public participation in EU regulation. Joanna Mendes 2009 thesis upon which *Participation in EU Rule Making* is based was awarded the the European University Institute Florence Mauro Cappelletti Prize for the best doctoral thesis using a methodology of comparative law. *Deference in International Courts and Tribunals* Lukasz Gruszczynski, Wouter G. Werner, 2014. International courts use two key methodologies to determine the degree of deference granted to states in their implementation of international obligations: the standard of review and margin of appreciation. This book investigates how these doctrines are applied in international courts, analysing where their approaches converge and diverge. **Efficiency of heat and work in a regional energy system** Tommy

Rosén, 2019-12-11. One of the largest flows of energy in Swedish municipalities is the fuel energy flow through the regional combined heat and power (CHP) plant. The customer products from this flow are mainly electricity to the electricity grid and heat to the building sector. There are many ways to describe and examine this fuel energy flow and there are many perspectives. This thesis presents one perspective. It is a top-down analytical and numerical perspective on the efficiency of heat and work in a regional energy system. The analysis focuses on the present situation in Linköping municipality and aims at describing the energy efficiency improvement potential. Three subsystems are considered: the regional production of electricity, the regional production of heat, and the regional public transport by bus. These three systems are physically all heat engines, i.e. engines that derive work and/or heat from fuel combustion processes. It is important to notice that the analysis in this thesis does not describe the theoretical improvement potential; that potential is considerably higher than the

implementable potential but of no practical use. Instead the analysis is as far as possible based on real world measured efficiencies and efficiency values of best practice. Best available technology. The analysis shows that hardware investments at the CHP plant can improve the electricity generation efficiency and thereby reduce CO₂ emissions. The investments are in high pressure turbines, medium pressure turbines and preheaters. The size of the improvement is hard to quantify because it depends partly on unknown factors in the surrounding electricity market. In the studied system CO₂ reduction could be as high as 40-60 %. The regionally produced biogas would be used more efficiently if it were used in the local combined cycle gas turbine instead of being used in internal combustion engines in buses. The buses would instead be electrically driven. This use of biogas would create a better integrated fuel energy flow and reduce heat losses. Another improvement is to reduce the system temperatures in the district heating system. The study shows that the efficiency gains because of lower system temperatures would increase electricity production by about 1-3% and that greenhouse gas emissions would be reduced by 4-20%. However these improvements are dependent on demand side investments in the district heating system and are therefore slow to implement.

Ett av de största energiflödena i svenska kommuner är för närvarande energi från det regionala kraftverket. De konsumentprodukter som detta energiflöde producerar är främst uppvärmning av bostäder och elkraft. Det finns många sätt att beskriva och utvärdera detta för närvarande energiflöde och det finns många olika perspektiv. Detta arbete analyserar energiflödet med en analytisk top-down metod. Analysen utgår ifrån den nuvarande situationen i Linköpings kommun och avser att belysa den förbränningspotential som finns med avseende på systemets verkningsgrad. Tre delsystem har studerats: det regionala systemet för värmeproduktion, det regionala systemet för elproduktion och det regionala kollektivtrafiksystemet för innerstadstrafik med buss. Dessa tre system är fysikaliskt värmemotorer i de respektive system som nyttjar termisk energi från förbränningsprocesser för att utföra ett arbete och/eller generera värme. Det är viktigt att notera att analyserna i detta arbete inte avser att beskriva en teoretisk förbränningspotential. Analyserna avser istället att belysa den praktiska implementerbara förbränningspotentialen. Därför har arbetet så långt som möjligt utgått ifrån uppmätta data och numeriska värden på verkningsgrader ifrån redan existerande anläggningar eller tekniska komponenter. Analyserna visar att hushållsinvesteringar i det lokala kraftverket skulle öka elproduktionen och därigenom sänka koldioxidutsläppen. De investeringar som skulle behövas för gas- och ångturbiner mellan ångturbiner och förvärmare. De sänkta koldioxidutsläppen är svåra att kvantifiera eftersom de delvis beror på olika faktorer på den omgivande elmarknaden. Reduktionen av koldioxidutsläppen skulle kunna vara så stor som 40-60 %. Den lokalt producerade biogasen skulle användas mer effektivt om den användes i den lokala gaskombi-anläggningen istället för att användas som bussförbränslor som är det nuvarande användningsområdet för detta för närvarande. Bussarna skulle istället kunna ersättas med elbussar. En sådan förändring av biogas användningen skulle innebära ett bättre integrerat energisystem med lågre värmefluster. En annan möjlig förbättring av kraftverksystemet är att sänka returtemperaturerna i fjärrvärmesystemet. Analyserna visar att elverkningsgraden skulle förbättras 1-3 % och att koldioxidutslä

ppen skulle kunna minska med 4 20 % Dessa f rb ttringar skulle d remot kr va investeringar p kraftv rmesystemets kundsida och bed ms d rf r vara l ngsamma att implementera *Export-Import Theory, Practices, and Procedures* Belay Seyoum,2008-10-15 *Export Import Theory Practices and Procedures* is the first book on the market to truly serve the needs of the academic professional audience going beyond the usual soft coverage of international trade operations Discussing theoretical issues in depth such as the role of exports imports in the global economy and pertinent regulatory and policy issues this innovative text offers comprehensive explorations of import processes as well as export activities and incorporates the most relevant and current research information in these areas New to this edition are important discussions of trends in regional integration agreements international transfer pricing terms of sale US export regulations export financing programs and more Expanded coverage in this edition of topics such as taxation of international trade operations export counseling export channels of distribution export sales contracts transportation import procedures and techniques and more Other topics include Exploration of trade agreements such as the GATT WTO NAFTA and the European Economic Community EEC and how they affect trade In depth treatment of investment and intellectual property policies rules on government procurements safeguard and services of NAFTA Documentation risks and different forms of insurance as well as assessing the risks of foreign trade Price setting in international trade export sales contracts exchange rates methods of payment for exporting and importing goods the benefits and theories of countertrade the entry process for imports and import relief to domestic industry *Export Import Theory Practices and Procedures Second Edition* combines an innovative conceptual and theoretical approach a deep and broad analytical treatment and an engaging and accessible presentation style to offer one of the most useful textbooks on the market for students and practitioners alike Further instructors materials can be accessed via www.nova.edu/seyoum *Controversies in Innocence Cases in America* Ms Sarah Lucy Cooper,2014-05-28 This volume brings together leading experts on the investigation litigation and scholarly analysis of innocence cases in America from legal political and ethical perspectives The contributors consider the challenges faced by the exoneration movement causes of wrongful convictions problems associated with investigating proving and defining innocence and theories of reform These issues are investigated from a multi disciplinary perspective and with the aim of improving the American criminal justice system when it is faced with its most harrowing sight an innocent defendant **Intelligent Data Analytics for Power and Energy Systems** Hasmat Malik,Md. Waseem Ahmad,D.P. Kothari,2022-02-17 This book brings together state of the art advances in intelligent data analytics as driver of the future evolution of PaE systems In the modern power and energy PaE domain the increasing penetration of renewable energy sources RES and the consequent empowerment of consumers as a central and active solution to deal with the generation and development variability are driving the PaE system towards a historic paradigm shift The small scale diversity and especially the number of new players involved in the PaE system potentiate a significant growth of generated data Moreover advances in communication between IoT devices and M2M

machine to machine man to machine etc and digitalization hugely increased the volume of data that results from PaE components installations and systems operation This data is becoming more and more important for PaE systems operation maintenance planning and scheduling with relevant impact on all involved entities from producers consumer s and aggregators to market and system operators However although the PaE community is fully aware of the intrinsic value of those data the methods to deal with it still necessitate substantial enhancements development and research Intelligent data analytics is thereby playing a fundamental role in this domain by enabling stakeholders to expand their decision making method and achieve the awareness on the PaE environment The editors also included demonstrated codes for presented problems for better understanding for beginners

Reform and Development of Powers and Functions of China's Criminal Proceedings Weidong Chen,2020-10-15 This book addresses the basic theory of criminal procedure in China

together with recent reforms Balancing the powers of public security and judicial organs with the rights of individual citizens it assesses the nature of Chinese criminal proceedings In the basic theoretical research section the author drawing on the latest findings from the legal community systematically and comprehensively presents the current trends main research topics and the main problems that should be explored in future research into criminal procedure law in China further the author explains the basic thinking behind the revision of criminal procedure law and the allocation of judicial resources in criminal procedure and criminal justice The policy basic theory and operation problems of judicial power procuratorial power police power defense power and judicial reform are subsequently explained and evaluated The general writing style used is intentionally straightforward making the book easily accessible for the readers Based on the author s substantial working experience in the area of criminal law it offers a highly intuitive reading experience

The Court of Justice of the European Union Kate Shaw,2018-03-20 In the Court of Justice of the European Union Subsidiarity and Proportionality Kate Shaw sets out how a subsidiarity and proportionality review applied to competences could be anchored by the Court of Justice when balancing the competing interests in cases concerning the residency rights of EU citizens The book also considers the extent to which a court which is dedicated to enhancing the European project is really able to be an independent arbiter between the EU and the Member States in this context Both the legal reasoning of the Court and the controversial nature of residency rights of EU citizens are legally and politically very topical at the moment and of interest to legal academics and law students

The Diversification and Fragmentation of International Criminal Law Larissa van den Herik,Carsten Stahn,2012-10-23 This volume is the first in a new series of Studies on the Frontiers of International Law The term frontier is traditionally associated with proximity to a boundary or a demarcation line But it is also a connecting point i e a passage or channel between spaces that are usually considered as separate entities The Series aims to explore the visible and imaginary boundaries of scholarship in

International Law It is designed to test the existing table of contents vocabulary and limits of Public International Law to investigate lines and linkages between centre and periphery and to re map or re think some of its conceptual boundaries The current volume is written in this spirit It deals with the tension between unity and diversification which has gained a central place in the debate under the label of fragmentation It explores the meaning articulation and risks of this phenomenon in a specific area International Criminal Justice It brings together established and fresh voices who analyse different sites and contestations of this concept as well as its context and specific manifestations in the interpretation and application of International Criminal Law The volume thereby connects discourse on fragmentation with broader inquiry on the merits and discontents of legal pluralism in Public International Law Emerging Trends in Intelligent and Interactive Systems and Applications Madjid Tavarna, Nadia Nedjah, Reda Alhajj, 2020-12-17 This book reports on the proceeding of the 5th International Conference on Intelligent Interactive Systems and Applications IISA 2020 held in Shanghai China on September 25 27 2020 The IISA proceedings with the latest scientific findings and methods for solving intriguing problems are a reference for state of the art works on intelligent and interactive systems This book covers nine interesting and current topics on different systems orientations including Analytical Systems Database Management Systems Electronics Systems Energy Systems Intelligent Systems Network Systems Optimization Systems and Pattern Recognition Systems and Applications The chapters included in this book cover significant recent developments in the field both in terms of theoretical foundations and their practical application An important characteristic of the works included here is the novelty of the solution approaches to the most interesting applications of intelligent and interactive systems Applied Public Relations Kathy Brittain Richardson, Marcie Hinton, 2015-03-27 With its practical orientation and scope Applied Public Relations is the ideal text for any public relations case studies or public relations management course that places an emphasis on stakeholder groups Through the presentation of current cases covering a wide variety of industries locations and settings Kathy Richardson and Marcie Hinton examine how real organizations develop and maintain their relationships offering valuable insights into business and organizational management practices The book s organization of case studies allows instructors to use the text in several ways instructors can focus on specific stakeholders by using the chapters presented they can focus on particular issues such as labor relations or crisis management by selecting cases from within several chapters or they can select cases that contrast campaigns with ongoing programs or managerial behaviors A focus on ethics and social responsibility underlies the book and students are challenged to assess the effectiveness of the practices outlined and understand the ethical implications of those choices This Third Edition features 25 new and current domestic and international case studies specifically chosen for their relevancy and relatability to students New Professional Insights commentaries where practitioners respond to a set of questions relating to their work Increased emphasis on ethics and social responsibility Fully enhanced companion website that is connected with the text including a test bank and PowerPoint
