they are hidden from us In *Integral Economics* Ronnie Lessem and Alexander Schieffer pave the way for a sustainable
approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the
most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises
nor wider society will be transformed for the better without a new economic perspective Here they introduce a
comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier
works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative
approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent
economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation
to this lack of choice are not so much the financial community and governments though they do have much to answer but the
schools of economics and the business schools that have created the very social ethos the philosophical principles and the
mathematical models that influence events *Integral Economics* is partly addressed to academics and students in those very
schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses
