Markham, 2023-07-07 Institutions are very precious If any idea is going to persist into the future then it needs an institution to keep it going Each of us comes to understand often only gradually over the decades how some influences from our earlier life have affected us Some will have been inspiring Some will have given us direct models of how to behave or how not to behave Indeed it is often the case that the deeper an influence turns out to have been in the long run the less likely it is that we noticed it at the time it was happening For this reason it has become necessary to find the time to reflect on and express gratitude for the institutions that helped form who we are and the work that we do This collection of essays explores the impact of one institution on twenty five participants twenty five years after we worked together The Institution was Liverpool Hope University College and is now Liverpool Hope University By telling and reflecting on our stories we aim to encourage others to think about their own experiences and ultimately our earnest hope is that a greater awareness of this aspect of university life will help to transform our collective understanding of the nature of universities in particular and of communities institutions or societies in general But there was something special about belonging to a community called Hope *Engaging a Community of Hope* Kelsey L. Austin-Wright, Nathan R. Patzke, 2025-04-29 On

Gallagher, Shane J. Lopez, 2017-11-01 The scientific study of hope has flourished in the past twenty years since C. R. Snyder first proposed a model of hope that defined it as a positive motivational state that is based on an interactively derived sense of successful 1) goal-directed energy, agency, and 2) planning to meet goals/pathways. Hope has long been a topic of interest for philosophers, psychologists, educators, and physicians, and in the past few decades, researchers from various disciplines and from around the world have studied how hope relates to superior academic performance, improved outcomes in the workplace, and improved psychological and physical health in individuals of all ages. The Oxford Handbook of Hope will provide a comprehensive update on the past 25 years of hope research while simultaneously providing an outline of what leading hope researchers believe the future of hope research to be. The Handbook will be targeted towards researchers, professors, and advanced students interested in learning about current status and future directions of the science of hope. It will provide a comprehensive overview of the science of hope and will also be able to serve as a textbook for advanced seminars for undergraduates and graduate students interested in one of the most robust areas of positive psychology research. **Detroit School Reform in Comparative Contexts** Edward St. John, Feven Girmay, 2019-07-08 This book critically examines how the narrative of global economic competition was used to rationalize college preparatory curriculum for all high school students and promote charter schools in Detroit. Using mixed qualitative and quantitative methods, the study identifies neighborhood risk factors undermining students' academic success along with the positive effects of churches and service centers as mitigating forces. The authors focus on a range of topics and issues including market competition, urban decline, community resources, testing and accountability, smaller schools, and engaged learning. The volume illustrates how action studies by engaged scholars working with community activists empower students to overcome emerging barriers. **Creating Safe**
