Laudan tells the remarkable story of the rise and fall of the world's great cuisines from the mastery of grain cooking some twenty thousand years ago to the present in this superbly researched book Probing beneath the apparent confusion of dozens of cuisines to reveal the underlying simplicity of the culinary family tree she shows how periodic seismic shifts in culinary philosophy beliefs about health the economy politics society and the gods prompted the construction of new cuisines a handful of which chosen as the cuisines of empires came to dominate the globe Cuisine and Empire shows how merchants missionaries and the military took cuisines over mountains oceans deserts and across political frontiers Laudan's innovative narrative treats cuisine like language clothing or architecture as something constructed by humans By emphasizing how cooking turns farm products into food and by taking the globe rather than the nation as the stage she challenges the agrarian romantic and nationalistic myths that underlie the contemporary food movement
