Of Revelations A Commentary Paperback By Aivanhov Omraam Mikhael:

The Book of Revelation Omraam Mikhaël Aïvanhov, 2015-05-29 A great many scholars have given us their interpretation of The Revelation to John but to my mind not one of them has ever understood what it is really and truly about Why is this There are several different reasons but the main reason is that they have failed to recognize its essential message as a description of the elements and processes that are common to our own inner life and the life of the cosmos They have been more concerned with trying to identify the historical characters countries and events portrayed in it As a result a lot of nonsense has been written about the four horsemen the beast with seven heads and ten horns the woman with the crown of stars the great whore and the new Jerusalem I too have interpreted some passages from The Revelation for you but you must realize that what I have told you cannot be of any benefit to you if you have never worked or made an effort to acquire the true foundations of the spiritual life For it is not enough to understand all these symbols intellectually you have to be able to make them come alive within you As long as this preliminary work of purification self control and inner ascent has not been carried out the marvels of The Revelation will remain a closed book to you Omraam Mikhaël Aïvanhov *Small Press Record of Books in Print* Len Fulton, 1994 [International Books in Print](#), 1997 **The Science of Spirituality** Lee Bladon, 2007 The Science of Spirituality is a ground breaking book that integrates the individual systems of science psychology philosophy spirituality and religion into a unified system that describes the multi dimensional nature of man and the universe It provides a more comprehensive description of reality than conventional science can offer and fully explains the mechanisms behind an array of paranormal phenomena that mainstream science chooses to ignore It explains the science behind religious spiritual and new age belief systems and sheds light on some common misconceptions The Science of Spirituality systematically describes the mechanisms behind a diverse range of subject matter including consciousness sleep and dreams reincarnation religion creation evolution space and time higher dimensions heaven and hell ghosts angels and demons out of body experiences near death experiences clairvoyance psychic abilities personal development meditation and the meaning of life
