Program United States. Congress. House. Committee on Ways and Means, 2003 *Power Switch* G. Bruce Doern, Monica Gattinger, 2003-01-01 In the energy sector of Canadian economic and political life power has a double meaning It is quintessentially about the generation of power and physical energy However it is also about political power the energy of the economy and thus the overall governance of Canada Power Switch offers a critical examination of the changing nature of energy regulatory governance with a particular focus on Canada in the larger contexts of the George W Bush administration s aggressive energy policies and within North American energy markets Focusing on the key institutions and complex regimes of regulation Bruce Doern and Monica Gattinger look at specific regulatory bodies such as the National Energy Board the Alberta Energy and Utilities Board and the Ontario Energy Board They also examine the complex systems of rule

making that develop as traditional energy regulation interacts and often collides with environmental and climate change regulation such as the Kyoto Protocol on reducing greenhouse gas emissions Power Switch is one of the first accounts in many years of Canada's overall energy regulatory system *Why Canada Cares* Andrew Lui, 2012 Debunking common myths about Canada's international human rights policies *Constitutionalizing Economic Globalization* David Schneiderman, 2008-03-27 Are foreign investors the privileged citizens of a new constitutional order that guarantees rates of return on investment interests Schneiderman explores the linkages between a new investment rules regime and state constitutions between a constitution like regime for the protection of foreign investment and the constitutional projects of national states The investment rules regime as in classical accounts of constitutionalism considers democratically authorized state action as inherently suspect Despite the myriad purposes served by constitutionalism the investment rules regime aims solely to enforce limits both inside and outside of national constitutional systems beyond which citizen driven politics will be disabled Drawing on contemporary and historical case studies the author argues that any transnational regime should encourage innovation experimentation and the capacity to imagine alternative futures for managing the relationship between politics and markets These objectives have been best accomplished via democratic institutions operating at national sub national and local levels **Accounting for Culture** Caroline Andrew, 2005-03-30 Many scholars practitioners and policy makers in the cultural sector argue that Canadian cultural policy is at a crossroads that the environment for cultural policy making has evolved substantially and that traditional rationales for state intervention no longer apply The concept of cultural citizenship is a relative newcomer to the cultural policy landscape and offers a potentially compelling alternative rationale for government intervention in the cultural sector Likewise the articulation and use of cultural indicators and of governance concepts are also new arrivals emerging as potentially powerful tools for policy and program development *Accounting for Culture* is a unique collection of essays from leading Canadian and international scholars that critically examines cultural citizenship cultural indicators and governance in the context of evolving cultural practices and cultural policy making It will be of great interest to scholars of cultural policy communications cultural studies and public administration alike

AgExporter, 2003 *Handbook of Regional and Urban Economics* V. Henderson, J.F. Thisse, 2004-07-21 The new *Handbook of Regional and Urban Economics* Cities and Geography reviews synthesizes and extends the key developments in urban and regional economics and their strong connection to other recent developments in modern economics Of particular interest is the development of the new economic geography and its incorporation along with innovations in industrial organization endogenous growth network theory and applied econometrics into urban and regional economics The chapters cover theoretical developments concerning the forces of agglomeration the nature of neighborhoods and human capital externalities the foundations of systems of cities the development of local political institutions regional agglomerations and regional growth Such massive progress in understanding the theory behind urban and regional phenomenon is consistent

with on going progress in the field since the late 1960 s What is unprecedented are the developments on the empirical side the development of a wide body of knowledge concerning the nature of urban externalities city size distributions urban sprawl urban and regional trade and regional convergence as well as a body of knowledge on specific regions of the world Europe Asia and North America both current and historical The Handbook is a key reference piece for anyone wishing to understand the developments in the field

Trade and Climate Change Ludivine Tamiotti, United Nations Environment Programme, 2009 This report aims to improve understanding about the linkages between trade and climate change It shows that trade intersects with climate change in a multitude of ways For example governments may introduce a variety of policies such as regulatory measures and economic incentives to address climate change This complex web of measures may have an impact on international trade and the multilateral trading system

Looking West Loleen Berdahl, Roger Gibbins, 2014-02-25 Although a history of protest politics has done so much to define western Canada and to place it outside the Canadian mainstream the aspirations and frustrations that animated western discontent over the years have been replaced by a new reality the West is in and many of the levers of national economic and political power rest in western Canadian hands The protest tradition has yielded a dynamic region that leads rather than reacts to national economic social and political change The westward shift of the Canadian economy and demography is likely to be an enduring structural change that reflects and is reinforced by the transformation of the continental and global economies At the same time western Canada faces major challenges including finding a place for a sustainable resource economy in a rapidly changing global environment establishing a full and modern partnership with Aboriginal peoples and creating urban environments that will attract and retain human capital None of these challenges are unique to the West but they all play out with great force and great immediacy in western Canada

Governing under Stress Marjorie Griffin Cohen, Stephen Clarkson, 2008-02-29 This volume is the first work to emerge from a major international comparative research project exploring the political economy of globalization This inter disciplinary team of scholars is focusing on the semi periphery of world power Whether defined in social cultural economic or simply spatial terms semi peripheral countries share two qualities they are conscious of their subordination to the hegemonic powers at the centre of the global system the United States and the European Union they are also strong enough to have some ability to resist their domination The structural position of these middle powers in global capitalism is unlike those countries at the centre that do not experience domination and different from those Third World countries on the periphery that have no means to achieve more cultural and political autonomy more distinctive and diversified development or greater social equity and better income redistribution Four countries in North America Central America Europe and the Antipodes namely Canada Mexico Norway and Australia have been selected in order to explore the complexities of globalization from the perspective of the semi periphery Opening chapters examine the international institutions including the North America Free Trade Agreement the World Trade Organization and the European Union which

now amount to a quasi constitutional conditioning framework for middle powers under globalization In the second part contributors detail the pressures with which these countries have to cope and consider their ability to pursue policies appropriate to the needs and democratically defined goals of each And in the concluding part after discussing the new economic political and social issues of governing under stress they appraise the possibilities for middle powers to chart distinctive national courses in the face of globalization s constraining challenge Borderlands Emmanuel

Brunet-Jailly,2007-05-05 Border security has been high on public policy agendas in Europe and North America since the September 11 2001 attacks on the World Trade Centre in New York City and on the headquarters of the American military in Washington DC Governments are now confronted with managing secure borders a policy objective that in this era of increased free trade and globalization must compete with intense cross border flows of people and goods Border security policies must enable security personnel to identify or filter out dangerous individuals and substances from among the millions of travelers and tons of goods that cross borders daily particularly in large cross border urban regions This book addresses this gap between security needs and an understanding of borders and borderlands Specifically the chapters in this volume ask policy makers to recognize that two fundamental elements define borders and borderlands first human activities the agency and agent power of individual ties and forces spanning a border and second the broader social processes that frame individual action such as market forces government activities law regulations and policies and the regional culture and politics of a borderland Borders emerge as the historically and geographically variable expression of human ties exercised within social structures of varying force and influence and it is the interplay and interdependence between people s incentives to act and the surrounding structures i e constructed social processes that contain and constrain individual action that determine the effectiveness of border security policies This book argues that the nature of borders is to be porous which is a problem for security policy makers It shows that when for economic cultural or political reasons human activities increase across a border and borderland governments need to increase cooperation and collaboration with regard to security policies if only to avoid implementing mismatched security policies Published in English *Agricultural Outlook* ,2002

Saskatchewan's Communities in the 21st Century Jack C. Stabler, Margaret Rose Olfert, University of Regina. Canadian Plains Research Center, 2002 This report traces the evolution of Saskatchewan's trade centre system for the 40 years between 1961-2001 For assessing classifying communities into functional categories 68 variables are used In assessing a community's status future prospects the systematic trade centre relationships the demand thresholds required to support trade service activities and the impact of non systematic events such as the establishment of a manufacturing plant or mine are taken into account The relationship between infrastructure economic development is also discussed The events summarized emphasize a continuous extension of the geographic framework within which people journey to work shop attend school obtain health care and in general live their everyday lives In this process the concept of community as a functional entity has evolved from village or town to a region large enough to satisfy the everyday requirements of rural dwellers

Playing the Identity Card Colin J Bennett, David Lyon, 2013-01-11 National identity cards are in the news While paper ID documents have been used in some countries for a long time today's rapid growth features high tech IDs with built in biometrics and RFID chips Both long term trends towards e Government and the more recent responses to 9/11 have prompted the quest for more stable identity systems Commercial pressures mix with security rationales to catalyze ID development aimed at accuracy efficiency and speed New ID systems also depend on computerized national registries Many questions are raised about new IDs but they are often limited by focusing on the cards themselves or on privacy Playing the Identity Card shows not only the benefits of how the state can see citizens better using these instruments but also the challenges this raises for civil liberties and human rights ID cards are part of a broader trend towards intensified surveillance and as such are understood very differently according to the history and cultures of the countries concerned

Military Workfare Deborah Cowen, 2008-04-19 Despite the centrality of war in social and political thought the military remains marginal in academic and public conceptions of citizenship and the soldier seems to be thought of as a peripheral or even exceptional player Military Workfare draws on five decades of restricted archival material and critical theories on war and politics to examine how a military model of work discipline domestic space and the social self has redefined citizenship in the wake of the Second World War It is also a study of the complex often concealed ways in which organized violence continues

to shape national belonging What does the military have to do with welfare Could war work be at the centre of social rights in both historic and contemporary contexts Deborah Cowen undertakes such important questions with the citizenship of the soldier front and centre in the debate Connecting global geopolitics to intimate struggles over entitlement and identity at home she challenges our assumptions about the national geographies of citizenship proposing that the soldier has in fact long been the model citizen of the social state Paying particular attention to the rise of neoliberalism and the emergence of civilian warfare *Military Warfare* looks to the institution of the military to unsettle established ideas about the past and raise new questions about our collective future 2003 Trade policy agenda and 2002 Annual report on the trade agreements program , **Minerals Yearbook** ,2001 *Bomb Canada* Chantal Allan,2009 Informative thought provoking and at times hilarious this book examines how the American media have portrayed Canada from Confederation to the Obama inauguration
