Benson, 2015-06-18 By the spring of 1970 Americans were frustrated by continuing war in Vietnam and turmoil in the inner cities Students on American college campuses opposed the war in growing numbers and joined with other citizens in ever larger public demonstrations against the war Some politicians including Ronald Reagan Spiro Agnew and Richard Nixon exploited the situation to cultivate anger against students At the

University of California at Berkeley student leaders devoted themselves along with many sympathetic faculty to studying the war and working for peace A group of art students designed produced and freely distributed thousands of antiwar posters Posters for Peace tells the story of those posters bringing to life their rhetorical iconography and restoring them to their place in the history of poster art and political street art The posters are vivid simple direct ironic and often graphically beautiful Thomas Benson shows that the student posters from Berkeley appealed to core patriotic values and to the legitimacy of democratic deliberation in a democracy even in a time of war Exhibition of Posters Pennsylvania Academy of the Fine Arts,1896 *Scientist's Guide to Poster Presentations* Peter J. Gosling,2012-12-06 Scientific information is increasingly being communicated at both national and international scientific conferences in the form of poster presentations A recent international conference for example which involved nearly 500 delegates from over 50 different countries included information presented in 331 posters Recent experience has shown however that the presentational standard of such posters even at the international level varies immensely Individuals presenting well designed eye catching and engaging posters are at a distinct advantage in promoting their scientific information In doing so they also promote themselves as credible scientists as well as promoting the reputation of their establishments and countries of origin However producing a poster of high quality requires considerable planning and the acquisition of specific presentational skills This book provides detailed practical guidance on all aspects of presenting scientific information in the form of posters It is assumed that the presenter has access either at home at work or through libraries to a computer or word processor a color printer and photocopiers The book is intended to help scientists to gain poster presentational skills in a manner that enables adoption of an individualistic style of presenting information in a credible fashion The book has relevance internationally and is primarily targeted at research workers including postgraduate students and all scientific professionals who are required to present visual communication of scientific information Use of the RE-AIM Framework: Translating Research to Practice with Novel Applications and Emerging Directions Russell E.
