Reincarnation. The cycle of birth, death and rebirth in Hinduism Yevgeniya Marmer,2020-09-07 Seminar paper from the year 2013 in the subject Theology Hinduism grade 2 1 University of Hildesheim language English abstract The following paper will deal with the concept of the cycle of birth death and rebirth in the Hindu religion as Hindus in contrary to the Western cultures and monotheistic religions believe that there is life after death and before the present life there was a beforelife because they believe that it does not make sense that people suddenly appear from nowhere meaning not the biological body but the soul or the spirit First a definition of the different concepts of afterlife in different metaphysical models and of the term reincarnation from its semantic point of view and how it is defined in other religions will be given Furthermore Hinduism itself will be introduced as it is important to understand the essence of this religion to be able to understand the concept of reincarnation Additionally the concept of reincarnation will be described That includes the processes of birth death and rebirth Finally the arguments in favor and against the theory of reincarnation will be discussed The question about what happens after death is a philosophical one which has been worrying humanity for centuries By trying to categorize the different concepts regarding what happens after death three concepts varying among cultures and religions can be differentiated First there is the concept of denial which states that the existence of the individual ends with their death as it is widely believed in the Western world The second one is the concept of completion in many religions as for example in Christianity the human life is seen as a preparation for a life after somewhere else in a different state of existence like Heaven Hell Purgatory Limbus etc And the third concept is the concept of rebirth meaning that the mental part of the person may it be called the soul or the spirit is reborn many times in new bodies on earth

The Geologic Model of Religion Andrew Clifford, 2012-07-17 Men are haunted by the vastness of eternity The opening line of the film Troy captures the tragic essence of personal mortality ones passing into oblivion and fading from all memory Since the prehistoric dawn of humanity death has shadowed everyone's footsteps Even into the current scientific era religion has long been the only defense The sole comfort against oblivion offering a promise of new life or even immortality The Geologic Model of Religion is a sympathetic study of this defense from its ancient beginnings drawing upon archaeology anthropology and comparative religion to clearly explain one of the most complex subjects known From the study a new model emerges which Decomposes religion into its distinct worldview and afterlife paradigms Categorizes evidence of belief systems held by prehistoric hunter gatherers culminating in the Temples of Rebirth such as Gobekli Tepe Concludes that spirituality began in the Fertile Crescent 11 000 years ago spreading with the Neolithic revolution throughout the world Shows why judgment in afterlife was the keystone in the emerging edifice of civilization and how it enabled hierarchies overcoming Dunbar's number which limited village sizes Overviews the interaction between science and religion and projects the ultimate fate of religion itself There might be 100 000 books written about religion but the Geologic Model of Religion is unlike any other Drawing upon evidence from anthropology archaeology and scripture religion is divided into worldviews and afterlife paradigms This new model evidences several long lost prehistoric religious belief systems and explains the origin of spirituality in settled societies
