friendly attractive and can be designed to match the builder's personal space needs, aesthetics and budget. Despite mushrooming interest in the technique, however, most straw bale books focus on selling the dream of straw bale building but don't adequately address the most critical issues faced by bale house builders. Moreover, since many developments in this field are recent, few books are completely up to date with the latest techniques. *More Straw Bale Building* is designed to fill this gap. A completely rewritten edition of the 20,000 copy best-selling original, it leads the potential builder through the entire process of building a bale structure, tackling all the practical issues: finding and choosing bales, developing sound building plans, roofing, electrical, plumbing and heating systems, building code compliance and special concerns for builders in northern climates. New material includes more extensive sections on electric wiring and plumbing, updated sections on bale finishes and finishing, a section on prefabricated straw bale walls, a wider selection of case studies, photographs and illustrations, a section on common mistakes, budgeting for low, medium and high cost projects, and new testing data that is in no other straw bale book. *Down to Earth and Complete More Straw Bale Building* makes the remarkable benefits of straw bale building available in the most comprehensive and practical book on the subject to date. **Preservation**, 2000 *Canadian Books in Print* 2002 Marian Butler, 2002-02 *Canadian Books in Print. Author and Title Index*, 1975 [Building Systems](#), 2000-03 Building Systems Magazine BSM is an award-winning United States-based trade magazine read by builders, developers and general contractors using or considering using innovative construction technologies. Once commonly known as pre-fab, today's modern building systems employ innovative materials and techniques to create residential or commercial structures in a factory setting in a fraction of the time it takes to site-build. BSM focuses mainly on log, timber frame, modular panel and structural insulated panel building technologies. Since factory fabrication and site preparation take place simultaneously, structures are finished and ready for occupancy in weeks rather than months or years as required by conventional site building schedules. **Access**, 2000 *Canadian Books in Print* Marian Butler, 2000 **The Cumulative Book Index**, 1998 A world list of books in the English language **Subject Guide to Books in Print**, 1971 **Books In Print 2004-2005** Ed Bowker, Staff, Staff Bowker, Ed, 2004 **Timber Frame Construction** Jack A.
