Craft as a Creative Industry Karen Patel, 2024-04-01 Craft is resurgent More people are buying craft more money is being spent on craft products than ever before This book centres craft as a creative industry illuminating the experiences of those working in and around craft particularly people from marginalised groups Shining a light on inequalities around craft work the author examines the lived experiences of women makers of colour in the professional craft sector Experiences of racism and microaggressions at all stages of their craft career are analysed The author draws on innovative empirical research carried out in the UK and Australia two countries where the resurgence in craft is apparent yet professional craft practice is dominated by the white and relatively privileged In interrogating hierarchies of expertise and cultural value in craft the author employs case studies from community crafts and social enterprises The result is a book of interest to scholars at the intersections of the creative and cultural industries the creative economy and inequalities at work

Keepers of the Gate: Defenders of the Free World Adrian P. Stubbs, 2011-08-02 Keepers of the Gate What began as a grand experiment to form a multi national counter terrorist special operations group MCTSOG to combat the global spread of terrorism in the 21st century eventually became the worlds premier special ops organization The SOG commandos tackle traditional terrorism as well as threats from beyond the skies leading up to December 2012 This special military command employs the use of traditional military hardware and technologies as well as technology that some would refer to as Tools of the gods Follow the commandos and watch them live up to their motto Defenders of the Free World Video trailer link [http www youtube com watch v STAWOqJf4hg](http://www.youtube.com/watch?v=STAWOqJf4hg)

Ufo'S (The Reality) William Calderwood, 2015-04-10 The subject of UFOs I believe is one of the most important subjects there is because of its implications If an alien craft under intelligent control can shut down our nuclear missile systems which is a national security issue it has to be an important subject My interest began while in the service on a destroyer off the Korean coast when I heard that in the fall of 1951 a UFO was observed circling the task force and was picked up on 14 radars in the task force that began my interest in UFOs and have remained with me ever since After returning from the service I later had the opportunity to work for Boeing aero space on the Saturn V moon rocket worked at Michoud La 15 miles out of New Orleans Had a classified clearance while working there One night while lounging by the pool I was looking for the trail of a satellite going overhead when I noticed one of the stars by the big dipper started to move it traveled from the right side of the dipper to about the same distance on the left side and stopped After about two minutes it slowly faded away knowing about space and that an object must travel at 17 000 miles an hour to remain in space or gravity would pull it down to earth it had to be a UFO After two and a half years at Michoud Boeing opened a new branch at Cape Kennedy Florida and I put in for a transfer there was accepted and worked in system interface control received a

secret clearance while at the cape During the time I sat in on two lectures of UFOs the first was by Maj Keyhoe at the Marriott hotel in Coco Beach there was standing room only and he waved some documents and said UFOs were nuts bolts machines and were real objects The other lecture was at Patrick AFB next to where I lived at Satellite Beach The first half of his presentation was a slide show showing the most ridiculous UFOs imaginable an air force presentation The last half was his own personal experience when flying a cargo plane from a southern state to Washington D C A bright yellow UFO came His plane and followed him all the way to Washington D C after I left Boeing and came back home I turned on the TV to watch a new series called project blue book and it was directed by retired col Coleman Once hooked the subject stays with you for life

Gary W. Babb,2006-03-01 Earth is Ours is a fresh and uniquely original story line that bridges many genres It is a story of a symbiotic relationship between a self aware female computer and an American Indian man dying of old age This is a forced relationship dictated by mutual needs for survival in a world stripped of technology by aliens The main characters begin the fight of their lives but before they can fight the fierce aliens Levi and Amy must fight for control of who they will be jointly What begins as conflict of minds develops into tolerance then cooperation and finally love This love of total oneness creates a unity of incredible power and strength that provides the means to fight the aliens Female brains and male brawn unite to battle against incredible odds for the survival of the human race The conflict of minds action adventure and suspense are all interlaced into a compelling and fast paced adventure The characters are three dimensional with real emotions not always perfect but always interacting The story is presented from differing viewpoints with the two main characters expressing some of the same events from both a male and female perspective As they interface the events are often seen from conflicting emotions and motivations sometimes cynical and often humorous It is the ultimate struggle of male versus female while combating monstrous aliens As expected this action story has a strong appeal to men while the romance aspect compliments the story expanding the appeal to women Additionally one of the main characters is Amy a particularly brilliant and forceful female who demands attention from both sexes Her male counterpart is very physical and masculine representing everything Amy is not Both characters and sexes are presented in a positive although conflicting way at times These characters and the story are strong and their saga continues in its sequel Target Earth

Reporting World War II G. Kurt Piehler,Ingo Trauschweizer,2023-04-25 This set of essays offers new insights into the journalistic process and the pressures American front line reporters experienced covering World War II Transmitting stories through cable or couriers remained expensive and often required the cooperation of foreign governments and the American armed forces Initially reporters from a neutral America documented the early victories by Nazi Germany and the Soviet invasion of Finland Not all journalists strove for objectivity During her time reporting from Ireland Helen Kirkpatrick remained a fierce critic of that country s neutrality Once the United States joined the fight after the Japanese attack on Pearl Harbor American journalists supported the struggle against the Axis powers but this volume will show that reporters even when members of

the army sponsored newspaper Stars and Stripes were not mere ciphers of the official line African American reporters Roi Ottley and Ollie Stewart worked to bolster the morale of Black GIs and undermined the institutional racism endemic to the American war effort Women front line reporters are given their due in this volume examining the struggles to overcome gender bias by describing triumphs of Th r se Mabel Bonney Iris Carpenter Lee Carson and Anne Stringer The line between public relations and journalism could be a fine one as reflected by the U S Marine Corps creating its own network of Marine correspondents who reported on the Pacific island campaigns and had their work published by American media outlets Despite the pressures of censorship the best American reporters strove for accuracy in reporting the facts even when dependent on official communiqu s issued by the military Many wartime reporters even when covering major turning points sought to embrace a reporting style that recorded the experiences of average soldiers Often associated with Ernie Pyle and Bill Mauldin the embrace of the human interest story served as one of the enduring legacies of the conflict Despite the importance of American war reporting in shaping perceptions of the war on the home front as well as shaping the historical narrative of the conflict this work underscores how there is more to learn Readers will gain from this work a new appreciation of the contribution of American journalists in writing the first version of history of the global struggle against Nazi Germany imperial Japan and fascist Italy

Crafting Identity Sandra Alföldy,2005-07-26 By contrasting American experience with the Canadian context which includes a unique Quebec identity and a Native dimension Sandra Alföldy argues that the development of organizations advanced education for craftspeople and exhibition and promotional opportunities have contributed to the distinct evolution of professional craft in Canada over the past forty years Alföldy focuses on 1964 74 and the debates over distinctions between professional self taught and amateur craftspeople and between one of a kind and traditional craft objects She deals extensively with key people and events including American philanthropist Aileen Osborn Webb and Canadian philanthropist Joan Chalmers the foundation of the World Crafts Council 1964 and the Canadian Crafts Council 1974 the Canadian Fine Crafts exhibition at Expo 67 and the In Praise of Hands exhibition of 1974 Drawing upon a wealth of previously unexploited materials this richly documented survey includes descriptions and illustrations of significant works and identifies the challenges that lie ahead for professional crafts in Canada

The Routledge Handbook of Craft and Sustainability in India Rebecca Reubens,Tanishka Kachru,2024-10-15 Traditional crafts have been an essential part of Indian history culture and life This handbook looks at craft as both a cultural artefact that reflects people s worldviews

indigenous practices and traditions as well as a source of income generation and development that is inclusive India's rapid development has meant a breakdown of traditional economies and including craft production to consumption systems. Meanwhile there is a call to action from different factions to protect, revive and reinvent craft because the inherent sustainability of the systems that underpin it are essential for the sustainability of India and her people. Against this backdrop this book examines the current landscape of craft in India, its production and marketing in different parts of India, the incorporation of innovation and technology, the push for sustainability and equitability in the handicraft ecosystem and promising government policies that have proved beneficial for craftspeople. It also discusses various challenges that artisans, micro entrepreneurs and marketers face working in the space. With contributions from leading experts in the field of design, activism, policy, education, cultural heritage and entrepreneurship, this volume provides a comprehensive and in-depth picture of the history, economics and future of craft and its relationship with sustainability. An authoritative resource on Indian craft, this handbook will be useful for scholars and researchers of sustainable development, development studies, architecture, design, heritage studies, cultural studies, political economy and public policy.

Fortress Earth Travis Hightower, 2010. Earth is a small blue world in a solar system barely hanging on to the edge of a galaxy between 200 and 400 billion stars. The race of beings that inhabit this world, the more ancient and evolved races of the galaxy, consider to be quite primitive. They are isolated, still absorbed in themselves and alone in their view of the universe. That was how their world was supposed to stay until one of the most war-driven races of the galaxy discovers a rare resource on this tiny backwater planet and they want it. Duke Ross is unusual for a brash young fighter pilot. Underneath the headstrong and cocky exterior is the heart of a family man who loves his wife and child and enjoys the peace presented by an unusual, non-aggressive martial art. As hostile invaders from the stars tear his world out from under him, Duke finds himself becoming the chosen champion of alien beings that wish to defend the Earth and restore its rightful peace in the galaxy. They bestow upon him a secret which can unlock an unimaginable power and grant the Earth and humanity its salvation. But the journey to the mythical Air Force base in the Nevada desert, known to pilots as Dreamland, will be long and dangerous for a pilot without wings. Accompanied by his faithful wingman, an incorrigible ex-girlfriend turned reporter, and a few other skilled allies, Duke must complete a sojourn across a devastated American landscape. They must fight their way past and elude a very persistent alien general who has made it his mission to capture Duke and the technology he holds. But not even Duke knows the full extent of the secret power he carries or what will be revealed when he reaches his goal. And in the shadows, an even more sinister and ancient power plots the downfall of much more than just the tiny island fortress known as Earth.
