*The Arts and Crafts Movement* Gillian Naylor, 1980 The design and theory of the Arts and Crafts movement and the development of its ideas *The Persistence of Craft* Paul Greehalgh, 2002-11-30 Studio Craft in effect started with the Arts and Crafts Movement and developed throughout the 20th century *The Persistence of Craft* Edited by Paul Greehalgh looks at studio arts from woodworking ceramics and glass to jewellery metalworking and textiles and discusses the factors that have shaped their development These range from philosophical considerations such as ethnicity tradition and Post Modernism to practicalities such as the development of new techniques and equipment *A Theory of Craft* Howard Risatti, 2009-09-15 What is craft How is it different from fine art or design In *A Theory of Craft* Howard Risatti examines these issues by comparing handmade ceramics glass metalwork weaving and furniture to painting sculpture photography and machine made design from Bauhaus to the Memphis Group He describes craft as uniquely blending function with a deeper expression of human values that transcend culture time and space Craft must articulate a role for itself in contemporary society says Risatti otherwise it will be absorbed by fine art or design and its singular approach to understanding the world will be lost

**The Arts & Crafts Movement** Oscar Lovell Triggs, 2023-12-28 Have nothing in your house that you do not know to be useful or believe to be beautiful This quote alone from William Morris could summarise the ideology of the Arts Crafts movement which triggered a veritable reform in the applied arts in England Founded by John Ruskin then put into practice by William Morris the Arts Crafts movement promoted revolutionary ideas in Victorian England In the middle of the soulless Industrial Era when objects were standardised the Arts Crafts movement proposed a return to the aesthetic at the core of production The work of artisans and meticulous design thus became the heart of this new ideology which influenced styles throughout the world translating the essential ideas of Arts Crafts into design architecture and painting **Art, Design, Craft, Beauty and All Those Things...** Donald Richardson, 2023-08-18 Responding to many recent calls for redress and restitution Richardson summarises the historical and current situation and attributes its problematics to the fact that theorists and historians have taken the concept art as a generic that includes both design and craft which are actually and validly distinguishable from art by application of the concept functional or else ignored the two entirely Considering the concept functional he maintains calls into question the view that the three may be sub classes of the one class whereas in a work of art typically there is a resolution of the tension between form and content in works of design and craft the resolution is between form and function How this recognition can clarify the issue informs the entire book The book's other major thesis is the realisation that aesthetic values are inherently human and that therefore they apply not only to art but to life in general Far from being frivolous or a mere emotion the aesthetic is a sense of equivalent psychic status to sight and hearing and like them is employed at almost every moment of our daily lives which fact grounds art design and craft deeply in human life This is reflected in the universal use of the human form including the exhibition of sexual characteristics in art The eternal conflict

between making art and making a living from making art is examined and contrasted to the rarely recognised but positive role of design in planning and industry Richardson also critiques common theories of representation and composition including creativity Albertian perspective and scientific and geometric theories of beauty and composition also the relevance of the camera and the computer in the field *Hand + Made* Valerie Cassel Oliver, Glenn Adamson, Namita Gupta Wiggers, Sarah G.
