AIR CRASH INVESTIGATIONS EYE OF THE NEEDLE The Crash of British Airways Flight 38 Hans Griffioen, editor, 2012-11-01 On 28 November 2008 a Boeing 777-200ER operated by British Airways as flight BA38 on its way from Beijing China to London Heathrow suffered on approach to Heathrow Airport an in-flight engine rollback At 720 feet agl the right engine ceased responding to autothrottle commands for increased power and instead the power reduced to 1.03 Engine Pressure Ratio (EPR) Seven seconds later the left engine power reduced to 1.02 EPR This reduction led to a loss of airspeed and the aircraft touching down some 330 m short of the paved surface of Runway 27L at London Heathrow The investigation identified that the reduction in thrust was due to restricted fuel flow to both engines It was determined that the restriction occurred most probably in the Fuel Oil Heat Exchangers The investigation identified the forming of ice in the fuel system as probable cause The aircraft was destroyed but there were no casualties Mobilities John Urry, 2007 Issues of movement of people things information and ideas are central to people's lives and to most organisations From oil wars to SMS texting from airport expansion controversies to the decline of walking from slave trading to global terrorism from global warming to teleworking issues of mobility are centre stage upon many academic and policy agendas These topics and issues are

increasingly analysed as part of a concern with mobility which this wide ranging book both describes and seeks to develop John Urry has been at the centre of these debates and he draws upon an extensive array of new research and material to develop what he calls the new mobilities paradigm for the social sciences He shows how this paradigm makes comprehensible social phenomena which were previously opaque He examines how mobilities each presuppose a system that permits predictable and relatively risk free repetition The book outlines various such systems and then analyses their intersecting implications for social inequality for social networks and meetings for the nature of places and for alternative mobility futures Mobilities is thus both an analysis of different mobilities historically and in the present and an argument that the social world will be analysed quite differently once peoples lives organisations states and global institutions are seen to be dealing with extensive and hugely contested mobility processes This book rewrites social science through a mobilities paradigm

Wreck Recovery In Britain Peter J Moran, 2018-10-30 Whereas on the Continent the Missing Research and Enquiry Unit left no stone unturned to try to trace the thousands of airmen who still remained missing strangely enough no similar operation was carried out by the RAF on crash sites in the United Kingdom Many of these still contained the mortal remains of pilots whose names had been added to the Memorial to the Missing unveiled at Runnymede in 1953 It is difficult to understand today how it took so long for the realization to sink in that aircraft wreckage still remained buried When it did there followed what can only be described as an unholy scramble to find crash sites and dig them up heavy plant being employed to make it easier and quicker At the height of this unfettered exploration period during the 1970s there were over 30 aviation archaeology groups at work particularly in the counties of Essex Kent and Sussex Unrecovered human remains were now being found which understandably raised criticism from some quarters Inevitably order had to be restored and the Ministry of Defence stepped in with a code of conduct for digging up crashed aircraft a measure that was reinforced by an Act of Parliament in 1986 Thereafter a process was introduced whereby the Ministry issued licenses before a wreck site could be excavated and every license application whether granted or refused is listed for the first time in this book

Cases of Intervention Marie Hologa, 2013-08-19 Cases of Intervention offers new perspectives on the case study as a research tool with a long standing tradition in British cultural studies Despite this significance it has hardly ever been explicitly reflected upon as a method but in this volume it takes centre stage Scholars from interdisciplinary fields have written succinctly on diverse topics the eleven case studies are comprehensible and lucid applications of theoretical approaches to topics such as the British cup of tea CCTV and monarchs on film This book will give readers the opportunity to discover the broad spectrum of approaches that make British cultural studies an indispensable discipline for discourses in academia and beyond Each case study presented here illuminates the relationship between cultural practices and theory By choosing cases embedded in everyday life the focus of each contribution is on the potential of pragmatic intervention

System Criminality in

International Law Harmen van der Wilt, André Nollkaemper, Menno M. Dolman, Jann K. Kleffner, 2009-07-02 International crimes such as crimes against humanity genocide and war crimes are committed by individuals However individuals rarely commit such crimes for their own profit Instead such crimes are often caused by collective entities Notable examples include the dirty war in Argentina in the 1970s and 1980s the atrocities committed during the Balkan Wars in the early 1990s and the crimes committed during the ongoing armed conflicts in the Darfur area in Sudan Referring to Darfur the Prosecutor of the ICC noted in 2008 that although he had indicted a few individuals the information gathered points to an ongoing pattern of crimes committed with the mobilisation of the whole state apparatus This book reviews the main legal avenues that are available within the international legal order to address the increasingly important problem of system criminality and identifies possible improvements **Education, Professionalism and the Quest for Accountability** Jane

Green, 2011-05-20 Today workers based in institutions designed to serve the public teachers nurses social workers community officers librarians civil servants etc are expected to reorganize their thoughts and practice in accordance with a performance management model of accountability which encourages a rigid bureaucracy one which translates regulation and monitoring procedures into inflexible and obligatory compliance This book shows how and why this performance model may be expected paradoxically to make practices less accountable and in the case of education less educative **The Best**
