Beer in the Middle Ages and the Renaissance Richard W. Unger, 2013-05-22 The beer of today brewed from malted grain and hops manufactured by large and often multinational corporations frequently associated with young adults sports and drunkenness is largely the result of scientific and industrial developments of the nineteenth century Modern beer however has little in common with the drink that carried that name through the Middle Ages and Renaissance Looking at a time when beer was often a nutritional necessity was sometimes used as medicine could be flavored with everything from the bark of fir trees to thyme and fresh eggs and was consumed by men women and children alike Beer in the Middle Ages and the Renaissance presents an extraordinarily detailed history of the business art and governance of brewing During the medieval and early modern periods beer was as much a daily necessity as a source of inebriation and amusement It was the beverage of choice of urban populations that lacked access to secure sources of potable water a commodity of economic as well as social importance a safe drink for daily consumption that was less expensive than wine and a major source of tax revenue for the state In Beer in the Middle Ages and the Renaissance Richard W Unger has written an encompassing study of beer as both a product and an economic force in Europe Drawing from archives in the Low Countries and England to assemble an impressively complete history Unger describes the transformation of the industry from small scale production that was a basic part of housewifery to a highly regulated commercial enterprise dominated by the wealthy and overseen by government authorities Looking at the intersecting technological economic cultural and political changes that influenced the transformation of brewing over centuries he traces how improvements in technology and in the distribution of information combined to standardize quality showing how the process of urbanization created the concentrated markets essential for commercial production Weaving together the stories of prosperous businessmen skilled brewmasters and small producers this impressively researched overview of the social and cultural practices that surrounded the beer industry is rich in implication for the history of the period as a whole

"Addiction and British Visual Culture, 1751-1919" Julia Skelly, 2017-07-05 Highly innovative and long overdue this study analyzes the visual culture of addiction produced in Britain during the long nineteenth century The book examines well known images such as William Hogarth s Gin Lane 1751 as well as lesser known artworks including Alfred Priest s painting Cocaine 1919 in order to demonstrate how visual culture was both informed by and contributed to discourses of addiction in the period between 1751 and 1919 Through her analysis of more than 30 images Julia Skelly deconstructs beliefs and stereotypes related to addicted individuals that remain entrenched in the popular imagination today Drawing upon both feminist and queer methodologies as well as upon extensive archival research Addiction and British Visual Culture 1751-1919 investigates and problematizes the long held belief that addiction is legible from the body thus positioning visual images as unreliable sources in attempts to identify alcoholics and drug addicts Examining paintings graphic satire photographs advertisements and architectural sites Skelly explores such issues as ongoing anxieties about maternal drinking the punishment and confinement of addicted individuals the mobility of female alcoholics through the streets and spaces of nineteenth century London and soldiers use of addictive substances such as cocaine and tobacco to cope with traumatic memories following the First World War

Ambivalent Pleasures Scott K. Taylor, 2024-08-15 Ambivalent Pleasures explores how Europeans wrestled with the novel experience of consuming substances that could alter moods and become addictive During the early modern period psychotropic drugs like sugar chocolate tobacco tea coffee distilled spirits like gin and rum and opium either arrived in western Europe for the first time or were newly available as everyday commodities Drawing from primary sources in English

Dutch French Italian and Spanish Scott K Taylor shows that these substances embodied Europeans anxieties about race and empire religious strife shifting notions of class and gender roles and the moral implications of urbanization and global trade Through the writings of physicians theologians political pamphleteers satirists and others *Ambivalent Pleasures* tracks the emerging understanding of addiction fears about the racial class and gendered implications of using these soft drugs including that consuming them would make users more foreign and the new forms of sociability that coalesced around their use Even as Europeans moral concerns about the consumption of these drugs fluctuated the physical and sensory experiences of using them remained a critical concern anticipating present day rhetoric and policy about addiction to drugs and alcohol **Drink in the Eighteenth and Nineteenth Centuries** Susanne Schmid, Barbara

Schmidt-Haberkamp, 2015-10-06 This collection of essays covers the representation and practice of drinking a variety of beverages across eighteenth and nineteenth century Britain and North America The case studies in this volume cover drinking culture from a variety of perspectives including literature history anthropology and the history of medicine

Alcohol and its Role in the Evolution of Human Society Ian S Hornsey, 2016-01-13 Archaeologists and anthropologists especially ethnologists have for many years realised that man's ingestion of alcoholic beverages may well have played a significant part in his transition from hunter gatherer to agriculturalist This unique book provides a scientific text on the subject of ethanol that also aims to include material designed to show non scientists what fermentation is all about Conversely scientists may well be surprised to find the extent to which ethanol has played a part in evolution and civilisation of our species
