the object This time however the possible fundamental role of cognitive consonance characterized here as the ability of the mind to integrate opposing ideas into a single expanded understanding of Self is studied in terms of how it might relate to the following three categories of intuitive experience One my physical object in which consonance or wholeness expands one's understanding of Self when ideas about youngness and oldness become integrated as part of episodic memories that involve an actual physical toy doll Two my objectified being in which consonance takes place when again ideas about youngness and oldness become integrated through the metaphoric objectification of certain points located on the human female body And three in which consonance develops as youngness and oldness ideas become integrated through a doll as a work of art Within the theoretical framework of each of these three categories various psychological dynamics which encompass memory metaphor and neuroplasticity are understood to be essential to the molding and shaping of one's subjective experience of doll

[Faith, Hope, and Love in the Kingdom of God](#) Robert Hernan Cubillos, 2017-04-27 We live in a world full of challenges The three graces can almost be seen as motors for Christian life in today's world but the words faith hope and love have so many everyday uses that their technical theological meanings are for many difficult to appreciate Modern life also leaves many yearning for authenticity and meaning Many religions have answered that need by calling to mind the image of a path Always profound progressions religious paths tend to be motivated either by practices the act of walking the path or focal points Christianity has a focal point an object and it sees the three graces as distinctively content filled The heart of this book is about helping people find the Christian path and their intellectual emotional and spiritual balance an equilibrium that is sustained by a strong personal faith an enduring hope for the future and genuine love that will withstand the worst of times It contributes to the category of Christian literature that provides a pattern for Christian living without surrendering the intellect to the more popular side of this genre

*Music in Our Lives* Gary E. McPherson, Jane W. Davidson, Robert Faulkner, 2012-03-15 Why do some children take up music while others don't Why do some excel whilst others give up Why do some children favour classical music whilst others prefer rock These are questions that have puzzled music educators psychologists and musicologists for many years Yet they are incredibly difficult and complex questions to answer *Music in our lives* takes an innovative approach to trying to answer these questions It is drawn from a research project that spanned fourteen years and closely followed the lives of over 150 children learning music from their seventh to their twenty second birthdays This detailed longitudinal approach helped the authors probe a number of important issues For example how do you define musical skill and ability Is it true as many assume that continuous engagement in performance is the sole way in which those skills can be developed What are the

consequences of trends and behaviours observed amongst the general public and their listening consumption After presenting an overview and detailed case study explorations of musical lives the book provides frameworks and theory for further investigation and discussion It tries to present an holistic interpretation of these studies and looks at their implications for musical development and education Accessibly written by three leading researchers in the fields of music education and music psychology this book makes a powerful contribution to understanding the dynamic and vital context of music in our lives
