Creating Alternative Futures Hazel Henderson,1980 *The Monk/manager and the Road to Abbey-management* Eric R. J. Lefebvre,1997 **Capitalism, Democracy, and Ecology** Timothy W. Luke,1999 The world that was revolutionized by industrialization is being remade by the information revolution But this is mostly a revolution from above increasingly shaped by a new class of technocrats experts and professionals in the service of corporate capitalism Using Marx as a touchstone Timothy W Luke warns that if communities are not to be overwhelmed by new class economic and political agendas then the practice of democracy must be reconstituted on a more populist basis However the galvanizing force for this new more community centered populism will not be the proletariat as Marx predicted nor contemporary militant patriotic groups Rather Luke argues that many groups unified by a concern for ecological justice present the strongest potential opposition to capitalism Wide ranging and lucid Capitalism Democracy and Ecology is essential reading in the age of information

Environment and the City Joe Ravetz,Clive George,Joe Howe,2004-07-15 For the first time at the beginning of the twenty first century urban dwellers outnumber rural residents and this trend is set to continue Consequently one of the most pressing issues of our time is how to square the social and economic development of cities with their environmental limits and those of the wider environment The theme of the environment and city is topical at every level from the politics of global trade to local community networks Environment and the City looks at the evolution of cities in the developed and the developing world and the implications for resource consumption and environmental impacts It takes a cross cutting approach with new thinking on multiple geographies the configuration of networks exclusion consumption risk and ecological footprint Urban environmental themes and their related social economic and political agendas are outlined In turn the environmental impacts and environmental agendas relating to key sectors of the urban economy are discussed The global context to such issues is then explored before the practical tools and methods of urban environmental management are investigated The theme of the sustainable city emerges from this not so much as a standard menu but as a learning process between all sections of society This book a valuable resource provides a concise accessible route map for all students interested in the environmental issues emanating from our urban society Written to aid student understanding the easily navigable text features boxed practical examples discussion points signposts to reading and websites and a glossary **Technological**
