God did not create Man/Man Created God Sudhansu S. Tunga,2023-10-11 It is our common belief and conviction for most people that God created this universe and all that it possesses including mankind This knowledge is obtained from the religious literature of most religions which is hardly five thousand years old But the universe was born 13.8 billion years earlier and man has appeared on earth just two hundred thousand years ago At that time there was no God Religious beliefs stand upon man s ignorance and superstitions not on any sound scientific examination ascribing that it is man who has created God in his fancy and not the other way round Therefore the concept of God and religion should be forsaken for the betterment of all The book deals with this subject in an objective and rational way analyzing all the relevant literature including religious books history archaeology as also physical sciences and other relevant subjects

The Analogy of Love Gary Chartier,2015-11-09 This book offers an overview of Christian theology organized around the twin themes of divine and human love The book covers the traditional theological topics as well as basic questions of theological method It seeks to integrate a focus on love throughout While love is regularly canvassed as a dominant theme in Christian thought it has rarely been the focus of Christian theological construction or a constraint on theological formulation The book seeks to suggest chapter by chapter how a given topic relates to the broad theme of love The book is written in a way designed to make it accessible to university students and educated laypersons At the same time it takes positions on controverted scholarly issues and the methodological approach outlined at the beginning will be of interest to academic theologians

God and Government Cornelis Van Dam,2011-12-05 Ours is a time of rapid cultural change with new economic challenges People look to their governments for leadership and solutions But what can and should government do to meet the difficulties that beset a nation What can citizens expect from their elected representatives What is reasonable And what should citizens do What are their responsibilities This book addresses such fundamental issues through the eyes of

Scripture and against the backdrop of North America's dual heritage of Christianity and humanism. Government politics and the Bible do not seem like a good mix. But as this book aims to show, the Bible has much wisdom to teach us about the place and role of government and its citizens. Biblical principles work because God knows how his world and his servant governments are supposed to function. After all, he ordained the governing authorities and the principles enunciated in his Word are timeless and remain practical. This book introduces fundamental biblical principles that apply to government and politics. The intent is to inform and to motivate the reader to get involved where possible in the political processes of the day. Our legislators need the input and help from their knowledgeable Christian constituents.

Church Forward: How to Plant Christ Centered, Spirit Empowered, Socially Responsible Churches in Every Nation Adam Mabry, 2014-07-30. Light from the East Alexei V. Nesteruk. In this unique volume, a new and distinctive perspective on hotly debated issues in science and religion emerges from the unlikely ancient Eastern Orthodox Christian tradition. Alexei Nesteruk reveals how the Orthodox tradition, deeply rooted in Greek Patristic thought, can contribute importantly in a way that the usual Western sources do not. Orthodox thought, he holds, profoundly and helpfully relates the experience of God to our knowledge of the world. His masterful historical introduction to the Orthodox traditions not only surveys key features of its theology but highlights its ontology of participation and communion. From this, Nesteruk derives Orthodoxy's unique approach to theological and scientific attribution. Theology identifies the underlying principles (logoi) in scientific affirmations; Nesteruk then applies this methodology to key issues in cosmology: the presence of the divine in creation, the theological meaning of models of creation, the problem of time, and the validity of the anthropic principle, especially as it relates to the emergence of humans and the Incarnation. Nesteruk's unique synthesis is not a valorization of Eastern Orthodox thought so much as an influx of startlingly fresh ideas about the character of science itself and an affirmation of the ultimate religious and theological value of the whole scientific enterprise.

Karl Barth Paul S. Chung, 2008-09-05. In this creative and original book, Paul S. Chung interprets Karl Barth as a theologian of divine action. Chung appreciates Barth's dogmatic theology as both contextual and irregular, and he retrieves the neglected sides of Barth's thought with respect to political radicalism, Israel, natural theology, and religious pluralism.
