The Evolution Controversy in America George Webb, 2014-07-11 For well over a century the United States has witnessed a prolonged debate over organic evolution and teaching of the theory in the nation's public schools The controversy that began with the publication of Darwin's *Origin of the Species* had by the 1920s expanded to include theologians politicians and educators The Scopes trial of 1925 provided the growing antievolution movement with significant publicity and led to a decline in the teaching of evolution in public schools George E Webb details how efforts to improve science education in the wake of Sputnik resurrected antievolution sentiment and led to the emergence of creation science as the most recent expression of that sentiment Creationists continue to demand balanced treatment of theories of creation and evolution in public schools even though their efforts have been declared unconstitutional in a series of federal court cases Their battles have been much more successful at the grassroots level garnering support from local politicians and educators Webb attributes the success of creationists primarily to the lack of scientific literacy among the American public Although a number of published studies have dealt with specific aspects of the debate *The Evolution Controversy in America* represents the first complete historical survey of the topic In it Webb provides an analysis of one of the most intriguing debates in the history of American thought

Scientific Values and Civic Virtues Noretta Koertge, 2005-08-04 This volume of contributed essays a follow up to Noretta Koertge's successful book on the science wars *A House Built on Sand* takes an affirming positive view of the relationship between the values embodied in science and the nature of a civil society It argues that recent attacks on the probity of science undermine the possibility of rational discourse in the political arena While science has traditionally been viewed as incorporating intellectual virtues like honesty and precision of language the contributors to this volume point to additional benefits examining the idea that science can serve as a source of and inspiration for civic virtues in the need to be well informed about the way the world works in tolerating the viewpoints of others and in functioning as a fully global enterprise dedicated to the public good The contributors who include philosophers political scientists physicists biologists and engineers look at examples of scientific virtues in action and how they might be used as inspirations and practical

resources for improving civic society The volume will appeal to a similarly broad audience interested in the relationship between science and society

Creation and Evolution Norman Dennis Newell, 1982 An examination of the controversy concerning evolution and biblical creation presents the evidence for evolution and discusses whether creationism can be considered a scientific theory

Evolution and Religious Creation Myths : How Scientists Respond Paul F. Lurquin School of Molecular Biosciences Washington State University, Linda Stone Department of Anthropology Washington State University, 2007-06-08 Polls show that 45% of the American public believes that humans were created about 10 000 years ago and that evolution is non-existent Another 25% believes that changes in the natural world are directed by a supernatural being with a particular goal in mind This thinking clashes frontally with scientific findings obtained in the past 150 years A large portion of the general public espouses the views of creationists and their descendants and ignores or is unaware of scientific advances Critical thinking about the natural world within a scientific framework is lacking in the USA and many parts of the world This manuscript provides a multidisciplinary explanation and defense for the science of evolution not just Darwinism as it is being challenged by arguments for intelligent design and other creation myths It draws in the life physical and social sciences and recent studies of human evolution that rely much on the idea of change over time which is evolution writ large It puts the evolution ID issue into international perspective by including opinions held in world religions other than Christianity It is clearly written and also can easily be used as a guide for those with some science background The authors make a convincing case that other books do not achieve this as much as they do in this work The book is written for a whole spectrum of educated people including teachers and teachers in training who are interested in the broad issues of the origins of the universe life and humans and who may not quite grasp the potential magnitude of the negative influence on all of science education of people embracing creationist and ID thinking This includes high school teachers and people on boards of education and in municipal governments anyone involved in education It could be used also in college courses such as contemporary social issues and Science and Society sometimes team taught by sociologists and scientists The authors show that when they are teleological dogmatic or politically inspired religious and creation myths threaten scientific efforts The book does not require any extensive knowledge of science The principle of change over time pervades all of science from cosmology to the search for the origin for life to human physical and cultural evolution The book educates readers on scientific matters that overwhelmingly support the idea of evolution not only in the living world but also in physical and social science It explains too how evolution physical and biological is a random unguided process whose roots can be already found in quantum physics

The Creation/Evolution Controversy Kary D. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin

of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology *Less Is More* Donna J. Baumbach, Linda L. Miller, 2006-06-05 Contains practical advice for updating a school library collection describing why it is important and how to use automation tools to make the job easier **Creation and Evolution** Norman Newell, 1984-12-15 **For the Rock Record** Jill S. Schneiderman, Warren D. Allmon, 2009 Creationism began with the fossil record and there it shall end Before Darwin the geological strata with their accompanying fossils formed the first geological theory of life on earth creationism coupled to flood geology It was Darwin who stood that theory on its head and showed that in fact these same fossils could be used to support his new theory of evolution by natural selection Ever since Darwin geology has unequivocally supported evolution and not creationism and yet today Intelligent Design thrives in popular culture Here at last we have a definitive collection of world class geologists and paleontologists who systematically demonstrate precisely why geology destroys all design arguments and reveals instead a deep and rich history of life on earth A perfect companion to all science courses Michael Shermer publisher of Skeptic magazine and author of Why Darwin Matters An excellent contribution on a vital issue which concerns not only geologists but all who value any science Mark Isaak author of The Counter Creationism Handbook **The Singing Heart of the World: Creation, Evolution, and Faith** John Feehan, 2012 Biblical Creation Truth Joaozinho Da S. F. a. Martins, 2012-03 BIBLICAL CREATION TRUTH differs from the traditional and recent controversial theories of creationism Contrary to the prevailing confusing theories of creation the heavens and earth of Genesis 1 1 were perfect Deuteronomy 32 4 and beautiful Ecclesiastes 3 11 Genesis 1 1 in just one short blessed sentence covers within its grasp the totality of a perfect creation This fact is corroborated by Proverbs 8 22 31 narrating the primeval creation In no way Proverbs 8 27 31 are parallel with Genesis 1 3 31 but actually complement Genesis 1 1 with additional details Next Proverbs 8 27 31 does not mention chaos on the primeval earth thereby proving that the chaos of Genesis 1 2 was of later occurrence Moreover Proverbs 8 26c 31 prove that the original earth was teemed with life including pre adamic sons of men in whom Wisdom delighted This could not be the case after Adam s fall Undoubtedly a faulty

interpretation of Genesis 1 1 31 and Exodus 20 11 lies behind the battle for a true view of the beginning If these Scriptures along with Proverbs 8 22 31 were objectively interpreted taking into account Genesis 2 4a relating to beginnings it would be clear that there were two beginnings of God s creative works one in the eternity past 2 Peter 3 5 and the other in the realm of time 2 Peter 3 7 leaving no room for any debate relating to the origins or the age of the universe It s time we admit our failure to consider all the Scriptures relating to creation and interpret the biblical creation accounts appropriately And next with faith come to grips with the actual revealed Biblical Creation Truth for His Name s sake even as we look forward to the creation of new heavens and earth in the eternity future 2 Peter 3 13 **Evolutionary Creation** Denis O.

Lamoureux,2008-06-15 In this provocative book evolutionist and evangelical Christian Denis O Lamoureux proposes an approach to origins that moves beyond the evolution versus creation debate Arguing for an intimate relationship between the Book of God s Words and the Book of God s Works he presents evolutionary creation a position that asserts that the Father Son and Holy Spirit created the universe and life through an ordained and sustained evolutionary process This view of origins affirms intelligent design and the belief that beauty complexity and functionality in nature reflect the mind of God Lamoureux also challenges the popular Christian assumption that the Holy Spirit revealed scientific and historical facts in the opening chapters of the Bible He contends that Scripture features an ancient understanding of origins that functions as a vessel to deliver inerrant and infallible messages of faith Lamoureux shares his personal story and his struggle in coming to terms with evolution and Christianity Like many he lost his boyhood faith at university in classes on evolutionary biology After graduation he experienced a born again conversion and then embraced belief in a literal six day creation Graduate school training at the doctoral level in both theology and biology led him to the conclusion that God created the world through evolution Lamoureux closes with the two most important issues in the origins controversy the pastoral and pedagogical implications How should churches approach this volatile topic And what should Christians teach their children about origins

Scholarly World, Private Worlds Karl Dietrich Fezer,2001-12-24 BLUE INK Review STARRED REVIEW Scholarly World Private Worlds Thinking Critically About Science Religion and Your Private Beliefs Karl D Fezer Xlibris 434 pages paperback 24 99 9781401034146 Reviewed March 2014 Informal logic is a discipline that examines the validity of the arguments we encounter in everyday discourse from political speeches to editorials to posts on social media Karl D Fezer s work is nothing less than a tour de force of informal logic This important book investigates under what conditions our beliefs are warranted and the limits of the methods by which we derive them The author is not concerned with validating or debunking any particular worldview religious or scientific but with examining the grounds on which we form the views that we do in fact hold The book s first part discusses the distinction between the views we harbor in our inmost hearts and their extension into the social realm where we encounter a multiplicity of views different from our own In the second part Fezer presents good reasons why we might doubt the beliefs we hold In his third section he discusses methods by which we might

form views that are worthy of being called rational The final section covers the differences between science and religion and the limitations inherent in attempts to reconcile competing worldviews Fezer also contributes to the debate around teaching Creationism in schools He makes an argument for limiting the curriculum to accounts of the natural world that do not introduce supernatural principles However Fezer is not anti religion and he discusses both religious and humanistic viewpoints neutrally The author notes that he is attempting to fill a void in university liberal arts curricula As such the book has the structure of a textbook complete with questions for further study in an appendix However it is written in crisp readable prose Readers who aren't intimidated by the textbook style will find a cogent forceful presentation that is likely to challenge his or her convictions in a non threatening and highly impressive manner
