Bombing To Win Air Power Coercion In W:

Bombing to Win Robert A. Pape, 1996-04-18 Can air bombardment break the morale of an enemy and force it to capitulate or does it strengthen the enemy's determination to resist In the first major book since the Vietnam War on the theory and practice of airpower and its political effects Robert A Pape helps policy makers judge the purpose of various air strategies and helps general readers understand the policy debates Pape examines the air raids on Germany Japan Korea Vietnam and Iraq as well as those of Israel versus Egypt providing details of bombing operations and governmental decision making His detailed narratives of the strategic effectiveness of bombing range from the classical cases of World War II to an extraordinary reconstruction of airpower use in the Gulf War based on recently declassified documents Pape argues convincingly that airpower is no magic bullet nor a way to win inexpensively His conclusions will provoke debate from the highest military circles to the armchair generals in academia and Congress and have ramifications for questions from defense budget cuts to international policy in Bosnia The wealth of systematically collected evidence should be a source of scholarly debates for years to come

Air Power in UN Operations A. Walter Dorn, 2016-03-23 Air power for warfighting is a story that's been told many times Air power for peacekeeping and UN enforcement is a story that desperately needs to be told For the first time this volume covers the fascinating range of aerial peace functions In rich detail it describes aircraft transporting vital supplies to UN peacekeepers and massive amounts of humanitarian aid to war affected populations aircraft serving as the eyes in sky to keep watch for the world organization and combat aircraft enforcing the peace Rich poignant case studies illuminate the past and present use of UN air power pointing the way for the future This book impressively fills the large gap in the current literature on peace operations on the United Nations and on air power generally **John**

Warden and the Renaissance of American Air Power John Andreas Olsen, 2007 Dr John Andreas Olsen has written an insightful compelling biography of retired U S Air Force colonel John A Warden III the brilliant but controversial air warfare theorist and architect of Operation Desert Storm's air campaign Warden's radical ideas about air power's purposes and applications promulgated at the expense of his own career sparked the ongoing revolution in military affairs Legendary in defense circles Warden is also the author of *The Air Campaign Planning for Combat* republished by Brassey's Inc in 1989 Presenting both the positives and negatives of Warden's personality and impact in this objective portrait Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments

Bombing, States and Peoples in Western Europe 1940-1945 Claudia Baldoli, Andrew Knapp, Richard Overy, 2011-06-30 This is the first book to treat bombing during WWII as a European phenomenon and not just the Blitz on Britain and Germany With Western Europe now at the heart of a united continent it is even more difficult to explain how only 70 years ago European states destroyed much of the urban landscape from the air There were many blitzes between 1940 and 1945 with an estimated 700 000 people killed The purpose of this book is to provide the basis for a comparison of the experience of western states under the impact of bombing

In particular it considers the political cultural and social responses to bombing rather than the military strategic and social dimensions which have formed the core of the discussion hitherto This book will correct the popular perception of the British Blitz as the key bombing experience by exposing the reality of life under the bombs for communities as far apart as Brest Palermo and Rostock An international panel of historians consider the issues raised amidst the bombing of human rights and protection of civilians in this seminal event in C20th history **The Myth of Inevitable US Defeat in Vietnam** Dale Walton,2013-01-11 This book offers a dispassionate strategic examination of the Vietnam conflict that challenges the conventional wisdom that South Vietnam could not survive as an independent non communist entity over the long term regardless of how the United States conducted its military political effort in Indochina Precision and Purpose Karl P. Mueller,2015-07-08 A team of U S and international experts assesses the impact of various nations airpower efforts during the 2011 conflict in Libya including NATO allies and non NATO partners and how their experiences offer guidance for future conflicts In addition to the roles played by the United States Britain and France it examines the efforts of Italy Canada Belgium Denmark the Netherlands Norway Sweden Qatar the UAE and the Libyan rebels **Migrants, Refugees, and Foreign Policy** Rainer Münz,Myron Weiner,1997 Now faced with growing resistance to admitting foreigners into their countries both governments have once again been using foreign policy instruments in an effort to change the conditions in the refugees countries of origin that forced them to leave *Under the Nuclear Shadow* Fiona S. Cunningham,2025-01-07 How and why China has pursued information age weapons to gain leverage against its adversaries How can states use military force to achieve their political aims without triggering a catastrophic nuclear war Among the states facing this dilemma of fighting limited wars only China has given information age weapons such a prominent role While other countries have preferred the traditional options of threatening to use nuclear weapons or fielding capabilities for decisive conventional military victories China has instead chosen to rely on offensive cyber operations counterspace capabilities and precision conventional missiles to coerce its adversaries In *Under the Nuclear Shadow* Fiona Cunningham examines this distinctive aspect of China s post Cold War deterrence strategy developing an original theory of strategic substitution When crises with the United States highlighted the inadequacy of China s existing military capabilities Cunningham argues China pursued information age weapons that promised to rapidly provide credible leverage against adversaries Drawing on hundreds of original Chinese language sources and interviews with security experts in China Cunningham provides a rare and candid glimpse from Beijing into the information age technologies that are reshaping how states gain leverage in the twenty first century She offers unprecedented insights into the trajectory of China s military modernization as she details the strengths and weaknesses of China s strategic substitution approach *Under the Nuclear Shadow* also looks ahead at the uncertain future of China s strategic substitution approach and briefly explores too how other states might seize upon the promise of emerging technologies to address weaknesses in their own military strategies The Concept of Military Objectives in

International Law and Targeting Practice Agnieszka Jachec-Neale, 2014-10-24 The concept that certain objects and persons may be legitimately attacked during armed conflicts has been well recognised and developed through the history of warfare This book explores the relationship between international law and targeting practice in determining whether an object is a lawful military target By examining both the interpretation and its post ratification application this book provides a comprehensive analysis of the definition of military objective adopted in 1977 Additional Protocol I to the four 1949 Geneva Conventions and its use in practice Tackling topical issues such as the targeting of TV and radio stations or cyber targets Agnieszka Jachec Neale analyses the concept of military objective within the context of both modern military doctrine and the major coalition operations which have been undertaken since it was formally defined This monograph will be of great interest to students and scholars of international law and the law of armed conflict as well as security studies and international relations

Elements of Deterrence Erik Gartzke, Jon R. Lindsay, 2024 Global politics in the twenty first century is complicated by dense economic interdependence rapid technological innovation and fierce security competition How should governments formulate grand strategy in this complex environment Many strategists look to deterrence as the answer but how much can we expect of deterrence Classical deterrence theory developed in response to the nuclear threats of the Cold War but strategists since have applied it to a variety of threats in the land sea air space and cyber domains If war is the continuation of politics by other means then the diversity of technologies in modern war suggests a diversity of political effects Some military forces or postures are most useful for winning various kinds of wars Others are effective for warning adversaries of consequences or demonstrating resolve Still others may accomplish these goals at lower political cost or with greater strategic stability Deterrence is not a simple strategy therefore but a complex relationship between many ends and many means This book presents findings from a decade long research program on cross domain deterrence Through a series of theoretical and empirical studies we explore fundamental trade offs that have always been implicit in practice but have yet to be synthesized into a general theory of deterrence Gartzke and Lindsay integrate newly revised and updated versions of published work alongside new work into a holistic framework for understanding how deterrence works or fails to work in multiple domains Their findings show that in deterrence all good things do not go together

The Deaths of Others John Tirman, 2011-07-01 Americans are greatly concerned about the number of our troops killed in battle 33 000 in the Korean War 58 000 in Vietnam 4 500 in Iraq and rightly so But why are we so indifferent often oblivious to the far greater number of casualties suffered by those we fight and those we fight for This is the compelling largely unasked question John Tirman answers in *The Deaths of Others* Between six and seven million people died in Korea Vietnam and Iraq alone the majority of them civilians And yet Americans devote little attention to these deaths Other countries however do pay attention and Tirman argues that if we want to understand why there is so much anti Americanism around the world the first place to look is how we conduct war We understandably strive to protect our own troops but our rules of engagement with the enemy are another matter From atomic weapons and carpet bombing in World War II to napalm and daisy cutters in Vietnam and beyond our weapons have killed large numbers of civilians and enemy soldiers Americans however are mostly ignorant of these methods believing that American wars are essentially just necessary and good Trenchant and passionate *The Deaths of Others* forces readers to consider the tragic consequences of American military action not just for Americans but especially for those we fight against

Insurgency and Counterinsurgency in Modern War Scott Nicholas Romaniuk, Stewart Tristan Webb, 2015-08-22 A collection of original works covering all aspects of insurgency and counterinsurgency through a multinational lens *Insurgency and Counterinsurgency in Modern War* addresses the need to look beyond the United States and other prominent counterinsurgency actors in the contemporary world It addresses the need to look beyond the United States and other preeminent counterinsurgency actors in the contemporary world while reassessing some of the latent and burgeoning insurgent organizations and networks around the globe It also suggests alternative approaches to understanding insurgency counterinsurgency and conventional and asymmetric warfare as they relate to insurgency and counterinsurgency

Towards a Victimology of State Crime Dawn Rothe, David Kauzlarich, 2016-05-13 State crime victimization often leaves a legacy of unrecognized victims that are ignored forgotten or

negated the right to be labeled as such Victims are often glossed over as the focus is on a state's actions or inactions rather than the subsequent victimization and victims Towards a Victimology of State Crime serves to highlight the forgotten victims processes and cases of revictimization within a sociological criminological framework Contributors include expert scholars of state crime and victimology from North America Europe Africa and Latin America to provide a well rounded focus that can address and penetrate the issues of victims of state crime This includes a diverse number of case study examples of victims of state crime and the systems of control that facilitate or impede addressing the needs of victims Additionally with the inclusion of a section on controls this volume taps into an area that is often overlooked the international level of social control in relation to a victimology of state criminality

Wars of Revelation Rebecca Lissner, 2021 Rich in historical detail and theoretical insight Wars of Revelation explains why the United States military interventions have repeatedly transformed its global role and what that means for the future of American grand strategy More than seventy five years since the end of World War II military interventions rather than major wars have emerged as a defining feature of contemporary geopolitics Yet for all the fierce policy debates over interventions and their lessons scholars have largely ignored the systematic linkages between these smaller scale wars and transformations in the grand strategies of states that prosecute them In Wars of Revelation Rebecca Lissner explains why military interventions can be crucibles of grand strategy testing strategic axioms on the battlefield and prompting combatant states to reconceive their global roles Through detailed historical case studies of US involvement in the Korean Vietnam and Persian Gulf Wars Lissner shows how each intervention generated searing insights into the capabilities and intentions of America's international adversaries as well as the potential and limits of its own national power By focusing on these three wars of revelation Lissner presents a fresh perspective on the origins and evolutions of US grand strategy from the dawn of the Cold War to its twilight Persuasively argued and historically illuminating Wars of Revelation is essential reading for anyone who crafts studies or follows international security policy

Preventive Attack and Weapons of Mass Destruction Lyle Goldstein, 2006 This comprehensive survey of weapons of mass destruction WMD rivalries places the Bush Doctrine of preemption in historical context arguing that instability fueled by first strike incentives is an inherent byproduct of WMD proliferation

Cutting the Fuse Robert A. Pape, James K. Feldman, 2024-05-31 Cutting the Fuse offers a wealth of new knowledge about the origins of suicide terrorism and strategies to stop it Robert A. Pape and James K. Feldman have examined every suicide terrorist attack worldwide from 1980 to 2009 and the insights they have gleaned from that data fundamentally challenge how we understand the root causes of terrorist campaigns today and reveal why the War on Terror has been ultimately counterproductive Through a close analysis of suicide campaigns by Al Qaeda and other terrorist organizations in Iraq Afghanistan Pakistan Lebanon Israel Chechnya and Sri Lanka the authors provide powerful new evidence that contrary to popular and dangerously mistaken belief only a tiny minority of these attacks are motivated solely by religion Instead the root cause is foreign military occupation which triggers

secular and religious people alike to carry out suicide attacks Cutting the Fuse calls for new effective solutions that America and its allies can sustain for decades relying less on ground troops in Muslim countries and more on offshore over the horizon military forces along with political and economic strategies that empower local communities to stop terrorists in their midst **Nationalism and Ethnic Conflict, revised edition** Michael E. Brown,Owen R. Cote, Jr.,Sean M.

Lynn-Jones,Steven E. Miller,2001-09-14 Understanding the roots and causes of ethnic animosity analyses of recent events in Bosnia Kosovo Rwanda Somalia and the former Soviet Union Most recent wars have been complex and bloody internal conflicts driven to a significant degree by nationalism and ethnic animosity Since the end of the Cold War dozens of wars in Bosnia Kosovo Rwanda Somalia the former Soviet Union and elsewhere have killed or displaced millions of people Understanding and controlling these wars has become one of the most important and frustrating tasks for scholars and political leaders This revised and expanded edition of Nationalism and Ethnic Conflict contains essays from some of the world s leading analysts of nationalism ethnic conflict and internal war The essays from the first edition have been updated and supplemented by analyses of recent conflicts and new research on the resolution of ethnic and civil wars The first part of the book addresses the roots of nationalistic and ethnic wars focusing in particular on the former Yugoslavia The second part assesses options for international action including the use of force and the deployment of peacekeeping troops The third part examines political challenges that often complicate attempts to prevent or end internal conflicts including refugee flows and the special difficulties of resolving civil wars
