Gresley's Master Engineer, Bert Spencer Tim Hillier-Graves,2023-11-23 The great and the good rarely if ever accomplish all they wish to achieve without the able assistance of many skilled men and women To have a very capable person beside you acting as guide confidant and adviser is essential Even better when it is someone with a depth of knowledge equal to or even better than your own If all these skills can be combined in one trusted assistant so much the better To a leader such a person may be valued beyond rubies because they have the ability to take ideas add something and help make them a reality For Herbert Nigel Gresley CME of the LNER Bert Spencer was just such a man As Gresley triumphed his faithful introverted and highly talented assistant remained resolutely in the background playing an unsung yet key role in the development of Gresley s outstanding Pacifics and his many other memorable locomotives For sixteen vibrant years Spencer sat beside his greatly admired leader witnessing and participating in all that happened adding much to an emerging legend that still resounds with us today Here for the first time is Spencer s fascinating story much of it in his own words This was made possible by the thoughts and memories he recorded in letters to friends papers he wrote for the Institution of Locomotive Engineers official documents and much more All this has been edited together to produce a unique and important personal narrative of his life and work Water Resources Data ,1981 Steam on the Eastern & Midland David Knapman,2019-10-30 The author and railway photographer presents a stunning collection of original images showing steam locomotives in action in the mid 20th century This is the second book from David Knapman s personal record of railway views that were captured on black and white film in the late 1950 s and 1960 s until the demise of steam on British Railways Using the same format as its companion volume Steam on the Southern and Western this book presents chapters covering different locations in the Eastern and London Midland regions Knapman captures branch and mainline trains as well as locations of
