Book Of Topiary:

Book of Topiary Charles Curtis, W. Gibson, 2012-08-07 Of historical interest to gardening enthusiasts and historians this topiary gardening guide gives practical advice as well as a fascinating account of topiary through the ages Topiary the art of trimming hedges shrubs and trees into ornamental shapes is perhaps the most distinct and fascinating branch of landscape horticulture Its best known example the palace gardens of Versailles stands as a splendid monument to perfection but today many a finely clipped privet and sheared yew are to be found in the humbler gardens of rural England This book first published in 1904 is a classic in the subject written by two foremost experts of the day Charles H Curtis a Fellow of the Royal Horticultural Society and formerly at Kew Gardens near London and W Gibson head gardener of one of the finest topiary gardens in Britain at Levens Hall Gibson here draws on a wealth of practical experience to provide sound advice to aspiring topiarists His practical sections include The Formation of a Topiary Garden Planting and The Training of Young Trees Curtis traces the long history of topiary from its early origins in ancient Greece to the grand gardens of his time **The Complete Book of Topiary** Barbara Gallup, Deborah Reich, 1987 The first new guide to topiary in over 80 years this guide presents all the classic methods of formal plant shaping and includes 100 plans for indoor and outdoor plant creations anyone can make for themselves Illustrated *The Book of Topiary* Charles Henry Curtis, 1954 *The Book of Topiary* Charles Henry Curtis, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1904 edition Excerpt and always have been one of the principal features of the formal garden and no amount of labour and care should be considered wasted in keeping them in good condition Grass paths require far more labour and attention in keeping them in proper order than those that are composed of some hard substratum especially if there is a considerable amount of traffic on them if such is the case it will be necessary to go over them every spring and re turf places that have got worn out afterwards well rolling them then during the summer and autumn months they will require constant attention in the way of mowing and in keeping the edges well clipped so as to maintain a clean and tidy appearance In the Topiary garden it should always be remembered that everything should be kept in as trim and formal a condition as possible with the exception of the different varieties of plants or shrubs that have been planted for the purpose of giving colour to the garden amongst those Nature should as far as is consistent be encouraged but the walks beds and borders and everything else in the garden should be made to present as formal an appearance as possible If the garden is a formal one let as much as possible in it be made to have a formal appearance In writing on the Topiary garden I have perhaps made it appear to some of those who may read it as hideously unnatural and I am aware there are plenty who maintain that it is a style of gardening that has nothing to recommend or encourage about it But those who think that the formal garden is without its charm make a very great mistake as in every old world garden there is a charm that belongs to it only In the woods and the parks let us by all means study and cultivate
