Book Of Rifles:

Complete Book of Rifles and Shotguns Jack O'Connor, Ray Pioch, Roy Pioch, 1961 **Complete Book of Rifles and Shotguns** Jack O'Connor, 1981 **Great Hunting Rifles** Terry Wieland, 2019-11-19 In *Great Hunting Rifles* firearms expert Terry Wieland leads the reader on a journey through the history of some of the most exquisite rifles made in the twentieth century. The rifles featured in the book all personally owned by the author and described in loving detail were chosen for their particular importance. Each rifle either represents a particular era of gun making, is historically important, or is simply a paragon of gun making skill. In his treatment of these special rifles, Wieland provides a close look at some individual guns that are superb in a unique way and which illustrate high points of the twentieth century. Each chapter is dedicated to one particular rifle and is accompanied by photographs of the author's own examples, including James Woodward hammer double 450 Express 3 1 4 Holland Holland hammer 500 Express 3 1 4 Haenel Mannlicher bolt action 450 Ackley custom rifle Mannlicher Schoenauer Model 1908 Savage Model 1899 Al Biesen custom 270 Winchester 505 Gibbs custom built on a Granite Mountain Mauser 98. And many more. *Great Hunting Rifles* is perfect for anyone who wants to know more about the history of those few special rifles that have made their mark on time.

A Revolution in Arms Joseph G. Bilby, 2006 Mr Bilby takes us through Gettysburg among other places, showing how the Spencer and Henry rifle played a decisive role. *The Wall Street Journal*: A valuable study; his research is balanced and thorough; his writing is lively and clear; his approach gives the book broad appeal. *Journal of Military History*: This is an outstanding book, accurate, judicious, highly readable. *North South*: A *Revolution in Arms* is written in such a good, readable way of a very important time in the history of firearms. *Rifle Magazine*: Well written and researched; certainly should be an addition to your library. Civil War Times: Historians often call the American Civil War the first modern war, pointing to the use of observation balloons, the telegraph, trains, mines, ironclad ships, and other innovations. Although recent scholarship has challenged some of these firsts, the war did witness the introduction of the first repeating rifles. No other innovation of the turbulent 1860s would have a greater effect on the future of warfare. In *A Revolution in Arms: A History of the First Repeating Rifles*, historian Joseph G. Bilby unfolds the fascinating story of how two New England inventors, Benjamin Henry and Christopher Spencer, each combined generations of cartridge and rifle technology to develop reliable repeating rifles. In a stroke, the Henry rifle and Spencer rifle and carbine changed warfare forever, accelerating the abandonment of the formal battle line tactics of previous generations and when properly applied, repeating arms could alter the course of a battle. Although slow to enter service, the repeating rifle soon became a sought-after weapon by both Union and Confederate troops. Oliver Winchester purchased the rights to the Henry and transformed it into the gun that won the West. The Spencer, the most famous of all Civil War small arms, was the weapon of choice for Federal cavalrymen. The revolutionary technology represented by repeating arms used in the American Civil War, including self-contained metallic cartridges, large capacity magazines, and innovative cartridge feeding systems, was copied or

adapted by arms manufacturers around the world and these features remain with us today
