Labor in a Globalizing City Simone Judith Buechler, 2013-12-05 The extraordinary stories of low income women living in S o Paulo industrial case studies and the details of three squatter

settlements and communities in the periphery researched in Simone Buechler's book *Labor in a Globalizing City* allow us to better understand the period of economic transformation in São Paulo from 1996 to 2003. Buechler's in-depth ethnographic research over a period of 17 years includes interviews with a variety of social actors ranging from favela inhabitants to Wall Street bankers. Buechler examines the paradox of a globalizing city with highly developed financial service and industrial sectors but at the same time a growing sector of microenterprises, degraded labor, considerable unemployment, unprecedented inequality, and precarious infrastructure in its low-income communities. The author argues that informalization and low-income women's labor are an integral part of the global economy. Other countries are continuing to use the same kind of neo-liberal economic model even though once again with the latest global financial crisis it has proven to be detrimental to many workers.
