Material Matters Thomas Rau,Sabine Oberhuber,2022-12-30 Our planet is a closed system with limited material resources yet our current economic model is designed in a one way direction from resource extraction to disposal leading to resource depletion This book proposes a new economic model offering an alternative to this linear take make waste economy Material Matters shows a way of creating a circular economy by using the unlimited resources we have renewable energy data and intelligence It describes a system based on circular business models centred on selling performance rather than ownership designing products and buildings as resource banks and equipping products with a material passport to ensure their usability for future generations Businesses thereby become custodians of materials rather than consumers of materials and sellers of products The book evokes the vision of a radically new economic model based on a compelling narrative supported with cases that have been developed in conjunction with major companies for example convincing Philips to sell light instead of lamps saving energy and materials by creating a whole new business model a case which has become iconic for the circular economy Material Matters is not a somber analysis of the state of the planet but a concrete and comprehensive agenda for change offering perspectives for taking action for business and individual consumers alike

Gill, 2020 In *The Proper Study of Religion*, Sam Gill charts an innovative course of development for the academic study of religion by engaging the legacy of Jonathan Z. Smith, Gill's teacher and mentor for fifty years. Building on Smith's foundational legacy through creative encounters, Gill explores an extensive range of absorbing topics, including comparison as essential to academic technique and to human knowledge itself, play philosophically understood as a core dynamic of Smith's entire program, the relationship of academic document-based studies to the sensory-rich real world of religions and self-moving as providing a biological and philosophical foundation on which to develop and expand upon a proper academic study of religion.
