Bound to Read Jeffrey Todd Knight, 2013-05-29 Concealed in rows of carefully restored volumes in rare book libraries is a history of the patterns of book collecting and compilation that shaped the literature of the English Renaissance In this early period of print before the introduction of commercial binding most published literary texts did not stand on shelves in discrete standardized units They were issued in loose sheets or temporarily stitched leaving it to the purchaser or retailer to collect configure and bind them In *Bound to Read* Jeffrey Todd Knight excavates this culture of compilation of binding and mixing texts authors and genres into single volumes and sheds light on a practice that not only was pervasive but also defined the period's very ways of writing and thinking Through a combination of archival research and literary criticism Knight shows how Renaissance conceptions of imaginative writing were inextricable from the material assembly of texts While scholars have long identified an early modern tendency to borrow and redeploy texts *Bound to Read* reveals that these strategies of imitation and appropriation were rooted in concrete ways of engaging with books Knight uncovers surprising juxtapositions such as handwritten sonnets collected with established poetry in print and literary masterpieces bound with liturgical texts and pamphlets By examining works by Shakespeare Spenser Montaigne and others he dispels the notion of

literary texts as static or closed and instead demonstrates how the unsettled conventions of early print culture fostered an idea of books as interactive and malleable Though firmly rooted in Renaissance culture Knight s carefully calibrated arguments also push forward to the digital present engaging with the modern library archives where these works were rebound and remade and showing how the custodianship of literary artifacts shapes our canons chronologies and contemporary interpretative practices

Form, Content, and Power Eric v.d. Luft,2024-08-02 This book is meant to be disconcerting It asks many more questions than it answers but perhaps that is how philosophy should be especially if the questions posed are capable of rousing interest in a topic and stimulating individual thought It challenges sometimes attacks and even ridicules various traditions and theoretical positions in the history of the philosophy of art not for merely destructive or polemical purposes but rather to encourage insightful readers to proceed beyond these positions in their own minds Its arguments are not didactic and its conclusions are not dogmatic but evocative and provisional in the hope that its readers will confront them with a vigor at least equal to that with which these arguments and conclusions have already confronted the traditional opinions Its general aims are 1 to try to answer the basic questions What is art and What is good art and 2 to try to develop a unified theory of art i e a theory which would embrace and be equally applicable to all types and media of art from architecture to rock songs from symphonies to sculpture from Shakespeare to street graffiti Toward this second aim it examines the traditional concept of beauty and finds it incoherent undefinable philosophically unsatisfactory and incapable of serving as the ground of any rigorous unified theory of art because it cannot without equivocation be made equally applicable to all sorts of art Thus instead of beauty it proposes the concept of power which can be clearly and precisely defined and which is not only universally and univocally applicable but also rich enough as a concept to be able to shed light on the whole idea of art It is not a difficult book It is written for people at all levels of erudition from college frosh to tenured professors It does not aim primarily toward any level and tries not to pander but presents interpretations within the philosophy of art which should be both sufficiently original to provide grist for

the professors speculative mills and at the same time sufficiently lucid for beginning students to be able to grasp the main ideas In short the book aims to become both a course textbook and a work which will be discussed at scholarly conferences and written about in journal articles At least with regard to this twofold aim to be simultaneously intelligible to tyros and interesting to experts and its consequent claim to a broad audience it is akin to such works as John Dewey s Art as Experience Robin Collingwood s The Principles of Art or Susanne Langer s Philosophy in a New Key The missing woodland resources Marian Berihuete-Azorín, María Martín Seijo, Oriol López-Bultó, Raquel Piqué, 2022-02-05 Woodlands are a key source of raw materials for many purposes since early Prehistory Wood bark resin leaves fibers fungi moss or tubers have been gathered to fulfill almost every human need That led societies to develop specific technologies to acquire manage transform elaborate use and consume these resources The materials provided by woodlands covered a wide range of necessities such as food shelter clothing or tool production but they also provided resources employed for waterproofing dying medicine and adhesives among many others All these technological processes and uses are commonly difficult to identify through the archaeological record Some materials are exclusively preserved by charring or in anaerobic conditions at very exceptional sites or leave only a very slight trace behind them e g containers Consequently they have received far less attention in archaeobotanical studies compared to other kind of plant materials consumed as food or firewood This book provides an overview of technological uses of plants from the Palaeolithic to the Post Medieval period This collection of papers presents different archaeobotanical and archaeological studies dealing with the use of a wide range of woodland resources most of them among the less visible for archaeology such as bast fibers and fungi These papers present different approaches for their study combining archaeology archaeobotany and ethnoarchaeology
