Broken Bones, Broken Bodies Debra L. Martin, Caryn E. Tegtmeier, 2017-07-14 Injury recidivism is a continuing health problem in the modern clinical setting and has been part of medical literature for some time However it has been largely absent from forensic and bioarchaeological scholarship despite the fact that practitioners work closely with skeletal remains and in many cases skeletal trauma The contributors to this edited collection seek to close this gap by exploring the role that injury recidivism and accumulative trauma plays in bioarchaeological and forensic contexts Case examples from prehistoric historic and modern settings are included to highlight the avenues through which injury recidivism can be studied and analyzed in skeletal remains and to illustrate the
