The Language of Politics Michael L. Geis, 2012-12-06 This study is the second of two I have done concerning how language is used to persuade others to believe things and to do things The first published by Academic Press was The Language of Television Advertising and was concerned with how advertisers use language in their efforts to sell products and services and how consumers could be expected to understand it In this study the focus is on how politicians use language to win elections and get others to accept their policies and programs and on how journalists report the persuasive efforts of politicians I combine an interest in the language of political reporting with an interest in the language of politics for a number of reasons First much of the persuasive rhetoric of politicians is filtered through the minds of political journalists before it reaches the citizenry and we can be reasonably sure that this rhetoric does not come out the way it went in Second the press plays a significant role in determining the nation's political agenda through its choices of what issues will be presented to the public how these issues will be presented and which voices will be heard speaking out on these issues Third political reporting can be persuasive in effect if not in intent and it will be useful I think to understand how this is so
