Developing a Quality Culture Fiona Isabel Mackenzie, 2011-05-25 The purpose of this monograph is to construct a package of proposals which will allow an NHS Board to achieve improvements in the delivery of patient care and implement its clinical governance responsibilities Prepared with a specific Board in mind the recommendations will be relevant to all clinical organisations in Scotland at Trust and NHS Board level The introduction sets out the study and the context for the monograph The study started with the key principles relating to clinical quality outlined in *Designed to Care* The Scottish Office Health Department 1997 and the Scottish Health Plan The Scottish Executive Health Department 2000 and reinforced in other associated documents It examined international writing on improving clinical quality and on the nature of governance arrangements It examined whether it is possible to establish a baseline within the system in terms of clinical quality and examined what now needs to be done to ensure that as Chief Executive of the NHS Board accountabilities can be delivered It also looked at the method by which the NHS Board can best deliver its responsibilities in relation to governance in this area A model for progressing this within an NHS Board has been constructed and an action plan showing how this can be implemented will be prepared It is envisaged that the action plan will have to be implemented over a medium term time scale of 12 18 months Clinical quality of service and governance arrangements are in them selves different issues either can exist alone However unless they fit together with governance arrangements focussed appropriately then this system of working will not lead to any improvement indeed it will detract attention from the real issues of the day and no assurance will be achieved The

conscious and deliberate search for a plan of action that will develop an organization's distinctive competence and compound it. Quality as culture is the amalgamation of behavior patterns of all the stakeholders in terms of beliefs, values, attitudes, etc. In other words, quality management is the epicenter of the competitive organizations of the future in which strategy is the scientific pursuits and culture is the artistic artifacts. Numerous authors have put forth their logical thoughts, have articulated their concepts, and have validated their hypothesis relating to quality management. The papers which have found place in this book aim at creating values of quality management practices.
