Design For More-Than-Human Futures Martín Tironi,Marcos Chilet,Carola Ureta Marín,Pablo Hermansen,2023-09-18

This book explores the work of important authors in the search for a transition towards more ethical design focused on more than human coexistence In a time of environmental crises in which the human species threatens its own survival and the highest level of exacerbation of the idea of a future and technological innovation it is important to discard certain anthropocentric categories in order to situate design beyond the role that it traditionally held in the capitalist world creating opportunities to create more just and sustainable worlds This book is an invitation to travel new paths for design framed by ethics of more than human coexistence that breaks with the unsustainability installed in the designs that outfit our lives Questioning the notion of human centered design is central to this discussion It is not only a theoretical and methodological concern but an ethical need to critically rethink the modern colonialist and anthropocentric inheritance that resonates in design culture The authors in this book explore the ideas oriented to form new relations with the more than human and with the planet using design as a form of political enquiry This book will be of interest to academics and students from the world of design and particularly those involved in emerging branches of the field such as speculative design critical design non anthropocentric design and design for transition      Global Futures Jan Nederveen Pieterse,2000 This work looks beyond the problems of accelerating globalization to examine how humanity can shape it The contributors suggest a variety of perspectives changes policies and institutional reforms to strive for in our increasingly inter connected world      Alternative Futures and the Present Ranabir Samaddar,2023-05-05 This book explores the idea that alternatives to our present condition are available in the present such that a search for alternatives must involve rigorous study of some of its central texts events and thinkers Through engagement with selected modern thinkers texts and events it imagines a different future from the position of the current postcolonial moment indicating the possibilities that emerge from the present and which shape contemporary radical thinking An invitation to imagine a possible future marked with alternative possibilities of conducting struggles and living through contentions and social restructuring it will appeal to scholars with interests in social and political theory political philosophy colonialism and postcolonialism and historical materialism      *Alternative Futures for*

*Design in the Borderlands* Eleni Kalantidou, Tony Fry, 2014-05-09 This book makes a significant contribution to advancing post geographic understandings of physical and virtual boundaries It brings together the emergent theory of border thinking with innovative thinking on design and explores the recent discourse on decoloniality and globalism From a variety of viewpoints the topics engaged show how design was historically embedded in the structures of colonial imposition and how it is implicated in more contemporary settings in the extension of epistemological colonialism The essays draw on perspectives from diverse geo cultural and theoretical positions including architecture design theory and history sociology critical theory and cultural studies The authors are leading and emergent figures in their fields of study and practice and the geographic scope of the chapters ranges across Europe the Middle East Africa South America Asia and the Pacific In recognition of the complexity of challenges that are now determining the future security of humanity *Design in the Borderlands* aims to contribute to thinking futures by adding to the increasingly significant debate between design in the context of the history of Western modernity and decolonial thought
