Universities and economic development in Africa

Pact academic core and coordination draws together evidence and synthesises the findings from eight African case studies

The three key findings presented in this report are as follows

- 1 There is a lack of clarity and agreement about a development model and the role of higher education in development at both national and institutional levels
- 2 There is however an increasing awareness particularly at government level of the importance of universities in the global context of the knowledge economy
- 3 Research production at the eight African universities is not strong enough to enable them to build on their traditional undergraduate teaching roles and make a sustained contribution to development via new knowledge production

A number of universities have manageable student staff ratios and adequately qualified staff but inadequate funds for staff to engage in research

In addition the incentive regimes do not support knowledge production

3 In none of the countries in the sample is there a coordinated effort between government external stakeholders and the university to systematically strengthen the contribution that the university can make to development

While at each of the universities there are exemplary development projects that connect strongly to external stakeholders and strengthen the academic core the challenge is how to increase the number of these projects

The project on which this report is based forms part of a larger study on Higher Education and Economic Development in Africa undertaken by the Higher Education Research and Advocacy Network in Africa HERANA

HERANA is coordinated by the Centre for Higher Education Transformation in South Africa

African Union and Agenda 2063: The Past, Present and Future

Adeoye O. Akinola, Khabele Matlosa, 2025-06-28

Since its official launch on 9 July 2002 in Durban South Africa the African Union AU has taken on the complex mantle of promoting peace governance development and continental integration building on the legacy of its predecessor the Organisation of African Unity OAU

While the OAU championed the liberation and unity of African states the AU expanded this vision under the broader framework of Pan Africanism aligning it with modern challenges and aspirations

As the AU marked its 20th anniversary in 2022 there emerged a critical need to evaluate

its performance particularly in relation to Agenda 2063 The Africa We Want a strategic vision for Africa's long term transformation adopted in 2013 Understanding the AU's trajectory requires reflection on the historical struggles that shaped Pan Africanism including colonialism apartheid and racial injustice Key milestones such as the African Continental Free Trade Area AfCFTA reflect progress but limited advancement in flagship projects like the Free Movement of Persons and Silencing the Guns initiative highlights persistent challenges This book African Union and Agenda 2063 The Past Present and Future undertakes a critical assessment of the AU's 20 year record aiming to reinvigorate Pan African consciousness and examine the structural and political constraints hindering the Union's effectiveness in achieving lasting peace prosperity and unity across the continent Scientific Communication in African Universities Damtew Teferra, 2004-06 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company Politics and higher education in East Africa from the 1920s to 1970 Bhekithemba R. Mngomezulu, 2012-01-01 The main objective of this book is to establish the salient reasons why higher education was developed in East Africa and specifically why the Federal University of East Africa was constituted The book will identify the factors responsible for the collapse of this regional institution in June 1970 Another objective of this book is to demonstrate how the history of the University of East Africa sheds light on colonial and post colonial policies on education especially higher education as a contribution to educational planning in contemporary Africa The Athens of West Africa Daniel J. Paracka, Jr., 2004-03 This book is about Fourah Bay College FBC and its role as an institution of higher learning in both its African and international context The study traces the College's development through periods of missionary education 1816 1876 colonial education 1876 1938 and development education 1938 2001 *Regionalization of Higher Education in Africa* Emnet Tadesse Woldegiorgis, 2017 Regionalization of higher education in Africa is the least researched topic in the field of Social Science IN this regard this book is a pioneer in terms of exploring both the historical and theoretical dynamics of regionalization processes within Africa THE interplay manifested within the book between Political Science theories and higher education concepts makes the whole analysis strong and solid THE book raises fundamental questions that focus on context and formation operationalization and implications and challenges and prospects of regionalization processes in Africa IN doing so it gives both the analytical contexts of the evolution of higher education regionalization in Africa and the current initiatives by the African Union as a whole *Internationalisation of African Higher Education* Chika Sehoole, Jane Knight, 2013-10-30 The role of higher education especially the international dimension is given little importance in the discourse on achieving the Millennium Development Goals MDGs in Africa This book aims to change that The potential of higher education's contribution to Africa's development remains unrealized and often misunderstood In today's globalised world which prioritises economic growth through liberalised trade and competitive market strategies much emphasis has been placed on higher education's ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy While these are important contributions the book argues that international

higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent. It is against this background that the African Network for the Internationalisation of Education (ANIE) undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs. Through empirical research, seven case studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women's empowerment, combating HIV/AIDS, and establishing global partnerships for development through academic mobility, joint research initiatives, curriculum innovation, and policy development.

Higher Education: Handbook of Theory and Research 18

J.C. Smart, 2003-09-30. This title consists of 19 essays dealing with the medical knowledge and beliefs of cultures outside of the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal Australian, Indian, Egyptian, and Tibetan medicine, the book includes essays on comparing Chinese and western medicine and religion, the medical practices to the cultures which produced them. Each essay is well illustrated and contains an extensive bibliography. Because the geographic range is global, the book should fill a gap in both the history of medicine and in cultural studies. It should find a place on the bookshelves of advanced undergraduate students, graduate students, and scholars, as well as in libraries serving those groups.

African Higher Education in the 21st Century, 2020-09-25. How can African philosophy of education contribute to contemporary debates in the context of complexities, dilemmas, and uncertainties in African higher education? The capacity for self-reflection, self-evaluation, and self-criticism enables African philosophy of higher education to examine and re-examine itself in the context of current issues in African higher education. The reflective capacity is in line with the Socratic dictum: know thyself. **African Higher Education in the 21st Century: Epistemological, Ontological, and Ethical Perspectives** responds to the demands for reflection and self-knowledge by drawing from ontology, epistemology, and ethics in an attempt to address issues that affect African higher education as they connect with the past, present, and future.

Higher Education for and beyond the Sustainable Development Goals, Tristan McCowan, 2019-08-29. This book analyses the role of the university in working towards the Sustainable Development Goals. In contrast to the previous Millennium Development Goals, higher education is seen to have a crucial role in this new agenda. Yet how can the university fulfil these weighty expectations and are the dominant trends in higher education supporting or undermining this vision? This book draws on the idea of the developmental university, a model characterised by its porous boundaries with society and commitment to teaching, research, and community engagement in the public interest. The author examines case studies from Latin America, Africa, and other regions to analyse how this model can be revived, countering recent trends of marketisation, status competition, and unbundling. The book also considers alternatives to the developmental model, drawing on indigenous knowledge systems, looking beyond the SDG framework to the creation of a new form of society. This timely volume will be of interest and value to those working in the field of sustainable development and to students and scholars of comparative
