STORIES FROM
EMERGENCY MEDICINE

FRANK HUYLER

Blood Of Strangers Stories From Emergency Medicine

Wendy Simonds

Blood Of Strangers Stories From Emergency Medicine:

The Blood of Strangers Frank Huyler, 1999-08-03 The Blood of Strangers is a collection of short autobiographical pieces that document the author's experiences in emergency medicine Through these stories Huyler explores the frailties of his patients and their doctors as he reveals the uncertainties both moral and scientific that pervade professional medicine

The Blood of Strangers Frank Huyler, 2009-09 Reminiscent of Chekhov's stories The Blood of Strangers is a visceral portrayal of a physician's encounters with the highly charged world of an emergency room In this collection of spare and elegant stories Dr Frank Huyler reveals a side of medicine where small moments the intricacy of suturing a facial wound the bath a patient receives from her husband and daughter interweave with the lives and deaths of the desperately sick and injured The author presents an array of fascinating characters both patients and doctors a neurosurgeon who practices witchcraft a trauma surgeon who unexpectedly commits suicide a wounded murderer a man chased across the New Mexico desert by a heat seeking missile At times surreal at times lyrical at times brutal and terrifying The Blood of Strangers is a literary work that emerges from one of the most dramatic specialties of modern medicine This deeply affecting first book has been described by one early reader as the best doctor collection I have seen since William Carlos Williams's The Doctor Stories

The Blood of Strangers Frank Huyler, 1999-01-01 A collection of short essays set in the ER introduces a neurosurgeon who practices witchcraft a trauma surgeon who commits suicide a wounded murderer and a man chased across the New Mexico desert by a missile

The Blood of Strangers Frank Huyler, Michael Chabon, 2000 Reminiscent of Chekhov's stories The Blood of Strangers is a visceral portrayal of a physician's encounters with the highly charged world of an emergency room In this collection of spare and elegant stories Dr Frank Huyler reveals a side of medicine where small moments the intricacy of suturing a facial wound the bath a patient receives from her husband and daughter interweave with the lives and deaths of the desperately sick and injured The author presents an array of fascinating characters both patients and doctors a neurosurgeon who practices witchcraft a trauma surgeon who unexpectedly commits suicide a wounded murderer a man chased across the New Mexico desert by a heat seeking missile At times surreal at times lyrical at times brutal and terrifying The Blood of Strangers is a literary work that emerges from one of the most dramatic specialties of modern medicine This deeply affecting first book has been described by one early reader as the best doctor collection I have seen since William Carlos Williams's The Doctor Stories

What If Medicine Disappeared? Gerald E. Markle, Frances B. McCrea, 2014-02-07 In this thought provoking book sociologists Gerald E Markle and Frances B McCrea ask what would happen if Western medicine were to disappear Using a rigorous and imaginative method a thought experiment Markle and McCrea evaluate medicine's impact on mortality and our national health They examine various aspects of medicine such as primary care surgery emergency medicine pharmaceuticals and mental illness treatment and convincingly point out the problems that health care actually causes Supporting their ideas with statistics and studies from

medical and social science literature Markle and McCrea argue that the medical model despite its tremendous budget and hype accomplishes far less than most would think Their conclusions should promote critical review and lively discussion among medical consumers as well as among health care professionals and policy makers

The Woman Who Decided to Die Ronald Munson, 2009-03-27 Advances in medical technology force us to struggle with new and often gut wrenching decisions How do we know when someone is dead and not just in a coma Should a convicted felon qualify for a new heart In *The Woman Who Decided to Die* novelist and medical ethicist Ronald Munson takes readers to the very edges of medicine where treatments fail and where people must cope with helplessness mortality and doubt Using personal narratives that place us right next to doctors patients and care givers as they make decisions Munson explores ten riveting case based stories told with a writer's eye for illuminating detail These include a young woman with terminal leukemia more worried about her family than herself a stepfather asked to donate a liver segment to his stepson a student who believes she is being controlled by invisible Agents and a psychiatrist patient who prizes his autonomy until the end Raising fundamental questions about human relationships this is an essential book about the very nature of life and death

Emergency Medical Services, 2001 Who Count as Persons? John F. Kavanaugh, 2001-05-23 Just what is a human being Who counts The answers to these questions are crucial when one is faced with the ethical issue of taking human life In this affirmation of the intrinsic personal dignity and inviolability of every human individual John Kavanaugh S J denies that it can ever be moral to intentionally kill another Today in every corner of the world men and women are willing to kill others in the name of realism and under the guise of race class quality of life sex property nationalism security or religion We justify these killings by either excluding certain humans from our definition of personhood or by invoking a greater good or more pressing value Kavanaugh contends that neither alternative is acceptable He formulates an ethics that opposes the intentional killing not only of medically marginal humans but also of depersonalized or criminalized enemies Offering a philosophy of the person that embraces the undeveloped the wounded and the dying he proposes ways to recover a personal ethical stance in a global society that increasingly devalues the individual Kavanaugh discusses the work of a range of philosophers artists and activists from Richard Rorty and S ren Kierkegaard to Albert Camus and Woody Allen from Mother Teresa to Jack Keavorkian His approach is in stark contrast to that of writer Peter Singer and others who believe that not all human life has intrinsic moral worth It will challenge philosophers students of ethics and anyone concerned about the depersonalization of contemporary life

Hospital Land USA Wendy Simonds, 2016-11-03 In *Hospital Land USA* Wendy Simonds analyzes the wide reaching powers of medicalization the dynamic processes by which medical authorities institutions and ideologies impact our everyday experiences culture and social life Simonds documents her own Hospital Land adventures and draws on a wide range of U S cultural representations from memoirs to medical mail from hospital signs to disaster movies in order to urge critical thinking about conventional notions of care health embodiment identity suffering and mortality This book is

intended for general readers medical practitioners undergraduate and graduate students in courses on medical sociology medicine medical ethics nursing public health carework visual culture cultural studies and gerontology *The Daily Practice of Compassion* Dora L. Wang, Shannan L. Carter, University of New Mexico. School of Medicine, 2014-12-30 Rich with anecdotes and personality Dora Wang's account is a must read for anyone curious about health care in New Mexico **The Pharos of Alpha Omega Alpha** Alpha Omega Alpha, 2001 **Criminal Liability for Non-Aggressive Death** Sally Cunningham, 2016-05-13 The crime of manslaughter exists as a catch all offence to punish those who are blameworthy in causing the death of another but whose culpability falls short of that required for murder Manslaughter is an extremely broad offence and it has a difficult task in ensuring that all those who warrant punishment for non aggressive deaths are convicted Simultaneously it should not be too broad in covering those who do not warrant punishment for such deaths There is little consistency in whether a particular dangerous activity leads to liability for a specific offence or for the generic offence of manslaughter when death is caused This book examines the current law and includes a variety of perspectives on the subject with chapters on specific modes of killing as well as issues that permeate all areas The first half of the book deals with issues such as how any special offences for non aggressive death should relate to a hierarchy of homicide offences The second half deals with issues specific to different activities which may or may not justify the creation of specific homicide offences The book includes a comparative chapter on Australian law **Beyond Words** Kathlyn Conway, 2013-05-15 Kathlyn Conway opens primordial questions about the shattering events of illness through close readings of selected illness narratives proposing that only writing of a daring kind can utter the knowledge of the self telling body Wielding her ferocious intellect and braving exposure to self and other Conway makes original discoveries about writing and illness and more stunningly about writing and life Not a book about illness this is a book about writing and being It is taut brave unequalled in our scholarship and true Conway joins our most powerful investigators of the human predicament of mortality helping us to see helping us to live Rita Charon Columbia University Program in Narrative Medicine Published accounts of illness and disability often emphasize hope and positive thinking the woman who still looked beautiful after losing her hair the man who ran five miles a day during chemotherapy This acclaimed examination of the genre of the illness narrative questions that upbeat approach Author Kathlyn Conway a three time cancer survivor and herself the author of an illness memoir believes that the triumphalist approach to writing about illness fails to do justice to the shattering experience of disease By wrestling with the challenge of writing about the reality of serious illness and injury she argues writers can offer a truer picture of the complex relationship between body and mind *Veins of Devotion* Jacob Copeman, 2008-11-18 According to public health orthodoxy blood for transfusion is safer when derived from voluntary nonremunerated donors As developing nations phase out compensated blood collection efforts to comply with this current policy many struggle to keep their blood stores up *Veins of Devotion* details recent collaborations between guru led devotional movements and public health campaigns to encourage

voluntary blood donation in northern India Focusing primarily on Delhi Jacob Copeman carefully situates the practice within the context of religious gift giving sacrifice caste kinship and nationalism The book analyzes the operations of several high profile religious orders that organize large scale public blood giving events and argues that blood donation has become a site not only of frenetic competition between different devotional movements but also of intense spiritual creativity Despite tensions between blood banks and these religious groups their collaboration is a remarkable success story the nation's blood supply is replenished while blood donors discover new devotional possibilities
