*Blood on the Wattle* Bruce Elder,1994      **Policing the Lucky Country** Mike Enders,Benoît Dupont,2001 Policing The Lucky Country addresses key challenges of contemporary Australian policing and places them within the context of Australia's particular culture and history The book's approach is to combine policing case studies with an analysis of the wider social and political environment Policing students are given information which enables them to think critically about contemporary policing practice and to understand the factors behind pervasive attitudes in the forces and the community In this way it aims to increase each officer's range of responses leading to appropriate policing practices and increased safety for the officer One of the key strengths of the book is the discussion of policing and indigenous persons with articles on policing indigenous peoples and indigenous participation in policing Specific police indigenous clashes are examined and situated within the Aboriginal policies of the day This historical perspective illuminates the discussion of current police force relationships with and responsibilities towards indigenous persons Other issues considered the use of technology the enforcement of drug laws the maintenance of public order the role of police in industrial disputes the social construction of crime are studied in similar fashion and provide a useful source of information and discussion about areas of policing relevant to contemporary police work This book is designed for first year policing students but will also be useful in criminology courses      Genocide and Settler Society A. Dirk Moses,2005-03-01 Colonial Genocide has been seen increasingly as a stepping stone to the European genocides of the twentieth century yet it remains an under researched phenomenon This volume reconstructs instances of Australian genocide and for the first time places them in a global context Beginning with the arrival of the British in 1788 and extending to the 1960s the authors identify the moments of radicalization and the escalation of British violence and ethnic engineering aimed at the Indigenous populations while carefully distinguishing between local massacres cultural genocide and genocide itself These essays reflect a growing concern with the nature of settler society in Australia and in particular with the fate of the tens of thousands of children who were forcibly taken away from their Aboriginal families by state agencies Long considered a relatively peaceful settlement Australian society contained many of the pathologies that led to the exterminatory and eugenic policies of twentieth century Europe      Blood on the Wattle Bruce Elder,1998 This revised and updated edition includes new information on three key events in Aboriginal European relations and gives an overview of the Stolen Generation report which makes it the most comprehensive and up to date book on the subject in the market First edition published 1988      *The Truth about the Killing of Daniel Yock* ,1994 Records the campaign for a public hearing initiated by the Socialist Labour League into the death of Daniel Yock reports on the public hearing findings      **Van Diemen's Land** Murray Johnson,Ian McFarlane,2015-03-01 The history of Aborigines in Van Diemen's Land is long The first Tasmanians lived in isolation for as many as 300 generations after the flooding of Bass Strait Their struggle against almost insurmountable odds is one worthy of respect and admiration not to mention serious attention This broad ranging book is a

comprehensive and critical account of that epic survival up to the present day Starting from antiquity the book examines the devastating arrival of Europeans and subsequent colonisation warfare and exile It emphasises the regionalism and separateness a consistent feature of Aboriginal life since time immemorial that has led to the distinct identities we see in the present including the unique place of the islanders of Bass Strait Carefully researched using the findings of archaeologists and extensive documentary evidence some only recently uncovered this important book fills a long time gap in Tasmanian history

Barbaric Civilization Christopher John Powell, 2011 Why have the largest mass murders in human history taken place in the past hundred years Why have European colonizers so often denied the humanity of the colonized In *Barbaric Civilization* Christopher Powell advances a radical thesis to answer these questions that civilization produces genocides From its beginnings in the early twelfth century the Western civilizing process has involved two interconnected transformations the monopolization of military force by sovereign states and the cultivation in individuals of habits and dispositions of the kind that we call civilized The combined forward movement of these processes channels violent struggles for social dominance into symbolic performances But even as the civilizing process frees many subjects from the threat of direct physical force violence accumulates behind the scenes and at the margins of the social order kept there by a deeply habituated performance of dominance and subordination called deferentialization When deferentialization fails difference becomes dangerous and genocide becomes possible Connecting historical developments with everyday life occurrences and discussing examples ranging from thirteenth century Languedoc to 1994 Rwanda Powell offers an original framework for analyzing comparing and discussing genocides as variable outcomes of a common underlying social system raising unsettling questions about the contradictions of Western civilization and the possibility of a world without genocide

**The Neglected War** Hermann Hiery, 1995-12-01 In the summer of 1914 Germany's Pacific colonies were a quiet backwater of its empire. But the shots of Sarajevo shattered the Pacific as well as Europe. Within weeks of the outbreak of World War I, Western Samoa, German territory to be taken in the war, New Guinea and the Micronesian lands were occupied by Australian, New Zealand and Japanese forces. Current historiography claims that World War I made little difference to the indigenous populations of the Pacific and that this change in colonial masters had little effect on those they ruled. *The Neglected War* challenges this interpretation. World War I and its aftermath, Hermann Hiery claims, had a tremendous effect on the Pacific Islands. Hiery details the policies pursued by Australia, New Zealand and Japan, showing how each viewed and treated the indigenous populations. Administered by military officers with little civil oversight, the new colonial regimes employed the mandates they had received at the Paris Peace Conference with impunity. Hiery's scrupulous review of the evidence gathered from largely unknown primary sources has uncovered a story of masquerades and coverups, negligence and duplicity, leading in some cases to full-blown atrocities. Most of all, he tells the story of Pacific Islanders: how they coped with the dramatic changes brought about by the war and how they tried to influence its consequences. Many Islanders were fully aware that their political destiny was to be redefined after the war, and a few even saw it as an opportunity to achieve independence. This is also the story of their failure. Behind the evidence gathered here lie fundamental questions: How important are the differences in the nature of particular colonial regimes, and what effect do such differences have on indigenous peoples? How do indigenous peoples interpret disparities in colonial rule? This revisionist work addresses these issues while shedding light on a crucial time in the history of the Pacific.
