

What puts you at risk for high blood pressure?

Age

Blood pressure tends to increase with age but it can also affect you at a younger age.

Family history and genetics

High blood pressure often runs in families.

Sex

Before age 60, more men than women have high blood pressure. After 60, more women than men have it.

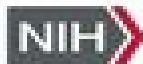

Lifestyle habits

Eating too much salt, smoking and not getting enough physical activity can raise our blood pressure.

Race or ethnicity

While anyone can have high blood pressure, African Americans tend to get it at a younger age.

United States. General Accounting Office, 1997 Risk Management in Blood Transfusion: The Virtue of Reality C.Th. Smit Sibinga, H.J. Alter, 2013-06-29 Mr Chairman ladies and gentlemen with great pleasure I like to welcome you in the city of Groningen and hope that you will have an enriching and enlightening discussion on the conference theme on risk management in blood transfusion The organisation of this symposium aims at scientific networking by discussing in an international forum the most important themes of current interest in relation to the state of the art in transfusion medicine Dr Cees Smit Sibinga took the initiative in 1976 to start organising the blood bank symposia as they were named in the beginning Without doubt these symposia have contributed considerably to the development of transfusion medicine To illustrate the fact that these symposia came to my attention I recollect that I have attended the symposium in 1978 chaired by Dr Leo Vroman in my capacity in those days of alderman deputy mayor of the city So it has been a long time since After having been away from Groningen for 18 years I have been inaugurated last week as a mayor and it is a pleasure to be again in your midst The series of annual symposia on blood transfusion have contributed to mark the city of Groningen on the map of the international scientific world A great number of prestigious institutes all over the world involved in the development of transfusion medicine have linked to Groningen and we are proud of that **Blood Groups** Kaneez Fatima Shad, 2022-08-17 Every cell in our body including red blood cells is covered with special markers called antigens a substance that triggers the immune system response Millions of antigens are present on the membrane of red blood cells and are ignored by the immune system because they are self antigens However if a person receives a transfusion of blood that contains different antigens from their own blood there will be a severe and immediate attack by the cells of the immune system Therefore it is important to use the patient's same blood group for the transfusion The blood group antigens not only perform a critical role in the function of cells but can also be used by viruses to gain access into the cells This book includes nine chapters on different blood group

antigens and their activities behind the scenes Chapters address blood antigens and their association with cardiovascular diseases thromboembolic diseases malaria and many other diseases and infections *Blombäck's Essential Guide to Blood Coagulation* Jovan P. Director, National Heart, Lung, and Blood Institute National Heart, Lung, and Blood Institute, 1982 New Developments in Blood Transfusion Research Brian R. Peterson, 2006 Although blood transfusion saves lives and reduces morbidities in many clinical diseases and conditions it is associated with certain risks A transfusion related adverse event also called transfusion reaction is any unfavourable event occurring in a patient during or after blood transfusion About 0.5 per cent to 3 per cent of all transfusions result in some adverse events but the majority of them are minor reactions with no significant consequences In general transfusion related adverse events are categorised as infectious and non infectious However there are other classifications in the literature based on time of occurrence i.e. acute versus delayed or physiological mechanism i.e. immune mediated versus non immune mediated A significant proportion of adverse events may occur as a result of errors in preparation ordering or administration of blood and blood products This book contains the latest research

in this essential field which has been revolutionised in recent decades *National Heart, Blood Vessel, Lung, and Blood Program: Panel reports: pt. 1.
