production and practical action No other philosopher has paid such careful attention to the consequences of the elision of sexual difference in philosophical thought However at a time when notions of sexual and gender difference are hotly contested Irigaray s thought has often been dismissed as essentialist or reductively binary This book brings together leading scholars to consider the philosophical implications of Irigaray s writing on sexual difference particularly for issues of gender and race Their essays directly confront the charge of essentialism exploring how Irigaray s thought opens new possibilities for understanding the complexity of gender identities including nonbinary and trans experiences as well as alternative configurations of masculinity and femininity Though Irigaray is sometimes accused of a failure to appreciate racial difference contributors show the productive role of her work in thinking race This book also illuminates how Irigaray s work provides creative practices that help realign human experience and our relations with nature and each other

The Irreducible Reality of the Object Charles William Johns, 2020-08-17 This intriguing and compact book investigates whether or not philosophy can have a use in the face of capitalist realism today Can philosophy study everyday objects like computers and mobile phones Can it think of advertising the population electricity buildings and even dreams as objects in their own right which convey particular and novel qualities when analysed Johns book starts from an immanent phenomenological study of objects arguing that such objects disclose larger systems of anthropological meaning and control The author moves away from the Husserlian essence of the object and embeds his objects in a series of uses or equipment as Heidegger called it However Johns makes a speculative move by positing the very existence of such uses distinct from the human and first person phenomenological consciousness This is when the annals of phenomenology meet contemporary strands of realism such as Speculative and Object Oriented models For Johns the world is in a constant state of being utilised not merely through humans but through objects and their relations and not only on a macro scale but on a micro scale described by the theories of quantum physics The object then becomes a locus of use yet importantly one that can never be reduced to relations alone This is because the author believes that certain aspects of a relation withholds itself in its act of relating The mutual dynamics of relation and property are thus rearticulated in a new light This novel description of relation places Johns squarely between relational ontologies such as Deleuze Latour and Garcia and non relational ontologies Harman This work is invaluable to researchers and any reader of contemporary philosophy in the age of advanced technology and capitalism
