Blow Up:

Blow-up Michelangelo Antonioni,1984 Blow-up Theories for Semilinear Parabolic Equations Bei Hu,2011-03-17

There is an enormous amount of work in the literature about the blow up behavior of evolution equations It is our intention to introduce the theory by emphasizing the methods while seeking to avoid massive technical computations To reach this goal we use the simplest equation to illustrate the methods these methods very often apply to more general equations Blow-up for Higher-Order Parabolic, Hyperbolic, Dispersion and Schrodinger Equations Victor A. Galaktionov, Enzo L.

Mitidieri, Stanislav I. Pohozaev, 2014-09-22 Blow up for Higher Order Parabolic Hyperbolic Dispersion and Schrodinger Equations shows how four types of higher order nonlinear evolution partial differential equations PDEs have many commonalities through their special quasilinear degenerate representations The authors present a unified approach to deal with these quasilinear PDEs The book *Type II Blow Up Manifolds for the Energy Supercritical Semilinear Wave Equation* Charles Collot, 2018-03-19 Our analysis adapts the robust energy method developed for the study of energy critical bubbles by Merle Rapha el Rodnianski Rapha el Rodnianski and Rapha el Schweyer the study of this issue for the supercritical semilinear heat equation done by Herrero Vel azquez Matano Merle and Mizoguchi and the analogous result for the energy supercritical Schr odinger equation by Merle Rapha el Rodnianski **On Pseudoconformal Blow-Up Solutions to the**

Self-Dual Chern-Simons-Schrödinger Equation: Existence, Uniqueness, and Instability Kihyun Kim, Soonsik Kwon, 2023-04-07 View the abstract *Geometric Sturmian Theory of Nonlinear Parabolic Equations and Applications* Victor A. Galaktionov, 2004-05-24 Unlike the classical Sturm theorems on the zeros of solutions of second order ODEs Sturm s evolution zero set analysis for parabolic PDEs did not attract much attention in the 19th century and in fact it was lost or forgotten for almost a century Briefly revived by P lya in the 1930 s and rediscovered in part several times since it was not until the 1980 s that the Sturmian argument for PDEs began to penetrate into the theory of parabolic equations and was found to have several fundamental applications Geometric Sturmian Theory of Nonlinear Parabolic Equations and Applications focuses on geometric aspects of the intersection comparison for nonlinear models creating finite time singularities After introducing the original Sturm zero set results for linear parabolic equations and the basic concepts of geometric analysis the author presents the main concepts and regularity results of the geometric intersection theory G theory Here he considers the general singular equation and presents the geometric notions related to the regularity and interface propagation of solutions In the general setting the author describes the main aspects of the ODE PDE duality proves existence and nonexistence theorems establishes uniqueness and optimal Bernstein type estimates and derives interface equations including higher order equations The final two chapters explore some special aspects of discontinuous and continuous limit semigroups generated by singular parabolic equations Much of the information presented here has never before been published in book form Readable and self contained this book forms a unique and outstanding reference

on second order parabolic PDEs used as models for a wide range of physical problems Antonioni, or, The Surface of the World Seymour Chatman, 2023-11-15 Michelangelo Antonioni is one of the great visual artists of the cinema The central and distinguishing strength of Antonioni's mature films Seymour Chatman argues is narration by a kind of visual minimalism by an intense concentration on the sheer appearance of things and a rejection of explanatory dialogue Though traditional audiences have balked at the opacity of Antonioni's films it is precisely their rendered surface that is so eloquent once one learns to read it Not despite but through their silences the films show a deep concern with the motives perceptions and vicissitudes of the emotional life This study covers films not dealt with in any other book on the great director including *Il mistero di Obertwald* 1980 and *Identificazione di una donna* 1982 which have not yet been seen in the U S Its coverage of the early documentaries and features when Antonioni was forging his new and original stylistic language is especially full In a free ranging analysis of the evolution of Antonioni's style that quotes liberally from Antonioni's own highly articulate writings and interviews Chatman shows how difficult it was for the filmmaker to liberate his art from the conventional means of rendering narrative especially dialogue conventional sound effects and commentative music From his first efforts to his triumphant achievements in the tetralogy of *L'avventura* *L'eclisse* and *Il deserto rosso* Antonioni's acute sensibility struggled to achieve the mastery that has won him a secure place in film history Chatman's study is the only complete account of Antonioni's work available in English Its novel visual approach to the films while attract not only film scholars but also readers interested in painting and architecture both important elements of Antonioni's work Michelangelo Antonioni is one of the great visual artists of the cinema The central and distinguishing strength of Antonioni's mature films Seymour Chatman argues is narration by a kind of visual minimalism by an intense concentration on the sh
