Even though there are **no currents** in the Blue Hole, accounts suggest the death occurs due to **nitrogen narcosis** as they go deeper. According to reports, divers cross 135ft or more and start feeling **numbing sensation or euphoria**, eventually causing death.

The Hole forms a perfect circle amidst the coral reef, and is also a part of the Belize Barrier Reef Reserve System.

a UNESCO World Heritage Site.

The French explorer revealed the marvelous Blue Hole to the world through a television series called **"The Undersea World of Jacques Cousteau"**.

It also offered researchers evidence to understand the **mystery of the fall of the Mayan civilization.**
