Archeology at the Petersen House Matthew R. Virta,1991 *Approaches to Material Culture Research for Historical Archaeologists* ,2000 *Exploring the Archaeology of the Modern City in Nineteenth-century Australia* Tim Murray,Penny Crook,2019-11-05 This book presents research into the urban archaeology of 19th century Australia It focuses on the detailed archaeology of 20 cesspits in The Rocks area of Sydney and the Commonwealth Block site in Melbourne It also includes discussions of a significant site in Sydney First Government House The book is anchored around a detailed comparison of contents of 20 cesspits created during the 19th century and examines patterns of similarity and dissimilarity presenting analyses that work towards an integration of historical and archaeological data and perspectives The book also outlines a transnational framework of comparison that assists in the larger context related to building a truly global archaeology of the modern city This framework is directly related a multi scalar approach to urban archaeology Historical archaeologists have been advocating the need to explore the archaeology of the modern city using several different scales or frames of reference The most popular and most basic of these has been the household However it has also been acknowledged that interpreting the archaeology of households beyond the notion that every household and associated archaeological assemblage is unique requires archaeologists and historians to compare and contrast and to establish patterns These comparisons frequently occur at the level of the area or district in the same city where archaeologists seek to derive patterns that might be explained as being the result of status class ethnicity or ideology Other less frequent comparisons occur at larger scales for example between cities or countries acknowledging that the archaeology of the modern western city is also the archaeology of modern global forces of production consumption trade immigration and ideology formation This book makes a contribution to that general literature *Archaeology of Urban America* Roy S. Dickens,2014-05-19 Archaeology of Urban America The Search for Pattern and Process is composed of three parts namely Strategies and Methods Site Formation Structure and Pattern and Artifact Analysis and Interpretation The Strategies and Methods section centers on the general questions asked by urban archaeologists as well as on the ways they design their research to elucidate those questions The Site Formation Structure and Pattern section is generally comprised of chapters classified as test cases emphasizing the approaches interpretation and even direct extension of larger research designs Lastly the Artifact Analysis and Interpretation section deals with intersite and intrasite patterning of artifact assemblages as well as with specific class of artifacts This material will help stimulate a dialogue among archaeologists who have chosen the American city as their subject This book will also be useful to urban sociologists economists cultural anthropologists and historians Northwest Anthropological Research Notes Roderick Sprague,Deward E. English Pottery 1620-1840 Robin Hildyard, 2005-08 Based around the matchless collections of British ceramics in the Victoria and Albert Museum which curators began to assemble as early as the 1840s this book charts the story of their development from the simple slipware drinking vessel of the seventeenth century to the sophisticated enamelled and transfer printed tableware of the early 1800s The narrative takes us through successive changes of taste and manners as British potters assimilated and adapted new and often disparate influences from Europe and the Far East Ceramics ubiquitous disposable and quintessentially domestic tended to reflect social changes quicker than other branches of the applied arts for example new fashions in dining and the taking of tea were responsible for major aspects of design and decoration while the rapid rise of the Staffordshire figure enabled it to become a vehicle for satire religion or the commemoration of wildly popular but ephemeral events such as boxing matches and visits from touring menageries Keeping carefully chosen pieces illustrated at the forefront of his discussion Robin Hildyard treats the subject variously by material form decoration or by broader theme sometimes cutting across traditional boundaries in order to look behind established myths and the often misleading evidence of what has survived The methods and history of manufacture are fully explored from the workshop of the independent village potter to the industrialized nineteenth century factory struggling with the stormy beginnings of trade unionism The complex trade in ceramics both at home and abroad and the transition from utilitarian household object to cherished item in collector's cabinet is also examined along with the symbiotic relationship between collector and museum This volume filling the gap in current ceramic literature between narrower scholarly studies and the opulent catalogues of private collections presents an expert and yet highly accessible view of a particularly rich seam of British material culture guiding us from familiar ground into wider and sometimes uncharted territory **BOOK JACKET**
