Blue-green Algae for Rice Production G. S. Venkataraman, 1981-01-01 Distribution and succession of blue green algae in rice fields Algal nitrogen fixation in rice soils Methods for the assay of nitrogen fixation Algal application and soil properties Pesticides and blue green algae Crop alga association Establishment of blue green algae in rice soils Algal application and rice yield Production of algae for field application Recommendations for field application of blue green algae Economics of algal production and application Indian State level organizational pattern for the transfer of blue green algae technology Elements of development programmes Appendices General features of blue green algae List of nitrogen fixing blue green algae Keys to the orders and genera of some nitrogen fixing blue green algae Description of the nitrogen fixing blue green algal genera Culture media Isolation and quantification procedures Proforma for compiling information on the production and performance of algal fertilizer material

Biofertilizers Technology S. Kannaiyan, K. Kumar, K. Govindarajan, 2010-04-01 Rice based cropping system is the major cropping system practised in India which includes the rotation of crops involving rice pulses oil seeds cotton sugar cane green manures etc The rice based cropping system offers lot of scope for the effective utilization of a wide range of biofertilizers such as Azolla BGA Azospirillum Rhizobium Gluconacetobacter diazotrophicus and other heterotrophic N₂ fixing bacteria which help to increase the yield by reducing the cost of cultivation It thus has dual advantages of being sustainable without endangering the environment and being highly cost effective This book Biofertilizer Technology for Rice Based Cropping System deals with the current developments in the basic and applied aspects of biofertilizers used in the rice based cropping including the novel endophytic diazotrophs viz Azorhizobium caulinodans Gluconacetobacter diazotrophicus Pink Pigmented Facultative Methylophs PPFM etc The role of P Zn and Si solubilizers in the nutrient dynamics of the rice ecosystem has also been covered The strategies for production and distribution of quality inoculants for rice based cropping system has been given due importance with a focus on the molecular approaches for rapid and reliable quality control of biofertilizers This book can be considered as a monograph on the usage of biofertilizers in rice based cropping system It will be very useful for the scientists researchers students and extension workers involved in the management of crops in rice based cropping system

Genetic Engineering, Biofertilisation, Soil Quality and Organic Farming Eric Lichtfouse, 2010-06-14 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children Sustainable agriculture is a discipline that addresses current issues such as climate change increasing food and fuel prices poor nation starvation rich nation obesity water pollution soil erosion fertility loss pest control and biodiversity depletion Novel environmentally friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy soil science molecular biology chemistry toxicology ecology economy and social sciences Indeed sustainable agriculture decipher

mechanisms of processes that occur from the molecular level to the farming system to the global level at time scales ranging from seconds to centuries For that scientists use the system approach that involves studying components and interactions of a whole system to address scientific economic and social issues In that respect sustainable agriculture is not a classical narrow science Instead of solving problems using the classical painkiller approach that treats only negative impacts sustainable agriculture treats problem sources Because most actual society issues are now intertwined global and fast developing sustainable agriculture will bring solutions to build a safer world This book series gathers review articles that analyze current agricultural issues and knowledge then propose alternative solutions It will therefore help all scientists decision makers professors farmers and politicians who wish to build a safe agriculture energy and food system for future generations

Exploitation of Microorganisms D.G. Jones,2012-12-06 Microbiology may be described as one of the younger sciences with its history as a precise subject only dating as far back as Pasteur in the mid 1800s and his revelation both of the role of microorganisms in nature and their importance to human welfare Medical scientists rapidly took up the challenge with their area of microbiology flourishing and expanding almost in complete isolation from the rest of biology We now know of course that microorganisms have always played an important if not essential role in the biosphere with fermented foods and beverages plant and animal diseases and nutrient cycling foremost in their sphere of activities Within the last twenty years microbiology has received two enormous boosts with the developments in microbial genetics and genetic engineering probably being the most influential and the greater awareness of pollution and environmental sustainability following a close second In 1990 your editor had the privilege and pleasure of being elected as President of The Association of Applied Biologists in the United Kingdom and as the topic for his three day Presidential Conference chose The exploitation of microorganisms in applied biology This meeting stimulated great interest in a wide range of subject areas from weed control to nematology from plant breeding to plant pathology from mushrooms to mycorrhiza The proceedings of this meeting were published in Aspects of Applied Biology No 24 1990

FAO Soils Bulletin ,1996 Integrated Plant Nutrition Systems Raoul Dudal,R. N. Roy,1995-01-01 This publication is structured on the main themes of the consultation the importance of plant nutrition for meeting agricultural product requirements soil organic matter biomass soil microflora and management of integrated plant nutrition systems renewable supply of plant nutrients from natural sources and plant nutrient transfer to crops the place and role of local and external sources of plant nutrients in cropping systems and their evaluation plant nutrient management in farming systems and in watersheds and territories and priorities for FAO s Integrated Plant Nutrition Systems IPNS programme

The Algae World Dinabandhu Sahoo,Joseph Seckbach,2015-12-16 Algal World has been carefully written and edited with an interdisciplinary appeal and aims to bring all aspects of Algae together in one volume The 22 chapters are divided into two different parts which have been authored by eminent researchers from across the world The first part Biology of Algae contains 10 chapters dealing with the general

characteristics classification and description of different groups such as Blue Green Algae Green Algae Brown Algae Red Algae Diatoms Xanthophyceae Dinophyceae etc In it has two important chapters covering Algae in Extreme Environments and Life Histories and Growth Forms in Green Algae The second part Applied Phycology contains 12 chapters dealing with the more applied aspects ranging from Algal Biotechnology Biofuel Phycoremediation Bioactive Compounds Biofertilizer Fatty Acids Harmful Algal Blooms Industrial Applications of Seaweeds Nanotechnology Phylogenomics and Algal culture Techniques etc Tillage Systems in the Tropics R. Lal, Food and Agriculture Organization of the United Nations, 1995-01-01 The objectives of this Bulletin are to collate up to date information on soil tillage requirements for soils in the tropics to assess the impacts of different ways of tillage on soil environment and crop productivity and to outline criteria for developing environment friendly and economically viable tillage techniques for sustainable use of soil and water resources

Biotechnology in Agriculture and Food Processing Parmjit S. Panesar, Satwinder S. Marwaha, 2013-07-23 An instructive and comprehensive overview of the use of biotechnology in agriculture and food production *Biotechnology in Agriculture and Food Processing Opportunities and Challenges* discusses how biotechnology can improve the quality and productivity of agriculture and food products It includes current topics such as GM foods enzymes and prod *Agricultural Microbiology Based Entrepreneurship* Natarajan Amaresan, Dhanasekaran Dharumadurai, Olubukola Oluranti Babalola, 2022-11-29 This book is first part of the 3 volume set focusing on basic and advanced methods for using microbiology as an entrepreneurial venture This volume explains the entrepreneurship skills for production cost benefit analysis and marketing of bio fertilizers bio pesticides bio insecticides seaweed liquid biofertilizer and phosphate solubilizers Chapters cover the applications of microorganisms in small and large scale production to achieve a sustainable output The book provides essential knowledge and working business protocols from all related disciplines in agribusiness organic farming and economic integration This book is useful to graduate students research scholars and postdoctoral fellows and teachers who belong to different disciplines via Botany Agriculture Environmental Microbiology and Biotechnology Plant Pathology and Horticulture Next two volumes are focused on food and industrial microbiology Blue-green Algae for Rice Production G. Microbes: Health and Environment Volume III Ashok K. Chauhan, Ajit Varma, 2007 *Microbes Health and Environment* highlights the interrelatedness of microbes with life and the environment It stresses that microbes have a beneficial impact on human life and environment It covers the various aspects of microbes such as molecular biology interrelationships microbial intervention in our environment microbial biotechnology genetics their immunology biochemistry economic importance interaction with medicinal plants human beings industrial relevance influence on our health and so on It is an asset for enterprising students teachers and scientists *Soil Conservation for Small Farmers in the Humid Tropics* Ted C. Sheng, 1989-01-01 **Soil Tillage in Africa** Food and Agriculture Organization of the United Nations. Soil Resource, Management, and Conservation Service, 1993-01-01 Microbial Diversity T. Satyanarayana, 2005 *Microbial Diversity*

Current Perspectives and Potential Applications is woven around the recent global perceptions of microbial diversity. Diverse perspectives are discussed in the context of ecosystem dynamics taking into consideration environments that are rather unique to microorganisms. Considerable focus is placed on the role that microorganisms play in sustainable production systems. The microbe-plant interaction dynamic is highlighted in the discussion of mycorrhizal partners on which depends not only the plant community structure but also abatement of abiotic and biotic stresses. Another mutualist rhizobia gets its due coverage whereas the plant disease component carries examples from both the perspective of fungal and viral diseases. Considerable emphasis is placed on a discussion of the environmental issues such as the approaches that will lead to newer bioremediation technologies. No discussion of microbial diversity is complete without their implications in animal and human health. Discussed in this context are L-arginases in cancer therapy as well as bioactives from cyanobacteria. Genomics and pathogenicity of two groups of viruses viz blue tongue and flaviviruses is highlighted whereas keratinophilic fungal forms are discussed in the context of dermatophytic infections. This volume also carries a fair number of articles on commercial microbiology.

Application of Nitrogen-fixing Systems in Soil Improvement and Management Y. A.

Hamdi, 1982-01-01 Biological nitrogen fixation Rhizobia-legume symbiosis Blue-green alga Free-living nitrogen-fixing bacteria Azolla Nodulated non-leguminous plants Some costs of biofertilizers

Bioremediation and Phytoremediation Technologies in Sustainable Soil Management Junaid Ahmad Malik, Megh R. Goyal, 2022-06-30 This 4-volume set focuses on the use of microbial bioremediation and phytoremediation to clean up pollutants in soil such as pesticides, petroleum hydrocarbons, metals, and chlorinated solvents which reduce the soil's fertility and renders it unfit for plant growth. Volume 2: Microbial Approaches and Recent Trends focuses on new and emerging techniques and approaches to address soil pollution. These include the use of rhizobacteria, archaea, cyanobacteria, and microalgae as biofertilizers and for soil bioremediation efforts. New technologies for assessment of soil bioremediation are explored also. The chapters provide in-depth coverage of the mechanisms, advantages, and disadvantages of the technologies used and highlight the use of different microbial enzymes that are used in the process of bioremediation and phytoremediation to clean up different pollutants without causing damage to the natural environment. Other volumes in the 4-volume set: Volume 1: Fundamental Aspects and Contaminated Sites; Volume 3: Inventive Techniques, Research Methods, and Case Studies; Volume 4: Degradation of Pesticides and Polychlorinated Biphenyls. Together, these four volumes provide in-depth coverage of the mechanisms, advantages, and disadvantages of the bioremediation and phytoremediation technologies for safe and sustainable soil management. The diverse topics help to arm biologists, agricultural engineers, environmental and soil scientists, and chemists with the information and tools they need to address soil toxins that are a dangerous risk to plants, wildlife, humans, and of course the soil itself.
