Blocton Charles Edward Adams,2001      Diamonds in the Rough James Sanders Day,2013-06-24 Diamonds in the Rough reconstructs the historical moment that defined the Cahaba Coal Field a mineral rich area that stretches across sixty seven miles and four counties of central Alabama Combining existing written sources with oral accounts and personal recollections James Sanders Day s Diamonds in the Rough describes the numerous coal operations in this region later overshadowed by the rise of the Birmingham district and the larger Warrior Field to the north Many of the capitalists are the same Truman H Aldrich Henry F DeBardeleben and James W Sloss among others however the plethora of small independent enterprises properties of the coal itself and technological considerations distinguish the Cahaba from other Alabama coal fields Relatively short lived the Cahaba coal mining operation spanned from discovery in the 1840s through development boom and finally bust in the mid 1950s Day considers the chronological discovery mapping mining and marketing of the field s coal as well as the issues of convict leasing town development welfare capitalism and unionism weaving it all into a rich tapestry At the heart of the story are the diverse people who lived and worked in the district whether operator or miner management or labor union or nonunion white or black immigrant or native who left a legacy for posterity now captured in Diamonds in the Rough Largely obscured today by pine trees and kudzu the mining districts of the Cahaba Coal Field forever influenced the lives of countless individuals and families and ultimately contributed to the whole fabric of the state of Alabama Winner of the 2014 Clinton Jackson Coley Award for Best Work on Alabama Local History from the Alabama Historical Association

**"Everybody was Black Down There"** Robert H. Woodrum,2007 In 1930 almost 13 000 African Americans worked in the coal mines around Birmingham Alabama They made up 53 percent of the mining workforce and some 60 percent of their union s local membership At the close of the twentieth century only about 15 percent of Birmingham s miners were black and the entire mining workforce had been sharply reduced Robert H Woodrum offers a challenging interpretation of why this dramatic decline occurred and why it happened during an era of strong union presence in the Alabama coalfields Drawing on union company and government records as well as interviews with coal miners Woodrum examines the complex connections between racial ideology and technological and economic change Extending the chronological scope of previous studies of race work and unionization in the Birmingham coalfields Woodrum covers the New Deal World War II the postwar era the 1970s expansion of coalfield employment and contemporary trends toward globalization The United Mine Workers of America s efforts to bridge the color line in places like Birmingham should not be underestimated says Woodrum Facing pressure from the wider world of segregationist Alabama however union leadership ultimately backed off the UMWA s historic commitment to the rights of its black members Woodrum discusses the role of state UMWA president William Mitch in this process and describes Birmingham s unique economic circumstances as an essentially Rust Belt city within the burgeoning Sun Belt South This is a nuanced exploration of how despite their central role in bringing the UMWA back to

Alabama in the early 1930s black miners remained vulnerable to the economic and technological changes that transformed the coal industry after World War II
