**Blood From Stones** Douglas Farah, 2004-05-04 In the aftermath of 9 11 President Bush froze all terrorist assets in traditional financial institutions and money channels But Al Qaeda and other terrorist groups have long followed a diversification strategy that has rendered the crackdown by the U S and other governments almost useless Blood from Stones is the first book to uncover through on the ground reporting the interlocking web of commodities underground transfer systems charities and sympathetic bankers that support terrorist activities throughout the world As a foreign correspondent and investigative reporter for The Washington Post Douglas Farah ventured into the dangerous and uncharted world of terrorist financing a journey that took him across four continents The information he gathered was far ahead of what U S intelligence agencies knew as they scrambled to understand the 9 11 attacks In unprecedented detail Farah traces the movement of money from the traffickers of blood diamonds in West Africa to the world diamond exchange in Belgium and homegrown money merchants in Saudi Arabia Dubai Karachi and Lahore who turn cash into commodities and commodities into cash He probes charities that siphon off money to pay for such essentials as false identification cards and safe passage for operatives And he reveals how the funding of terrorist activities is integrated into the age old hawala network a trust based system that has operated for generations across Arabia and Southeast Asia Focusing on this critical aspect of the war on terrorism Blood from Stones not only shows how terrorists are able to orchestrate complex and expensive attacks but also makes it clear why the war will be so difficult to win     Countering the Financing of Terrorism ,     **Blood on the Stone** Ian Smillie, 2010-08-15 Africa s diamond wars took four million lives Blood on the Stone tells the story of how diamonds came to be so dangerous describing the great diamond cartel and a dangerous pipeline leading from war torn Africa to the glittering showrooms of Paris London and New York It describes the campaign that forced an industry and more than 50 governments to create a global control mechanism and it provides a sobering prognosis on its future     **Terrornomics** Sean S. Costigan, David Gold, 2016-03-16 Today no single issue dominates the global political landscape as much as terrorism Aware of their unique position in the newly unipolar world terrorist leaders have articulated that economic warfare is a key component of the new terrorist agenda Governments have accentuated the role of economic tools in their counter terrorism policies while maintaining emphasis on the application of military force or hard power even though such tools often prove unnecessarily blunt or even sorely inadequate Given the complexity of the global threat posed by modern transnational terrorist groups combating terrorism with a mix of hard and soft power is more important than ever As an invaluable new book in terrorism studies Terrornomics brings together contributions from renowned international scholars and practitioners to provide a multifaceted view of contemporary financial counterterrorism and terrorist funding efforts It employs key concepts terms case studies and policy recommendations to advance our understanding of the threats and possible courses of action thus enabling us to grasp the critical financial and economic issues while providing potential counterterrorist

Strategic Studies Institute, 2012 The emergence of new hybrid state and nonstate transnational criminal terrorist franchises in Latin America operating under broad state protection now pose a tier one security threat for the United States Similar hybrid franchise models are developing in other parts of the world which makes the understanding of these new dynamics an important factor in a broader national security context This threat goes well beyond the traditional nonstate theory of constraints activity such as drug trafficking money laundering and human trafficking into the potential for trafficking related to weapons of mass destruction by designated terrorist organizations and their sponsors These activities are carried out with the support of regional and extra regional state actors whose leadership

is deeply enmeshed in criminal activity which yields billions of dollars in illicit revenues every year These same leaders have a publicly articulated common doctrine of asymmetrical warfare against the United States and its allies that explicitly endorses as legitimate the use of weapons of mass destruction The central binding element in this alliance is a hatred for the West particularly the United States and deep anti Semitism based on a shared view that the 1979 Iranian Revolution was a transformative historical event For Islamists it is evidence of divine favor and for Bolivarians a model of a successful asymmetrical strategy to defeat the Empire The primary architect of this theology ideology that merges radical Islam and radical anti Western populism and revolutionary zeal is the convicted terrorist Ilich Sanchez Ramirez better known as Carlos the Jackal whom Chavez has called a true visionary
