Bloodline of the Gods Nick Redfern, 2025-09-12 Are significant numbers of humanity the product of an ancient and advanced alien civilization Have we across the millennia been periodically modified and refined as a species In short has our genetic make up been manipulated by otherworldly beings that view human civilization as one big lab experiment These are controversial and thought provoking questions They are also questions that demand answers answers that may very well be found by examining those people whose blood type is Rh negative The vast majority of humankind 85 to 90 percent is Rh positive which means a person s red blood cells contain an antigen directly connected to the Rhesus monkey This antigen is known as the Rh factor Each and every primate on the planet has this antigen except for one the remaining 10 to 15 percent of humans If the theory of evolution is valid that each and every one of us is descended from ancient primates shouldn t we all be Rh positive Yes we should But we re not The Negatives are unlike the rest of us

They are different They are the unique individuals whose bloodline may have nothing less than extraterrestrial origins

Blood Dynamics Anita Y. Wonder, 2001 Today's resources on bloodstain analysis are still based on methods that were derived in the 1920s Although medical and clinical research have provided a growing body of information on blood composition and behavior this information has been ignored in favor of historical bloodstain analysis methods until now With 25 years of experience in the field author Anita Wonder shows how to use these new methods for interpreting bloodstains including non Newtonian fluid behavior a process that does not conform to Sir Isaac Newton's laws of motion and three dimensional dispersion modeling Blood Dynamics focuses on how to accurately identify eight bloodstain pattern types and their permutations It covers every aspect of bloodstain analysis and shows how some standard practices of reconstruction are not only unnecessary for identification of blood dynamics but can even be misleading This book presents completely new scientific evaluations of blood dynamics and will fundamentally change the way in which bloodstains are interpreted As such it will be required reading for anyone who deals with blood evidence at the crime scene in the lab or in the courtroom

Living in Uncertainty, Living with Spirit John C. Woodcock,2012-10 Our ancestors lived in a world saturated with spiritual significance Unusual events occurring within the contingencies of life were easily comprehended in terms of spiritual reality the work of the gods for example and the future was generally pictured in terms of the after life People could thus feel a measure of security in their present circumstances and some certainty about their future In contrast our ordinary existence today seems bereft of any spiritual significance generating insecurity in our lives and uncertainty in the face of what has now become an unknown future In this series of essays the author describes unusual events in his own life that he chose to follow or act upon In so doing he slowly discovered that a certain kind of non random event can be a hint of unknown futures seeking to unfold into existence These essays together form the outline of an art form or method for proceeding from personal insecurity and uncertainty towards comprehension of the spiritual significance lying within ordinary life **Witcha** Nathaniel Harris,2004 Of course it is not possible to demystify Mysticism and who would want to Yet also there is no need for deliberate and gratuitous obscurantism Witcha presents many secrets of English Witchcraft in plain language giving details of widdershins and deosil circle casting spell craft divination spiritism sabbats and esbats sacrificeentheogens philosophy history and more besides The focus is primarily upon those aspects commonly called operative witchcraft which is the witchcraft of results and getting things done rather than the supposedly more spiritual aspects that have been the subject of so many books of late These are illustrated with photographs taken by my step father Adrian Brynn Evans detailing with their kind permission and support exhibits from the Museum of Witchcraft Boscastle These give visual reference to the historical context of this path proving that it is not something invented by New Age gurus

Making New Worlds John C. Woodcock, 2013-12-16 Imagining this or that future as a way of generating hope and hopeful action far from moving us towards any desired outcome is simply occluding our eyes from the reality that is right in front of us daily Our time is incredibly uncertain and our lives are dominated by catastrophic thinking with fear more and more determining out real actions and outcomes on the local or world scale If we finally drop all pretense that hope can have any bearing on the future we must then face the level of fear running freely through world affairs today and equally we must face the fact that predictability is impossible in regards to the future Under these circumstances we can ask is there any adequate way of addressing the future at all a way that does not blind us to the fearful realities of our times a way that does not address the unknown future in terms of predictability or hope a way that nonetheless may indeed help prepare the unknown future There is and I will call it the way of the artist From the Introduction Islam in Politics in Russia and Central Asia Stephane A. Dudolgnon, Komatsu Hisao, 2013-11-05 First Published in 2001 This volume contains the proceedings of the international colloquium held by the IAS Project in October 1999 These papers deal with the modern and contemporary history of Central Eurasia for a comprehensive reflection on various phenomena that led to a political valuation of Islam under non Muslim domination whether Russian or Chinese since the beginning of the 18th century A comparative approach to the current situations in the Russian Federation and the newly independent states of Central Asia has allowed us to study the various modes of the political instrumentalization of Islam by both political power and opposition in such various areas as the Ferghana Valley in Uzbekistan and the Volga Urals region of Russia
