Blood Transfusion Bertram M. Bernheim, 2015-08-05 Excerpt from Blood Transfusion Hemorrhage and the Anaemias

The present volume is an outgrowth of a chapter on Blood Transfusion written in 1913 as part of a monograph published in that year on Surgery of the Vascular System After a very gratifying distribution of that work a revision seemed in order

because of the many advances made in this field of surgery but on addressing myself to the task I was amazed at the development attained by the subject of transfusion to which just one chapter had been devoted only a short time before Such revolutionary changes in technic had come about and the usefulness of transfusion had developed so tremendously that it seemed wise to postpone the contemplated revision and to prepare a separate work with the single topic of blood transfusion An enormous amount of work has been carried out in recent years by hundreds of enthusiastic investigators as a result of which a vast literature has arisen still there has been no compilation of the subject since Crile s work on Hemorrhage and Transfusion in 1909 before transfusion had proved itself of practical enduring worth About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
