Blue Cross What Went Wrong:

The Fragmentation of U.S. Health Care Einer Elhauge, 2010-03-22 Why is our health care system so fragmented in the care it gives patients Why is there little coordination amongst the many doctors who treat individual patients who often even lack access to a common set of medical records Why is fragmentation a problem even within a single hospital where errors or miscommunications often seem to result from poor coordination amongst the myriad of professionals treating any one individual patient Why is health care fragmented both over time so that too little is spent on preventive care and across patients so that resources are often misallocated to the patients who need it least The Fragmentation of U S Health Care Causes and Solutions approaches these broad questions with a highly interdisciplinary approach The articles included in the work address legal and regulatory issues including laws that mandate separate payments for each provider restrict hospitals or others from controlling or rewarding the set of providers treating a patient to assure coordinated care and provide affirmative disincentives for coordinating care by paying more for uncoordinated care that requires more services Business reasons for the current form of hospital organization are considered and efficiency and design are examined and compared to other industries The economics of current hospital organization are also taken into account The authors examine and propose various reforms that make our health care system less fragmented more efficient and more medically effective National Standards No-fault Motor Vehicle Insurance Act United States. Rodwin, 2013-10-03 In this book Marc Rodwin examines the development of conflicts of interest in the health care systems of the US France and Japan He shows that national differences in the organization of medical practice and the interplay of organized medicine the market and the state give rise to variations in the type and prevalence of such conflicts and then analyzes the strategies that each nation employs to cope with them Drawing on the experiences of these three nations *Conflicts of Interest and the Future of Medicine* demonstrates that we can mitigate these problems with carefully planned reform and regulation **An Introduction to the US Health Care Industry** David S. Guzik, 2020-10-13 Why does US health care have such high costs and poor outcomes Dr David S Guzik offers this critique of the American health care industry and argues that it could work more effectively by rebalancing care

cost and access For decades the United States has been faced with a puzzling problem Despite spending much more money per capita on health care than any other developed nation its population suffers from notoriously poorer health In comparison with 10 other high income nations in fact the US has the lowest life expectancy at birth the highest rates of infant and neonatal mortality and the most inequitable access to physicians when adjusted for need In An Introduction to the US Health Care Industry Dr David S Guzik takes an in depth look at this troubling issue Bringing to bear his unique background as a physician economist former University of Rochester medical school dean and former president of the University of Florida Health System Dr Guzik shows that what we commonly refer to as the US health care system is actually an industry forged by a unique collection of self interested and disjointed stakeholders He argues that the assumptions underlying well functioning markets do not align with health care The resulting market imperfections combined with entrenched industry stakeholders have led to a significant imbalance of care cost and access Using a nontechnical framework Dr Guzik introduces readers to the economic principles behind the function and dysfunction of our health care industry He shows how the market based approach could be expected to remedy these problems while detailing the realities of imperfections regulations and wealth inequality on those functions He also analyzes how this industry developed presenting the conceptual underpinnings of the health care industry while detailing its history and tracing the creation and entrenchment of the current federation of key stakeholders government insurance companies hospitals doctors employers and drug and device manufacturers In the final section of the book Dr Guzik looks to the future describing the prevention innovation and alternative financing models that could help to rebalance the priorities of care cost and access that Americans need An online supplement on COVID 19 is available as is a discussion guide for instructors To access this supplemental material please visit www.jhupbooks.press.jhu.edu **Competition Among Health Practitioners** Wendy Lazarus,1981

Choice as an Outstanding Academic Title In Health Care for Some Beatrix Hoffman offers an engaging in depth look at America s long tradition of unequal access to health care She argues that two main features have characterized the US health system a refusal to adopt a right to care and a particularly American approach to the rationing of care Health Care for Some shows that the haphazard way the US system allocates medical services using income race region insurance coverage and many other factors is a disorganized illogical and powerful form of rationing And unlike rationing in most countries which is intended to keep costs down rationing in the United States has actually led to increased costs resulting in the most expensive health care system in the world While most histories of US health care emphasize failed policy reforms Health Care for Some looks at the system from the ground up in order to examine how rationing is experienced by ordinary Americans and how experiences of rationing have led to claims for a right to health care By taking this approach Hoffman puts a much needed human face on a topic that is too often dominated by talking heads A well researched readable primer on the development of the complex fragmented US medical system Times Higher Education **Clearinghouse Review** ,1974
